Contents and Subect Index

1. INTRODUCTION AND OVERVIEW	1
1.1 Historical Overview	1
1.2 Objectives of the Manual.	2
1.3 References	2
2. FINE PORE DIFFUSER CHARACTERISTICS.	3
2.1 Introduction.	3
2.2 Types of Fine Pore Media	3
2.2.1 Ceramics	3
2.2.2 Porous Plastics	4
2.2.2.1 Rigid Porous Plastics	4
2.2.2.2 Nonrigid Porous Plastic.	5
2.2.3 Perforated Membranes	5
2.3 Types of Fine Pore Diffusers	6
2.3.1 Plate Diffusers	6
2.3.2 Tube Diffusers	6
2.3.3 Dome Diffusers.	10
2.3.4 Disc Diffusers	10
2.3.4.1 Ceramic and Rigid Porous Plastic Media.	10
2.3.4.2 Perforated Membranes	13
2.4 Diffuser Layout	14
2.4.1 Plate Diffusers	14
2.4.2 Tube Diffusers	14
2.4.3 Disc and Dome Diffusers.	16
2.5 Characteristics of Fine Pore Media	16
2.5.1 Physical Description.	16
2.5.2 Dimensions	17
2.5.3 Weight and Specific Weight	17
2.5.4 Permeability	17
2.5.5 Perforation Pattern	18
2.5.6 Strength	18
2.5.7 Hardness	18
2.5.8 Environmental Resistance	18
2.5.9 Miscellaneous Physical Properties	19
2.5.10 Oxygen Transfer Efficiency	19

2.5.11	Dynamic Wet Pressure	20
2.5.12	Bubble Release Vacuum	20
2.5.13	Uniformity	22
2.6	Clean Water Performance	24
2.6.1	Introduction	24
2.6.2	Clean Water Data Base	25
2.6.2.1	Steady-State DO Saturation Concentration (C^*_{∞})	25
2.6.2.2	Oxygen Transfer Data	25
2.7	References	33
3.	PROCESS WATER PERFORMANCE	37
3.1	Introduction	37
3.2	Factors Affecting Performance	40
3.3	Diffuser Fouling	40
3.3.1	Background	40
3.3.2	Types of Fouling	41
3.3.2.1	Type I Fouling	41
3.3.2.2	Type II Fouling	41
3.3.3	Fouling Characteristics	42
3.3.3.1	Characterization Tests	42
3.3.3.2	Foulant Properties	44
3.3.3.3	Temporal Variations	45
3.3.3.4	Spatial Variations	46
3.3.3.5	Air-Side Fouling	49
3.3.3.6	Media Effects	50
3.3.4	Fouling Rates	53
3.3.4.1	Dynamic Wet Pressure	53
3.3.4.2	Oxygen Transfer Efficiency	54
3.4	Process Water Data Base	57
3.4.1	General Data Summary	57
3.4.2	Selected Variables Affecting Process Water Performance	58
3.4.2.1	Wastewater Characteristics	59
3.4.2.2	Diffuser Airflow Rate	59
3.4.2.3	Diffuser Layout and Characteristics	63
3.4.2.4	Process Loading Effects	64
3.4.2.5	Flow Regime	67
3.5	References	73
4.	OPERATION AND MAINTENANCE	76
4.1	Introduction	76
4.2	Operation	76
4.2.1	Start-Up	76
4.2.2	Shutdown	76
4.2.3	Normal Operation	77
4.2.3.1	Factors Affecting Aeration System Efficiency	77
4.2.3.2	Aeration System Monitoring	80
4.2.3.3	Recordkeeping	83
4.3	Maintenance	84
4.3.1	Blowers	84
4.3.2	Air Systems	84
4.3.3	Diffusers	84
4.3.3.1	Cleaning Methods	84
4.3.3.2	Cleaning Method Selection	86
4.3.3.3	Estimating Cleaning Frequency	87

4.3.4	Troubleshooting	94
4.4	References	94
5.	SYSTEM DESIGN AND INSTALLATION	95
5.1	Introduction	95
5.2	Process and O&M Considerations	95
5.2.1	Process-Related Considerations	95
5.2.2	O&M-Related Considerations	98
5.3	Process Oxygen and Mixing Requirements	99
5.3.1	Process Oxygen Requirements	99
5.3.1.1	Types of Process Oxygen Requirements	100
5.3.1.2	Calculation of Process Oxygen Requirements	100
5.3.1.3	Variations in Process Oxygen Requirements	106
5.3.2	Process Mixing Requirements	111
5.4	Air Diffusion System	113
5.4.1	Diffuser Selection	113
5.4.1.1	Oxygen Transfer Efficiency	113
5.4.1.2	Operational Flexibility	114
5.4.1.3	Reliability	115
5.4.1.4	Maintenance Requirements	115
5.4.2	Basin Arrangement	116
5.4.3	Airflow Distribution	116
5.4.3.1	Control	116
5.4.3.2	Airflow Measurement	117
5.4.4	Diffuser Cleaning and Maintenance	117
5.4.5	Diffuser Installation	118
5.4.6	Specifications	119
5.4.7	Retrofit Considerations	119
5.4.8	Air Diffusion System Design Example	120
5.4.9	Flexibility of Design	120
5.5	Air Supply System	120
5.5.1	Air Piping	130
5.5.1.1	Materials	130
5.5.1.2	Design	131
5.5.2	Air Filtration	132
5.5.2.1	Degree of Cleaning Required	132
5.5.2.2	Types of Filters	132
5.5.2.3	Filter Selection	132
5.5.3	Blowers	132
5.5.3.1	Description	132
5.5.3.2	Turndown Considerations	133
5.5.3.3	Blower Selection	134
5.5.3.4	Control Considerations	134
5.5.4	Design and Installation	134
5.5.5	Retrofit Considerations	135
5.5.5.1	Air Piping	135
5.5.5.2	Air Filtration	135
5.5.5.3	Blowers	136
5.5.6	Air Supply System Design Example	136
5.6	Summary of Aeration System Design Procedure	136
5.6.1	Outline of Approach	141
5.6.2	Steps in Design	141
5.6.2.1	Determine Flows and Loads	141
5.6.2.2	Establish Process Design Criteria	141
5.6.2.3	Size Basins	143

5.6.2.4	Select Diffusers	143
5.6.2.5	Configure Basins	143
5.6.2.6	Determine Oxygen Transfer Requirements	143
5.6.2.7	Determine Aeration Rates	143
5.6.2.8	Configure Diffuser System	143
5.6.2.9	Design Blower System	143
5.6.2.10	Review System Flexibility	144
5.6.2.11	Design Air Piping System	144
