

Minimising Risk from Cryptosporidium and other Waterborne Particles

Selected Proceedings of the International Conference on Minimising Risk from Cryptosporidium and other Waterborne Particles, held in Paris, France, 19–23 April, 1999.

Issue Editors: M Rapinat and E Weitz

Generale des Eaux – Vivendi, Paris, France

Publishing

Contents

- 1 **Risk assessment model for a waterborne outbreak of cryptosporidiosis** P. Gale
- 9 **The effect of preozonation on microorganism and particle removal**
J.Y. Gaubert, C. Piet, D. Gatel, P. Bonne, J. Hutchison and J. Cavard
- 17 **Performance testing and operational experience of a Fibrotex plant installed to treat a 40 MI/d groundwater source** J. Hutchison, D. Horner and G. Pearce
- 23 **Impact of purification procedures on the viability and infectivity of *Cryptosporidium parvum* oocysts** T.R. Slifko, A. Coulliette, D.E. Huffman and J.B. Rose
- 31 **Impact of a wastewater treatment plant on *Cryptosporidium* oocysts and *Giardia* cysts occurring in a surface water** E. Carraro, E. Fea, S. Salva and G. Gilli
- 39 **Effects of ozonation and chlorination on viability and infectivity of *Cryptosporidium parvum* oocysts** T. Hirata, D. Chikuma, A. Shimura, A. Hashimoto, N. Motoyama, K. Takahashi, T. Moniwa, M. Kaneko, S. Saito and S. Maede
- 47 **Synergism in sequential disinfection of *Cryptosporidium parvum***
J.L. Rennecker, B. Corona-Vasquez, A.M. Driedger and B.J. Mariñas
- 53 **Ozonation of bromide-containing drinking waters: a delicate balance between disinfection and bromate formation** U. von Gunten and U. Pinkernell
- 61 **Bromate formation under ozonation conditions to inactivate *Cryptosporidium***
G. Amy, C. Douville, B. Daw, J. Sohn, C. Galey, D. Gatel and J. Cavard
- 67 ***Cryptosporidium* contamination hazard assessment and risk management for British groundwater sources** B.L. Morris and S.S.D. Foster
- 79 **Source and occurrence of *Giardia* and *Cryptosporidium* in Paris rivers**
V. Rouquet, F. Homer, J.M. Brignon, P. Bonne and J. Cavard
- 87 **Examination of *Giardia* and *Cryptosporidium* in water samples and fecal specimens in Taiwan** B-M. Hsu, C. Huang, Y-F. Hsu and C-L.L. Hsu
- 93 **Removal of *Cryptosporidium* by high-rate contact filtration: the performance of the Prospect Water Filtration Plant during the Sydney water crisis**
P. Mazounie, F. Bernazeau and P. Alla
- 103 **An optimised and standardised test to determine the presence of the protozoa *Cryptosporidium* and *Giardia* in water**
G. Stanfield, E. Carrington, F. Albinet, B. Compagnon, N. Dumoutier, B. Hamsch, A. Lorthioy, G. Medema, H. Pezoidt, M-R. de Roubin, A. de Lohman and T. Whitmore
- 111 **Optimization of the Envirochek capsule method and immunomagnetic separation procedure for the detection of low levels of *Cryptosporidium* in large drinking water samples** A. Pezzana, Ph. Vilaginès, F. Bordet, D. Coquard, B. Sarrette and R. Vilaginès
- 119 **Inactivation of *Cryptosporidium* spp. oocysts with ozone and ultraviolet irradiation evaluated by *in vitro* excystation and animal infectivity**
Y. Kanjo, I. Kimata, M. Iseki, S. Miyayama, H. Okada, C. Banno, M. Matsumoto and Y. Shimada
- 127 **Inactivation of *Cryptosporidium parvum* oocysts and other microbes in water and wastewater by electrochemically generated mixed oxidants**
M.J. Casteel, M.D. Sobsey and M.J. Arrowood
- 135 **Enhanced particle removal in drinking water treatment plants - case studies**
P. Lipp and G. Baldauf

- 143 **UKWIR initiatives for implementing expert group recommendations to minimise *Cryptosporidium* risk in water treatment – a summary review**
T. Hall, R. Head and D. Holt
- 149 **Operation of modern day process plants – minimising *Cryptosporidium* risk**
D. Edwards
- 159 **Occurrence and separation of *Cryptosporidium* oocysts in drinking water treatment**
P. Dolejs, O. Ditrich, T. Machula, N. Kalouskova and G. Puzova
- 165 **Removal of sulphite-reducing clostridia spores by full-scale water treatment processes as a surrogate for protozoan (oo)cysts removal**
W.A.M. Hijnen, J. Willemsen-Zwaagstra, P. Hiemstra, G.J. Medema and D. van der Kooji
- 173 **Development of a mathematical model of *Cryptosporidium* inactivation by ozonation**
I. Somiya, S. Fujii, N. Kishimoto and R-H. Kim
- 181 **Development of ATP assay as a surrogate indicator of viability of *Cryptosporidium parvum* oocysts** I. Somiya, S. Fujii, N. Kishimoto and R-H. Kim
- 189 **Influence of US EPA 1622 method successive steps on the viability of *Cryptosporidium* oocysts** K. Guyot, M.F. Giraudot-Liepmann, A. Cabon, I. Riveau-Ricard, M. Lange, J.M. Delattre and E. Dei-Cas
- 197 **Enumeration of *Cryptosporidium* oocysts from surface water concentrates by laser-scanning cytometry** F. Zanelli, B. Compagnon, J.C. Joret and M.R. de Roubin
- 203 **Elimination of *Giardia* cysts, *Cryptosporidium* oocysts, turbidity and particles in a drinking water treatment plant with clarification and double filtration**
F. Ribas, A. Bernal and J. Perramón
