ISSN 0273-1223

Water Science and Technology

WATER POLLUTION RESEARCH AND CONTROL

Brighton

Part 4 (Published in 5 Parts)

Editors: L. LIJKLEMA and the IAWPRC
Programme Committee

*INTERNATIONAL ASSOCIATION
ON WATER POLLUTION
RESEARCH AND CONTROL*

F1420/56

CONTENTS

U.K. State-of-the-Art

- B. L. BAYNE: Measuring the biological effects of pollution: the Mussel Watch approach 1089
- D. CLEGG, A. R. EADON and D. FIDDES: UK State-of-the-Art—sewerage rehabilitation 1101
(Discussed in Part 5)
- A. M. BRUCE and R. D. DAVIS: Sewage sludge disposal: current and future options 1113
(Discussed in Part 5)
- M. J. ROUSE and R. F. CRANFIELD: An overview of the trends and future direction of information technology in the water industry 1129
(Discussed in Part 5)
- M. A. HOUSE and D. H. NEWSOME: Water quality indices for the management of surface water quality 1137
(Discussed in Part 5)
- J. M. TYSON and M. A. HOUSE: The application of a water quality index to river management 1149
(Discussed in Part 5)

Instrumentation, Control and Automation

- M. HIRAOKA and K. TSUMURA: System identification and control of the activated sludge process by use of a statistical model 1161
(Discussed in Part 5)
- M. VON SPERLING and J. P. LUMBERS: Control objectives and the modelling of MLSS in oxidation ditches 1173
(Discussed in Part 5)
- U. HOLMBERG, G. OLSSON and B. ANDERSSON: Simultaneous DO control and respiration estimation 1185
- S. M. BOCKEN, M. BRAAE and P. L. DOLD: Dissolved oxygen control and oxygen utilization rate estimation: extension of the Holmberg/Olsson method 1197
- J. CHARPENTIER, H. GODART, G. MARTIN and Y. MOGNO: Oxidation-reduction potential (ORP) regulation as a way to optimize aeration and C, N and P removal: experimental basis and various full-scale examples 1209
(Discussed in Part 5)

R. ZALOUM: A critical look into the deviation of full scale performance from design expectations (Discussed in Part 5)	1389
V. K. THOMAS, B. CHAMBERS and W. DUNN: Optimisation of aeration efficiency: a design procedure for secondary treatment using a hybrid aeration system (Discussed in Part 5)	1403
D. T. REDMON, W. C. BOYLE and B. G. HELLSTROM: Experiences in field testing a variety of aeration equipment in Sweden and in the U.S.A. by offgas analysis (Discussed in Part 5)	1421
W. F. GARBER: Sewage sludge disposal in Southern California, U.S.A. (Discussed in Part 5)	1431
E. W. KNIGHT: Recent advances in mechanical dewatering of digested sludge (Discussed in Part 5)	1441
P. T. RUGGENTHALER: Full-scale experience with sludge treatment at the Vienna sewage works (Discussed in Part 5)	1447
S. SAKAI, M. HIRAOKA, N. TAKEDA and I. OHHAMA: System design and full-scale plant study on a drying-incineration system for sewage sludge (Discussed in Part 5)	1453
H. W. CAMPBELL and T. R. BRIDLE: Conversion of sludge to oil: a novel approach to sludge management (Discussed in Part 5)	1467
P. G. HOLMES: Operational aspects of Doha South Sewage Treatment Works (Discussed in Part 5)	1477
River Basin Management	
B. ALEXANDER and E. HARPER: The Mersey Basin Campaign—the technical challenge	1489
J. CARTER: River basin management—a water company perspective	1499
D. HAMMERTON: River basin management in Scotland (Discussed in Part 5)	1501
D. LOGAN: River basin management in Northern Ireland	1509
U.K. State-of-the-Art	
P. N. PAUL and F. N. MIDMER: Marine treatment	1517
P. N. BRISTOW: The Government's proposals for the restructuring and privatisation of the Water Authorities in England and Wales (Discussed in Part 5)	1527

G. NAGHDY and P. HELLIWELL: Process improvement by computer-aided load smoothing in activated sludge treatment	1225
A. J. BUTWELL, J. M. BURNS, R. S. FIELDEN and M. J. BERRY: The application of ICA in sewage treatment—Witney Evaluation and Demonstration Facility (EDF) (Discussed in Part 5)	1239
D. A. VACCARI and C. CHRISTODOULATOS: A comparison of several control algorithms for activated sludge waste rate	1249
J. M. PHILIPOT, J. P. COUTANT and P. MOUSTY: Design of accidental pollution alarm systems	1261
J. E. ALLEMAN, M. W. SWEENEY and D. M. KAMBER: Automation of batch wastewater treatment systems using programmable logic controllers	1271
J. W. GREEN, C. PAGE, G. M. EASTMAN and D. HOWES: The application of information systems and telemetry to operational management in Anglian Water (Discussed in Part 5)	1283
W. C. BOYLE, B. G. HELLSTROM and L. EWING: Oxygen transfer efficiency measurements using off-gas techniques (Discussed in Part 5)	1295
J. M. BURNS: Instrument triplication in sewage treatment	1301
H. W. CAMPBELL and P. J. CRESCUOLO: Control of polymer addition for sludge conditioning: a demonstration study	1309
G. SCHRANK and C. MURREN: Automation and optimisation of centrifuge sludge dewatering (Discussed in Part 5)	1319
A. R. COMLEY: ICA—evolution is better than revolution	1325
G. OLSSON, B. ANDERSSON, B. G. HELLSTRÖM, H. HOLMSTRÖM, L. G. REINIUS and P. VOPATEK: Measurements, data analysis and control methods in wastewater treatment plants—state of the art and future trends	1333
Large Wastewater Treatment Plants	
W. BAILEY, W. WHITE, C. WILBER, T. E. WILSON and R. BIZZARRI: Sludge reaeration in two-step nitrification	1347
G. ARUESTE, D. FARCHILL, M. GOLDSTEIN and Y. GRUBER: Operation of the Soreq Wastewater Treatment Plant with a single-stage nitrification–denitrification activated sludge system	1359
R. BOLL, R. KAYSER, A. PETER and F. SARFERT: Full-scale experiences with biological phosphorus removal at the wastewater treatment plants of West Berlin	1373
