WATERMATEX 2000

Selected Proceedings of the 5th IWA International Symposium on Systems Analysis and Computing in Water Quality Management, held in Gent, Belgium, 18–20 September 2000

Issue Editors: P A Vanrolleghem* and P Lessard‡

*BIOMATH Department, Ghent University, Gent, Belgium

Contents

vii **Preface**

1 **Hybrid neural modelling of an anaerobic digester with respect to biological constraints** A. Karama, O. Bernard, J.L. Gouzé, A. Benhammou and D. Dochain

9 **Modelling of activated sludge acclimisation to a non-ionic surfactant** G. Carvalho, I. Nopens, J.M. Novais, P.A. Vanrolleghem and H.M. Pinheiro

19 **A new approach towards modelling of the carbon degradation cycle at two-stage activated sludge plants** S. Winkler, H. Müller-Rechberger, O. Nowak, K. Svardal and G. Wandl

29 **Adequate model complexity for scenario analysis of VOC stripping in a trickling filter** H. Vanhooren, T. Verbrugge, G. Boeije, D. Demey and P.A. Vanrolleghem

39 **Modelling and simulation of the steady-state of secondary settlers in wastewater treatment plants** I. Queinnec and D. Dochain

47 **Development and evaluation of a mathematical model for the study of sediment-related water quality issues** W. Zeng and M.B. Beck

55 **LANDFLOW: a 3D finite volume model of combined free and porous flow of water in contaminated land sites** D.B. Das and V. Nassehi

65 **Evaluation of pH inhibition effect on activated sludge by the pseudo toxic concentration (C_{pT}) concept model** J.H. Ko, K.S. Choi, H.J. Woo, H.I. Lee and C.W. Kim

73 **Modeling of a reactive primary clarifier** K. Gernaey, P.A. Vanrolleghem and P. Lessard

83 **Long term pollution simulation in combined sewer networks** B. Masse, M. Zug, J.P. Tabuchi and B. Tisserand

91 **Automated monitoring of activated sludge in a pilot plant using image analysis** M. da Motta, M.N. Pons and N. Roche

97 **On-line variable biomass measurement and estimation of the specific growth rate of activated sludge from municipal wastewater treatment** E.J. November and J.F. Van Impe

105 **Automatic buffer capacity model building for the purpose of water quality monitoring** L. Van Vooren, M. Van De Steene, J.-P. Ottoy and P.A. Vanrolleghem

115 **Software sensor design for COD estimation in an anaerobic fluidized bed reactor** C. Aubrun, D. Theilliol , J. Harmand and J.P. Steyer

123 **Global predictive real-time control of Quebec Urban Community's westerly sewer network** M. Pleau, G. Pelletier, H. Colas, P. Lavallée and R. Bonin

131 **Operational control of storm sewage at an activated sludge process** J. Chen and M.B. Beck

139 **Parameter optimisation of real-time control strategies for urban wastewater systems** M. Schütze, D. Butler and M.B. Beck

147 **Supervisory control of wastewater treatment plants by combining principal component analysis and fuzzy c-means clustering** C. Rosen and Z. Yuan

157 **Application of mathematical tools to improve the design and operation of activated sludge plants. Case study: the new WWTP of Galindo-Bilbao Part I: Optimum design** A. Rivas, E. Ayesa, A. Galarza and A. Salterain

167 **Application of mathematical tools to improve the design and operation of activated sludge plants. Case study: the new WWTP of Galindo-Bilbao Part II: Operational strategies and automatic controllers** A. Galarza, E. Ayesa, M.T. Linaza, A. Rivas and A. Salterain

175 **Advanced monitoring and control of anaerobic wastewater treatment plants: software sensors and controllers for an anaerobic digester** O. Bernard, M. Polit, Z. Hadj-Sadok, M. Pengov, D. Dochain, M. Estaben and P. Labat

183 **Advanced monitoring and control of anaerobic wastewater treatment plants: fault detection and isolation** J-Ph. Steyer, A. Genovesi and J. Harmand

