

CONTENTS

1. New Roles Expected of Wastewater Systems for 21st Century	
T. Annaka	i
2. Measures in Response to New Roles of Wastewater Systems in Japan	
S. Inoue	1
3. Membrane Bio-Reactor for Wastewater Treatment	
Y. Suzuki	7
4. Advanced Information System Using Optical Fiber in Sewers	
N. Taniguchi	13
5. Power Generation by Fuel Cells with Sludge Digestion Gas	
T. Arai	19
6. Utilization of Sewage as a Source of Heat Pump System	
K. Yoshida	24
7. Flower-filled “Orchid Gardens” Operated Using Sewage Works Resources	
D. Matsumi	29
8. Permeable Brick Using Incinerated Sludge Ash: RAITO	
N. Kusaka	36
9. Carbonization Technology of Biosolids	
H. Sampa	42
10. Sewage Works for Snow Control	
T. Shibuya	49
11. Fire Extinguishing System Using Sewer Networks	
T. Nomura	56
12. Effects of Stormwater Infiltration Facilities in Urban Areas	
T. Hasegawa	60
13. Use of Dehydrated Biosolids in Cement Manufacturing	
H. Suzawa	66
14. News and Topics	72
15. Statistics of Sewerage in Japan 1998	80
