

# GROUNDWATER RESOURCES

OF THE WORLD

AND THEIR **USE**

*Editors*

**Igor S. Zektser  
Lorne G. Everett**

IHP-VI, SERIES ON GROUNDWATER No. 6

---

# CONTENTS

<b>1</b>	<b>Introduction</b>	<b>13</b>
<b>2</b>	<b>Groundwater as a source of public water supply and irrigation</b>	<b>17</b>
2.1	Main concepts of groundwater use	17
2.2	Importance of groundwater for water supply	20
2.3	Economic aspects of groundwater use	24
2.4	Managerial and administrative problems of groundwater development	26
2.5	Social and cultural problems of groundwater exploitation	17
2.6	Medical problems of groundwater use for drinking water supply	18
<b>3</b>	<b>Modern concepts of groundwater resources of the earth</b>	<b>34</b>
3.1	The state of knowledge of regional groundwater resources and groundwater discharge investigations	34
3.2	Environment and principals of ecological-hydrogeological zoning	40
3.3	Main regularities of fresh groundwater resource generation and distribution	43
3.4	Groundwater resources and water quality	50
3.5	Fresh groundwater protection from pollution and depletion; groundwater 'over-exploitation'	55
<b>4</b>	<b>Scientific and methodologic principals of the regional assessment of groundwater resources</b>	<b>59</b>
4.1	Methods for assessing groundwater safe yield	59
4.1.1	General aspects	60
4.1.2	General characteristics of methods for assessing groundwater safe yield	53

<b>4.2</b>	<b>Methods for the quantitative assessment and mapping of groundwater discharge to rivers, lakes and seas</b>	<b>63</b>
4.2.1	Hydrological and hydrogeological methods for estimating groundwater discharge to rivers	63
4.2.2	Analytical calculations and modeling for estimating regional groundwater discharge	71
4.2.3	Remote-sensing methods for groundwater discharge research	75
4.2.4	Methods for mapping groundwater runoff in large regions	79
4.2.5	Methods for studying and assessment of groundwater discharge to seas and lakes	85
<b>4.3</b>	<b>Principles of assessment and mapping of groundwater quality</b>	<b>91</b>
4.3.1	Groundwater quality assessment	92
4.3.2	Graphical and numerical methods of groundwater quality assessment and classification	94
4.3.3	Statistical methods of groundwater quality assessment	95
4.3.4	Groundwater chemistry presentation on maps and on cross-sections	96
<b>4.4</b>	<b>Groundwater vulnerability, assessment and mapping</b>	<b>97</b>
4.4.1	Concept and definition of groundwater vulnerability	97
4.4.2	Intrinsic parameters of groundwater vulnerability	98
4.4.3	Assessment of groundwater specific vulnerability	100
4.4.4	Methods and techniques of groundwater vulnerability assessment	101
4.4.5	Classification of groundwater vulnerability map	103
4.4.6	Limitations in use of groundwater vulnerability maps	104
<b>5</b>	<b>Fresh and brackish groundwater resources and their use on continents and in individual countries</b>	<b>107</b>
<b>5.1</b>	<b>Groundwater resources and their use in Europe</b>	<b>107</b>
5.1.1	Groundwater discharge and natural fresh groundwater resources of Europe	107
5.1.1.1	Results of groundwater runoff studies	107
5.1.2	General characteristics of fresh and brackish water use	115
5.1.3	Brief characteristics of fresh groundwater resources in some countries in Europe	121
<b>5.2</b>	<b>Groundwater resources and their use in selected countries in Asia</b>	<b>118</b>
5.2.1	The resources of fresh groundwater and their utilization in the Asia Part of the Russian Federation	121
5.2.1.1	General overview and hydrogeological zoning	121
5.2.1.2	The predictive resources of fresh groundwater	123
5.2.1.3	Developed resources of fresh groundwater	129
5.2.1.4	Groundwater withdrawal utilization	129

