Delft, The Netherlands

Table of Contents for Part 1

Preface	v
Chapter 1: Introduction	1
Chapter 2: Introduction to Monitoring	3
2.1 What is monitoring?	3
2.2 Four lessons	6
2.2.1 More stakeholders are involved	6
2.2.2 A greater range of issues is monitored	7
2.2.3 A greater variety of methods are used	9
2.2.4 More monitoring tools have been developed	11
Chapter 3: Action Monitoring for Effectiveness	13
Step 1: Identify key issues, problems and concerns	16
Step 2: Define indicators and criteria	19
Step 3: Who collects or checks? Are extra checks needed? By whom?	22
Step 4: Collecting, analyzing data, reporting	23
Step 5: Who acts? What action?	23
Step 6: Provide training or orientation	24
Chapter 4: Monitoring Case Studies	27
4.1 Launching a monitoring system	27
Case study 1: Latrine and Education Programme	28
Case study 2: Water Project in Small Towns	31
Case study 3: Evaluation of Managed Water Schemes	33
Chapter 5: Sampling	35
5.1 Monitoring every case: “100% sample”	36
5.2 Small samples	36
5.3 Representative sampling	37
5.4 Time: sampling period	39
5.5 Before/after studies	39

Chapter 6: Collection	41
6.1 Collecting information	42
6.2 Observing	43
6.2.1 Different types of observations	44
6.2.2 Observation tools	44
6.3 Asking and interviewing	46
6.3.1 Interviews	48
6.3.2 Structured interviews with questionnaires	49
6.3.3 Spot checks that combine interviewing and observations	52
6.4 Reading and using documents	53
6.5 Specific participatory methods	55
6.5.1. Mapping	56
6.5.2 Transect walks	59
6.5.3 Rating scales	60
6.5.4 Card sorting	
6.5.5 Monitoring workshop	61
6.6 Technical methods	61
Chapter 7: Analysis	63
7.1 Who analyzes?	64
7.2 General principles	64
7.3 An introduction to quantitative analysis	67
7.3.1 Checking through the data and correcting errors	67
7.3.2 Counting the responses or answers	69
7.3.3 Preparing tables and making calculations	70
7.3.4 Making sense of the data	73
7.4 Working with numbers	74
7.4.1 Counting	74
7.4.2 Averages	74
7.4.3 Percentages	75
7.4.4 Other commonly used data processing methods	75
7.5 Hints for qualitative analysis	76
7.5.1 Quantify the qualitative information	77
7.5.2 Make the plan for recording and analyzing qualitative data	78
7.5.3 Combine and compare data	79
7.5.4 Validate the findings and conclusions	80
7.6 Presentation and reporting	80
7.6.1 Visualizing the findings and conclusions	81
Glossary	84
Bibliography	87

Table of Contents for Part II

Preface	v
Chapter 1: About the Fact Sheets	1
Chapter 2: Community and its institutions: introduction	5
Informed community	7
Community participation	9
Forming committees	14
Committees function	17
Selecting poor households	20
Chapter 3: Agency, District, NGO Levels: introduction	23
Programme management	24
Policies on equity, gender, demand	27
Agency staff and supervision	30
Staff contacts with communities	34
Chapter 4: Community and Agency: introduction	39
Training	40
Gender	44
Finance: introduction	51
Estimating costs of water	53
Water tariffs	59
Billing, collection and cost recovery	64
Transparency, honesty, and efficiency in finance	69
Chapter 5: Establishment of water services: introduction	73
Site selection and access	74
Construction quality and timing	80
Water quality	83
Reliability and functionality	89
Chapter 6: O&M for water facilities: introduction	95
Community O&M reporting system	98
Minor repairs and maintenance	101
Major repairs	107

Chapter 7: Latrines: introduction	111
Demand for latrines	113
Latrines: cost control	115
Quality of latrine construction	118
Chapter 8: Use of facilities and hygiene behaviour: introduction	123
Use of safe water sources	128
Quantity of water used	132
Handwashing and bathing	135
Keeping water clean from source to mouth	138
Domestic hygiene	140
Latrine use and maintenance	143
Chapter 9: Costs and benefits	147
Bibliography	151

IRC International Water and Sanitation Centre

Access to water and sanitation are basic human rights. IRC's mission is to help people in developing countries to get the best water and sanitation services they can afford. Working with partners in developing countries, we aim to strengthen local capacities by sharing information and experience and developing resource centres. We emphasize the introduction of communication, gender, participation, community management and affordable technologies into water and sanitation programmes.

IRC's work focuses on the needs of developing countries in Africa, Asia and Latin America. In each region we work with partner institutions in selected countries to develop new approaches, ranging from empowering communities to make informed choices, to helping governments facilitate the process of development rather than construct and provide systems.

In a process of joint learning, local capacities are built in subject areas linked to those areas of IRC's expertise for which there is a local demand.

Partner organizations receive support in the development of skills related to documentation and information, publication, research, training, advisory services and advocacy.

IRC is an independent, non-profit organization supported by and linked with the Government of the Netherlands, the United Nations Development Programme, the United Nations Children's Fund, the World Health Organization, the World Bank, and the Water Supply and Sanitation Collaborative Council.

Danish International Development Assistance (Danida)

Danida, within the Danish Ministry of Foreign Affairs, is responsible for Danish development assistance to a number of countries in Africa, Asia and Latin America.

Danida works with governments, international and national non-governmental organizations, the private sector and institutions such as the World Bank, the European Commission, UN agencies and other global, regional and national development organizations. Poverty orientation constitutes a fundamental principle of Danish development assistance.

The poverty reduction strategy of the Danish development assistance can be condensed into the three following main points: i) the promotion of sustainable and socially balanced economic growth; ii) the promotion of education and health services as prerequisites to the development of human resources; and iii) promoting popular participation in the development process, the development of a society based on the rule of law and good governance being prerequisites to stability and economic, social and political progress.

Danida provides financial and technical assistance through sector programme support and projects within agriculture; natural resources management; water resources management; forestry; fisheries; environment; health; education; water supply and sanitation; infrastructure and roads; energy; democratization, public administration and good governance.
