

67/20341

**International Commission for the Hydrology of the Rhine Basin (CHR)**

---

**Generation of Hydrometeorological Reference  
Conditions for the Assessment of Flood Hazard in  
large River Basins**

**Papers presented at the International Workshop held  
on March 6 and 7, 2001 in Koblenz**

*Edited by:*

**P.Krahe**

**D.Herpertz**

**Bundesanstalt für Gewässerkunde, Koblenz - FRG**

**Lelystad, December 2001**

CHR-Report no. I-20

## Contents

Introduction .....	1
Conclusions from the Workshop .....	2
Agenda of the Workshop.....	5
<b>Topic 1: Approaches to the development of methods for the determination of maximised regional values</b>	
Evaluation of notable, extreme and probable maximum areal values of precipitation depth and precipitation supply in large river basins ( <i>G. Malitz</i> ) .....	9
Spatial and temporal patterns of precipitation fields of extreme events in Switzerland and concepts for precipitation scenarios ( <i>D. Grebner</i> ) .....	21
<b>Topic 2: Estimation and classification of spatial/temporal patterns of extreme precipitation</b>	
Spatio-Temporal Structure of Precipitation during Flood Events in the Moselle Basin ( <i>A. Helbig</i> ) .....	33
InterNied - A geostatistical interpolation procedure for hourly measured precipitation data ( <i>A. Hinterding</i> ).....	41
<b>Topic 3: Modelling of extreme precipitation events of long duration (meso-scale meteorological modelling and stochastic precipitation generators)</b>	
How to use meso-meteorological models to predict cases of extreme precipitation ( <i>G. Skoda</i> ) .....	51
Precipitation scenarios from expanded downscaling ( <i>G. Bürger</i> ).....	61
Rainfall generator for the Rhine basin: multi-site simulation of daily weather variables by nearest-neighbour resampling ( <i>J.J. Beersma, T. A. Buishand, R. Wójcik</i> ).....	69
<b>Topic 4: Temporal trends of precipitation series, especially with regard to extreme behaviour and spatial development</b>	
Observed long-term precipitation trends in Central Europe and some preliminary remarks on change in extremes ( <i>C.-D. Schönwiese</i> ) .....	81
Evidence of a climate-induced change in maximum streamflow of the Alzette river (Grand-Duchy of Luxembourg) ( <i>L. Pfister, L. Hoffmann</i> ).....	89
<b>Topic 5: Application of procedures for the determination of extreme precipitation events for questions concerning hydrology and water resources management</b>	
Application of a Water Balance Model for Calculating the Impact of Extreme Rainfall Events ( <i>K.-G. Richter, M. Ebel, K. Ludwig</i> ).....	97
The Development of A Stochastic Rainfall Model for UK Flood Modelling ( <i>H.J.E. Rodda</i> ).....	107