---

5.2.2	Groundwater use in India	131
5.2.2.1.	Introduction – Hydrogeological regions	131
5.2.2.2	Groundwater development	131
5.2.2.2.1	Background	131
5.2.2.2.2	Hard rock terrain	134
5.2.2.2.3	Alluvial terrain	135
5.2.2.3	Exploration of groundwater and resource assessment	135
5.2.2.4	Well digging/drilling, pumpage and revitalization	137
5.2.2.5	Recharge augmentation	138
5.2.2.6	Groundwater quality	139
5.2.2.7	Groundwater legislation and pumpage control	140
5.2.2.8	Research areas or gaps in existing technology	141
5.2.2.9	Tenets of groundwater policy for sustainable development	142
5.2.3	Groundwater resources and their use in China	143
5.2.3.1	General features	143
5.2.3.1.1	Topography and morphology	143
5.2.3.1.2	Climate	143
5.2.3.1.3	Hydrographic networks	144
5.2.3.1.4.	Geology	145
5.2.3.2	Groundwater resources of China	145
5.2.3.2.1	An outline of regional hydrogeology	145
5.2.3.2.2	Groundwater resources evaluation and their distribution in China	146
5.2.3.2.3	Groundwater resources of some typical regions in China	148
5.2.3.3	Groundwater development and utilization	151
5.2.3.3.1	Urban water supply	151
5.2.3.3.2	Irrigation and reclamation	153
5.2.3.4	Mineral water and thermal water	157
5.2.3.4.1	Mineral water	158
5.2.3.4.2	Thermal water	158
5.2.3.5	Concluding remarks	159
5.2.4	Groundwater resources and their use in Japan	159
5.2.4.1	Groundwater exploitation and the present subjects	160
5.2.4.1.1	Water balance	160
5.2.4.1.2	Use of groundwater in Japan	161
5.2.4.2	Threat to groundwater quality in Japan	166
5.2.4.2.1	Introduction	166
5.2.4.3	Outlook of groundwater contamination in Japan	168
5.2.4.3.1	An example of groundwater pollution by nitrate	168
5.2.4.3.2	Remediation schemes	170
5.2.4.3.3	What the Japanese geotechnical engineers are discussing at present	171
5.2.4.4	Remediation of hydrologic cycle in urban areas	172
5.2.4.5	Conclusion	174

---

<b>5.3</b>	<b>Groundwater resources and their use in North America</b>	<b>175</b>
5.3.1	Introduction	175
5.3.2	Geology	175
5.3.3	Major aquifers	177
5.3.4	Groundwater use	183
5.3.5	Effects of groundwater development	184
5.3.6	Groundwater quality	186
5.3.7	Concluding remarks	179
<b>5.4</b>	<b>Groundwater resources and their use in South America, Central America and the Caribbean</b>	<b>189</b>
5.4.1	Introduction	189
5.4.2	Environment and climate features	191
5.4.3	Groundwater resources withdrawal and use	202
5.4.4	Groundwater resources management and its sustainability	207
5.4.5	Conclusions	208
<b>5.5</b>	<b>Groundwater resources and their use in Africa</b>	<b>209</b>
5.5.1	Regional geology	209
5.5.1.1	Major aquifers	211
5.5.2	Water resources	214
5.5.3	Hydrogeology of Africa, major basins	216
5.5.3.1	The Nubian Basin	219
5.5.3.2	The Sahara Basin	223
5.5.3.3	The Chad Basin	224
5.5.3.4	The Niger Basin	225
5.5.3.5	The Toudeni Basin	226
5.5.3.6	The Congo Basin	227
5.5.3.7	The Kalahari Basin	228
5.5.3.8	The Karroo Basin	230
5.5.3.9	The Coastal Basins	232
5.5.4	Groundwater use	234
<b>5.6</b>	<b>Groundwater resources and their use in Australia, New Zealand and Papua New Guinea</b>	<b>237</b>
5.6.1	Main aquifers of Australia	238
5.6.2	Groundwater assessment	256
5.6.3	Total groundwater use	257
5.6.4	Groundwater pollution	257
5.6.5	Groundwater management, artificial recharge	259
5.6.6	Future groundwater use and sustainability	260
5.6.7	Main aquifers, groundwater use and management of New Zealand	261
5.6.8	Main aquifers, groundwater use and management of Papua New Guinea	268

---

<b>6</b>	<b>General characteristics of groundwater resources of the Earth</b>	<b>277</b>
6.1	Quantitative characteristics of the groundwater contribution to the water balance and total water resources	277
6.2	Groundwater contribution to the water and salt balance of seas and oceans	280
6.3	Predictive evaluation of possible changes in groundwater flow under the effect of climate changes and the human impact	285
6.4	Human activities impact on groundwater resources and their use	275
6.4.1	Groundwater withdrawal by well fields	292
6.4.2	Mineral deposits mining	293
6.4.3	Civil and industrial construction, engineering facilities operation	294
6.4.4	Rural development	295
6.4.5	Hydraulic structure and other power facilities	295
6.4.6	Forecasting of changes in groundwater resources under human induced factors	296
<b>7</b>	<b>Mineral and thermal-power water</b>	<b>298</b>
7.1	Mineral water	298
7.2	Thermal-power water	301
7.3	The utilization of thermal water	304
<b>8</b>	<b>Groundwater management</b>	<b>311</b>
8.1	Main factors aiding and constraining groundwater management	311
8.2	Socio-economic conditions: management objectives and agents	313
8.3	Decision-making criteria and constraints	315
<b>9</b>	<b>Conclusion</b>	<b>319</b>
	<b>References</b>	<b>321</b>
	<b>Appendix: List of tables and figures</b>	<b>345</b>
