

Integrated water resource management in water and sanitation projects

Lessons from projects in Africa, Asia and South America

Jan Teun Visscher, Peter Bury, Toby Gould and Patrick Moriarty

IRC International Water and Sanitation Centre
Delft, The Netherlands

September 1999

Table of Contents

Executive summary	v
Project outline	v
Principle conclusions	v
Recommendations for further work	vi
Preface	vii
List of abbreviations and glossary	viii
1 Introduction	1
2 Finding out about water resources practices	3
2.1 IWRM: evaluation of the methodology	5
2.2 Conclusions and recommendations	6
2.3 IWRM principles selected for review	7
3 Findings on IWRM principles within projects	11
3.1 Water source and catchment conservation	11
3.2 Adequate water allocation needs to be agreed upon between stakeholders	18
3.3 Management needs to be taken care of at the lowest possible levels	23
3.4 Capacity building is the key to sustainability	28
3.5 Involvement of all stakeholders is required	33
3.6 Efficient water use is essential	37
3.7 Water has an economic and social value	43
3.8 Striking a gender balance is essential	50
4 Conclusions and recommendations	57
4.1 Overall conclusion	57
4.2 Conclusions specific to the eight principles of IWRM	57
4.3 Change is needed	60
References and Bibliography	62
List of participants in the project	64
Summary Description of Participating Projects and Case Studies Reviewed	67
