Water Resources Management

EDITORS

C.A. Brebbia
Wessex Institute of Technology, UK

P. Anagnostopoulos
Aristotle University of Thessaloniki, Greece

K. Katsifarakis
Aristotle University of Thessaloniki, Greece

A.H-D. Cheng
University of Delaware, USA

WIT PRESS Southampton, Boston

Contents

Section 1: Decision support systems

Flood risk management in valleys with dams
A. Betâmio de Almeida 3

Development of a decision support system for estuarine modelling using the case based reasoning technology
S.Passone, P.W.H.Chung, V.Nassehi 15

Optimal pumping scheduling model for energy cost minimization: two different resolution methods
J. Sousa, M. da Conceição Cunha, A. Sá Marques 25

Section 2: Irrigation water management and planning

Optimal irrigated cropping pattern of a multicrop system under water scarcity constraints
E.C.Kipkorir, A.Sahli, D.Raes, E.Tollens 37

Economic evaluation of alternative irrigation systems for sugarcane in the Burdekin delta in north Queensland, Australia
M.E.Qureshi, M.K.Wegener, S.R.Harrison , K.L.Bristow 47

Irrigation water consumption through remote sensing. Comparison at different scales in Zhanghe irrigation system, China
T.Alexandridis , Y.Chemin 59

From rain to grain: A model integrated water management system
A.F.Houri 69

Section 3: River basin management

River basin management and the national water resources policy in Brazil
A.Magrini, M.A.dos Santos 79

Simulation models for water resources management in Chikugo River basin
N.Vongthanasunthorn, K.Koga, H.Araki, W.Liengcharernsit 89

Sustainable water resources management in the wider hydrological basin of Volos
N.Mylopoulos, A.Mentes, M.Karamanlidou 99

Establishment and management of riparian buffer zones in Han River basin, Korea
J.-Y. Choi 109

Section 4: Residential water management

Performance Indicators for water supply networks: a real case study
D.Borsani, S.Mambretti, E.Orsi 119

Instantaneous residential water demand as stochastic point process
R.Guercio, R.Magini, I.Pallavicini 129

Section 5: Wastewater treatment and management

A wastewater treatment plant with the reed-bed technology
P.Anagnostopoulos, V.Avgitidis, E.Katsonis 141

Waste water treatment with high solid anaerobic digestion (HSAD) process
B. Bieda, W. Wajs, E. Wnuk 149

Study on the factors affecting coagulation and flocculation in treatment of industrial effluents
I.G.Bantcheva 155

Decentralized water disposal systems to optimize the water resources management of the Lausitzer-Neisse river catchment area
M.Burde, S.Stocksieker 163

Section 6: Quality and pollution control

Uncertainty and sensitivity analysis of river water quality model parameters
A.W.M.Ng, B.J.C.Perera 175

Water quality modelling as an environmental issue
M.Radwan, P.Willems, A.El-Sadek, J.Berlamont 185

Impact of point sources and diffuse sources on stormwater quality in Orange, NSW, Australia
S.Rahman, D.A.Bakri 195

Section 7: Flow in pipes and open channels

Calibration of the water distribution network model
T.Koppel, N.Kändler, A.Vassiljev 207

Advection-dispersion transport in water distribution networks with intermittent flow
V.G.Tzatchkov, A.A.Aldama , F.I.Arreguín, S.G.Buchberger, Y.H.Lee 217

Secondary flow in a sine-generated open channel
M.F. Maghrebi 227

Section 8: Hydrological modelling

Assessing hydrological impacts facing lack of data – hydrological minimalism
J.A.Bertens, J.Weichselgartner 239

Modeling the water consumption of the sparse canopy: Operational approach
E.Personne, A.Tuzet, A.Perrier 249

Lumping process of distributed parameter runoff models based on equivalent frequency response method
L.Hamouda, M.Fujita 259

Section 9: Groundwater flow

Modelling two groundwater scenarios in an aquifer near Florence
R.C. Barros, L.R. Romanelli 271

Hydrodynamic parameter estimation in a horizontal unsaturated soil column
C.Tzimopoulos, C.Evangelides 281

ANN and GA methods to identify the non-point contamination flux to groundwater
K.Hiramatsu, E.Ichion, T.Kawachi, J.Takeuchi 291

Solving a double porosity soil characteristic curve with the quasi-Newton method (BFGS)
St. Yannopoulos, C. Tzimopoulos 301

Modelling uncertainties in the stationary seepage problem
Z.Mrabet, D.Giles 311

The Ogallala Aquifer
M. Guru, J. Horne 321

Section 10: Coastal and estuarine flow

A mathematical model for estimating the pollution exchange coefficient of small tidal embayments
R.W.Barber, M.J.Wearing 331

Study on environmental change and peculiarity of the Ariake Sea, Japan
H.Araki, K.Sato, K.Koga, H.Yamanishi, K.Ohgushi, W.Liengcharernsit 341

Section 11: Reservoirs and lakes

Deriving efficient reservoir operating rules using flexible stochastic dynamic programming
A.Tilmant, E.Persoons, M.Vanclooster 353

Experimental – numerical model interaction: example of a large dam project in Laos
Th. Mouzelard, P. Archambeau, S. Erpicum, M. Pirotton 365

Mathematical model aided investigation of hydrodynamic properties of Ulubat lake
H.Karahan 375

Sediment control in the basin of Kastoria lake
D.Tolikas, V.Hrissanthou, Y.Mylopoulos, P.Koudoumakis 385

Index of Authors 395
