Foreword	vii
Acknowledgements	ix
Glossary	xi
Notation	xiv
1 Introduction	1
1.1 Background	1
1.2 Scope of the Guide	2
1.3 Types of protection	2
1.4 Use of the Guide	6
2 Processes of bank failure	7
2.1 Introduction	7
2.2 Channel and river morphology	8
2.3 Processes affecting surface erosion of banks	10
2.4 Processes affecting mass failure of banks	26
3 Planning and preliminary design	40
3.1 Introduction	40
3.2 Site investigation and background studies	41
3.3 Selection of preliminary options	56
3.4 Determination of preferred method	59
3.5 The preferred scheme	65
4 Preface to detailed design sections	67
4.1 Introduction	67
4.2 Detail design aspects common to all types of protection	69
5 Natural bank protection	76
5.1 Introduction	76
5.2 Design approach	77
5.3 Use of live materials	81
5.4 Use of grass	93
5.5 Use of timber and woody material	105

6 Vertical bank protection	109
6.1 Introduction	109
6.2 Gravity wall design	109
6.3 Materials for gravity walls	117
6.4 Piling	119
6.5 Other retaining walls	122
7 Revetments	126
7.1 Introduction	126
7.2 Components	126
7.3 Design approach	130
7.4 Design of armour layer	130
7.5 Design of underlayer	133
7.6 Rip-rap	140
7.7 Other stone revetments	149
7.8 Precast concrete blocks	156
7.9 Other concrete revetments	163
7.10 Geotextiles and geomembranes	167
7.11 Use of asphalt materials	172
Appendices	177
1 Institutional framework relating to UK watercourses and waterways	177
2 Survey of present UK practice	183
3 Sources of information	188
References	191
Index	195