191 **Advanced monitoring and control of anaerobic wastewater treatment plants: diagnosis and supervision by a fuzzy-based expert system** A. Puñal, J. Rodríguez, A. Franco, E.F. Carrasco, E. Roca and J.M. Lema

199 **System analysis for optimal control of a wastewater treatment benchmark** D. Vrečko, N. Hvala, J. Kocijan and M. Zec

207 **Closed-loop identification and control application for dissolved oxygen concentration in a full-scale coke wastewater treatment plant** C.K. Yoo, J.H. Cho, H.J. Kwak, S.K. Choi, H.D. Chun and I. Lee

215 **Model system for the management of nitrogen leaching at the scale of river basins and regions** F. Wendland, R. Kunkel, A. Grimvall, B. Kronvang and D.I. Müller-Wohlfeil

223 **A georeferenced river quality model** S. Marsili-Libelli, E. Caporali, S. Arrighi and C. Becattelli

231 **Georeferenced regional simulation and aquatic exposure assessment** M. Matthies, J. Berlekamp, F. Koormann and J-O. Wagner

239 **Ecological concern as a factor in the optimal attenuation of diverse stressor sources in a stream** S. Jooste

247 **Development of an effluent discharge policy for the Tay Estuary based on a finite element model** S. Passone, D.B. Das and V. Nassehi

257 **Use of fuzzy method to estimate river nutrient loads from scarce observation** K. Buzás

265 **Developing a model based decision support tool for the identification of sustainable treatment options for domestic wastewater** A.J. Balkema, H.A. Preisig, R. Otterpohl, A.J.D. Lambert and S.R. Weijers

271 **Identification of model structure for aquatic ecosystems using regionalized sensitivity analysis** O.O. Osidele and M.B. Beck

279 **Improving uncertain nutrient load estimates for Lake Balaton** A. Clement

287 **Development of a risk assessment based technique for design/retrofitting of WWTPs** D. Rousseau, F. Verdonck, O. Moerman, R. Carrette, C. Thoeye, J. Meirlaen and P.A. Vanrolleghem

295 **Sensitivity analysis and calibration of the parameters of ESWAT : application to the River Dender** V. Vandenberghe, A. van Griensven and W. Bauwens

301 **Fast, simultaneous simulation of the integrated urban wastewater system using mechanistic surrogate models** J. Meirlaen, B. Huyghebaert, F. Sforzi, L. Benedetti and P. Vanrolleghem

311 **Ranking stormwater control strategies under uncertainty: the River Cam case study** S. Duchesne, M.B. Beck and A.L.L. Reda

321 **Integral water quality modelling of catchments** A. van Griensven and W. Bauwens

329 **Identifiability and uncertainty analysis of the River Water Quality Model No. 1 (RWQM1)** P. Reichert and P. Vanrolleghem

339 **A numerical identifiability test for state-space models – application to optimal experimental design** M.E. Hidalgo and E. Ayesa

347 **Practical identifiability of model parameters by combined respirometric-titrimetric measurements** B. Petersen, K. Gernaey and P.A. Vanrolleghem

357 **Parameter estimation procedure for complex non-linear systems: calibration of ASM No.1 for N-removal in a full-scale oxidation ditch** A. Abusam, K.J. Keesman, G. van Straten, H. Spanjers and K. Meinema

367 **A systematic approach to error isolation in computerized wastewater simulation models** J.A. Lennox, Z. Yuan and J. Harmand

377 **An overview of the posters presented at Watermatex 2000. I. New models/integrated urban wastewater systems/time series analysis** B. De Clercq, J. Meirlaen, F. Verdonck and P.A. Vanrolleghem

381 **An overview of the posters presented at Watermatex 2000. II. Sensor/monitoring, control and decision support systems** E.I.P. Volcke, L. Clement, M. Van De Steene and P.A. Vanrolleghem

387 **An overview of the posters presented at Watermatex 2000. III: Model selection and calibration/optimal experimental design** I. Nopens, L.N. Hopkins and P.A. Vanrolleghem
