# SATEM: Selected Aquifer Test Evaluation Methods

A microcomputer program

J.Boonstra

F 6347

# Contents

	Page
Preface	
1 Introduction	9
2 Basic concepts and definitions	10
2.1 Types of waterbearing layers	10
2.2 Aquifer types	10
2.3 Hydraulic head	12
2.4 Darcy's law	13
2.5 Anisotropy and heterogeneity	14
2.6 Physical properties	15
2.6.1 Hydraulic conductivity (K)	15
2.6.2 Saturated thickness (H, D')	16
2.6.3 Transmissivity (KH or T)	17
2.6.4 Specific storage ( $S_s$ ) and storativity (S)	17
2.6.5 Specific yield ( $S_y$ )	18
2.6.6 Hydraulic resistance (c)	18
2.6.7 Leakage factor (L)	18
3 Performance of an aquifer test	21
3.1 General	21
3.2 Measurements	22
3.3 Duration of a pumping test	24
3.4 Processing the data	25
4 Application of analysis methods	27
4.1 Analysis methods drawdown data	27
4.1.1 Confined aquifers	27
4.1.2 Leaky aquifers	33
4.1.3 Unconfined aquifers	36
4.2 Analysis methods recovery data	39
4.2.1 Confined aquifers	40
5 Program package SATEM	43
5.1 Program features	43
5.2 General structure	44
5.3 Individual programs	46

5.3.1	Program JACOB	46
5.3.2	Program HANTUSH	49
5.3.3	Program PARTIAL	52
5.3.4	Program RESIDUAL	54
6	Guidelines	57
6.1	Diagnostic plots	57
6.1.1	Pumped well	57
6.1.2	Piezometers or observation wells	59
6.2	Applicability and limiting conditions	61
6.2.1	Program JACOB	61
6.2.2	Program HANTUSH	62
6.2.3	Program PARTIAL	63
6.2.4	Program RESIDUAL	64
6.3	Departures from theory under field conditions	65
6.3.1	Early-time drawdown data	66
6.3.2	Late-time drawdown data	67
6.3.3	Late-time residual-drawdown data	68
6.3.4	Pumped well drawdown data	70
6.4	Conclusions	70
	References	71
	Appendix A: Values of the Theis well function $W(u)$ as function of $1/u$	73
	Appendix B: Values of the Hantush well function $W(u,B)$ as function of $1/u$ and $B$	74
	Appendix C: Values of $K_0(x)$ and $e^x K_0(x)$ as function of $x$	76
	Appendix D: Description program INPUT	78
	Appendix E: Description program SCAL	80
