

Integrated Water Resources Management

Edited by

MIGUEL A. MARIÑO

*Department of Land, Air and Water Resources and
Department of Civil and Environmental Engineering,
University of California, Davis,
California 95616-8628, USA*

SLOBODAN P. SIMONOVIC

*Department of Civil and Environmental Engineering,
University of Western Ontario,
London, Ontario N6A 5B9, Canada*

A selection of papers presented at the International Symposium on Integrated Water Resources Management held in April 2000 at the University of California, Davis, California, USA.

This symposium was supported by the:

**International Commission on Water Resources Systems of the
International Association of Hydrological Sciences (IAHS)**

Contents

Preface <i>by Miguel A. Mariño & Slobodan P. Simonovic</i>	v
1 Water Resource Planning and Management	
Integrated water resources management: the requirements of the European Union, the problem of environmental impact assessment, and implementation of the sustainable development principle <i>Gert A. Schultz</i>	3
Moving down the food chain: the increasing importance of local-level water management <i>Rob De Loë</i>	13
Decision making in multi-party regional water conflicts <i>A. Adams</i>	19
Integrated modelling to manage south Florida's water resources <i>Kenneth C. Tarboton & Jayantha Obeysekera</i>	25
Consequences of the European Union Water Framework Directive for information management in its interstate river basins <i>Annemiek J. M. Verhallen, Jan Leentvaar & Gerard Broseliske</i>	31
Collaborative planning in integrated water resources management: the use of decision support tools <i>Anne Ubbels & Annemiek J. M. Verhallen</i>	37
Balancing social, economic and environmental pressures through integrated river basin management in the Cairngorm Mountains of northeast Scotland <i>Susan Walker</i>	45
Creating water management strategies for the northern part of Holland using a collaborative planning process <i>Carolien P. M. Breukers</i>	51
AQUEST: Search for improved support for decision makers in water policy development <i>Frans Van de Ven, Jan Cappon, Anne Ubbels, Harold van Waveren, Theo van Stijn & Marcel van der Tol</i>	57
WINBOS: a decision support system for deriving water management strategies for the northern part of The Netherlands <i>Arnold Hebbink</i>	63
The incorporation of integrated management in European water policy <i>Carlos Gonzalez-Anton & Carlos Arias</i>	69
Examining physical and economic efficiencies of water use through integrated economic-hydrologic water modelling <i>Ximing Cai, Claudia Ringler & Mark W. Rosegrant</i>	75
Use of the IQQM simulation model for planning and management of a regulated river system <i>Tahir Hameed & Geoff Podger</i>	83
A management modelling system which includes dynamic drainage basin and lake water quality models: the Lake Võrtsjärv, Estonia, case study <i>Ämer Bilaletdin & Tom Frisk</i>	91

An integrated model system for the management of lakes and their catchments: case study of Lake Längelmävesi, Finland <i>Tom Frisk & Ámer Bilaletdin</i>	99
Strategies for sustainable water resources management in water scarce regions in developing countries <i>Guozhang Feng</i>	107
L'aménagement intégré des ressources en eau: une réponse à la désertification <i>Aissatou Thioubou</i>	113
The Aquasave Project: an innovative water saving system in a residential building, Italy <i>Biagio Failla, Mauro Spadoni, Loredana Stante, Emanuele Cimatti & Giuseppe Bortone</i>	121
Towards a model for the integrated management of water quality in a developing South Africa <i>Elizabeth Pretorius & Gawie Du Toit de Villiers</i>	127
Capacity building for a participatory and decentralized water management model: the Guanajuato State Water Plan <i>Ricardo Sandoval-Minero</i>	133
Water resource policies in the Imperial and Mexicali Valleys <i>Maria De La Paz Carpio-Obeso & Thalia Gaona-Arredondo</i>	139
The state of water in Brazil—1999 <i>M. A. V. de Freitas, J. E. F. W. Lima & R. S. A. Ferreira</i>	145
Assessment of the sustainability of a water resources system expansion <i>Thomas Rodding Kjeldsen & Dan Rosbjerg</i>	151
 2 Conjunctive Surface Water–Groundwater Management	
Conjunctive water resource supply–demand management model of Baotou City, China <i>Xuefeng Chu, Miguel A. Mariño, Jingli Shao & Juanming Xu</i>	159
A conjunctive use model for the Tule River groundwater basin in the San Joaquin Valley, California <i>Nels Ruud, Thomas Harter & Alec Naugle</i>	167
Options for conjunctive water management to restore fall flows in the Cosumnes River basin, California <i>Jan Fleckenstein, Eriko Suzuki & Graham Fogg</i>	175
Value and modelling of conjunctive use of surface and ground waters in basin management <i>Hubert J. Morel-Seytoux</i>	183
Economic-engineering analysis of Californian water management <i>Jay R. Lund, Andrew J. Draper, Marion W. Jenkins, Kenneth W. Kirby, Brad D. Newlin, Brian J. Van Lienden, Matthew D. Davis, Pia M. Grimes, Richard E. Howitt, Kristen B. Ward & Siwa M. Msangi</i>	191
Effects of stream–aquifer interaction on stream condition in an alluvial basin <i>Morihiro Harada, Yusuke Tsuge & Miguel A. Mariño</i>	197
Field determination of stream–aquifer interrelations caused by intensive groundwater pumping for water right purposes <i>Juan Antonio Durán-Gonzalez & Guillermo Cabrera-Fajardo</i>	205
Water resources management in developing countries: a case study from Kuwait <i>A. Akber, E. Al-Awadi & H. Ghoneim</i>	213

3 Surface Water Management

Application of a physically-based erosion model for a large river basin in Japan <i>Celso A. G. Santos, Masahiro Watanabe & Koichi Suzuki</i>	221
Quantifying the water resources benefits of integrated reservoir planning <i>A. J. Adeloye & M. Montaseri</i>	229
Completion of hydrological data using neural networks, for reassessment of reservoirs in Vietnam <i>Trung-Dzung Nguyen</i>	237
Linking hydrology to erosion modelling in a river basin decision support and management system <i>Karl-Erich Lindenschmidt & Michael Rode</i>	243
Water yield response to integrated native forest management in southeastern Australia <i>Wayne D. Erskine</i>	249
Optimal operation of water resource systems: trade-offs between modelling and practical solutions <i>Ramesh S. V. Teegavarapu & Slobodan P. Simonovic</i>	257
Large-scale hydropower system optimization <i>Mario T. L. Barros, Joao E. G. Lopes, Shu-Li Yang & William W.-G. Yeh</i>	263
The precision of low flows estimated from rating curves: a case study from Brazil <i>R. T. Clarke & L. C. Brusa</i>	269
Relevance of geomorphology in exploitive and sustainable management of water resources in the Durance River, France <i>Robin F. Warner</i>	277
Forecasting of river flow data with a general regression neural network <i>M. N. Islam, S.-Y. Liong, K. K. Phoon & C.-Y. Liaw</i>	285
Application of the standardized precipitation index (SPI) to the Marmara region, Turkey <i>Sevinç Sirdaş & Zekai Şen</i>	291
Rain cycles for strategic water planning and management <i>J. Ian Stewart</i>	297

4 Flood Modelling

Strategic application of flood modelling for infrastructure planning and impact assessment <i>D. Alkema, A. Cavallin & M. De Amicis</i>	305
Regional flood-risk mapping and its use in land-use planning: the Region of Valencia case study <i>Felix Frances, Juan B. Marco & Angel Cayuela</i>	311
The hidden impacts of flooding: experiences from two English communities <i>Sue Tapsell</i>	319
Floods in changing streams <i>Hugo A. Loáiciga</i>	325
Risk estimation for flood and drought: case studies <i>Zongxue Xu, Kazumasa Ito & Jingyu Li</i>	333
Flood control measures in the Red River basin and numerical simulation of their operation <i>Nguyen Le Tuan & Satoru Sugio</i>	341

Flood frequency analysis downstream of the junction of two rivers
Jose A. Raynal-Villaseñor & Jose A. Raynal-Gutierrez 349

Assessment of model error in regression estimates of floods at an ungauged site
Savithri Senaratne & Conleth Cunnane 355

5 Ecosystem Management

Integrated management of the Illinois River with an emphasis on the ecosystem
Nani G. Bhowmik, M. Demissie, John C. Marlin & Jim Mick 365

Interdisciplinary modelling to assess ecosystem effects of reservoir operations
Laurel Saito, Darrell G. Fontane, Brett M. Johnson & John M. Bartholow 373

Inclusion of ecosystem concepts in integrated management of river resources
Ton Snelder, Barry Biggs & Mark Weatherhead 379

Use of a catchment–reservoir system as a method for aquatic ecosystem restoration
Elena Asabina 387

Two-dimensional fish habitat modelling for assessing instream flow requirements
Barney Austin & Mark Wentzel 393

A regional procedure to assess the risk to fish from sediment pollution in rivers
Carol D. Watts, Pamela S. Naden, David M. Cooper & Beate Gannon 401

6 Groundwater Management

Strategic groundwater resources in northern Latium volcanic complexes (Italy): identification criteria and purposeful management
Giuseppe Capelli, Roberto Salvati & Marco Petitta 411

Comparison of groundwater recharge estimation techniques: a case study from the Küçük Menderes River basin in Turkey
Arzu Gundogdu, Hasan Yazicigil & Hasan Kirmizitas 417

Contamination risk assessment for groundwater of the Küçük Menderes River basin, İzmir, Turkey
O. Tolga Pusatli, M. Zeki Camur & Hasan Yazicigil 425

The water and salt budget of an irrigated plot in an oasis in southern Tunisia
Brahim Askri, Rachida Bouhlila & Jean Olivier Job 431

Key word index 439
