

# NORTH-WESTERN SAHARA AQUIFER SYSTEM

Joint Management of a Transborder Basin

1st edition

**SYNTHESIS REPORT**  
**- JANUARY 2003 -**

SAHARA AND SAHEL OBSERVATORY

## TABLE OF CONTENTS

<b>PREFACE</b>	<b>19</b>
<b>SUMMARY</b>	<b>12</b>
<b>INTRODUCTION</b>	<b>16</b>
<b>PART ONE: KNOWLEDGE OF THE NORTH-WESTERN SAHARA AQUIFER SYSTEM</b>	<b>18</b>
<b>I. DEFINITION OF THE NORTH-WESTERN SAHARA AQUIFER SYSTEM</b>	<b>19</b>
I. 1. Geological facies of the North-Western Sahara	19
I. 2. Lithostratigraphic correlations	24
I. 3. Structure of the Saharan multilayer	26
<b>II. HYDROLOGICAL CHARACTERISTICS OF THE NORTH-WESTERN SAHARA</b>	<b>28</b>
II. 1. Precipitation in the NWSAS domain	28
II. 2. Surface runoff in the catchments of the NWSAS	28
II. 3. Aquifer recharge areas	29
<b>III. DATABASE AND GEOGRAPHICAL INFORMATION SYSTEM</b>	<b>32</b>
<b>IV. HYDRODYNAMIC CHARACTERISATION OF THE NWSAS</b>	<b>37</b>
IV. 1. Plotting the piezometric map of the IC	37
IV. 2. Piezometric map of the TC	37
IV. 3. Spatial distribution of transmissivities	39
IV. 4. Storage coefficients	39
<b>V. TRENDS IN ABSTRACTUION AND LEVELS OF THE NWSAS</b>	<b>40</b>
V. 1. Abstraction time-series	40
V. 2. Time-series of piezometric levels	41
<b>VI. HYDROGEOCHIMICAL CHARACTERISTICS OF THE NWSAS</b>	<b>44</b>
VI. 1. Chemical quality of the water	44
VI. 2. Integrating isotopic data into the hydrodynamic map	46

<b>PART TWO:</b>	
<b>PREPARATION AND EXPLOITATION OF THE MATHEMATICAL MODEL</b>	<b>48</b>
<b>I. CONSTRUCTING THE MODEL OF THE NWSAS</b>	<b>49</b>
I. 1. Background to the construction of the NWSAS Model	49
I. 2. General structure of the Model	50
I. 3. Extent and boundaries of the layers	51
I. 4. Spatial discretisation of the mathematical model	53
I. 5. The simulation software	54
I. 6. Boundary conditions	54
I. 7. Initial hydraulic parameters	57
<b>II. CALIBRATING THE NWSAS MODEL</b>	<b>58</b>
II. 1. Main calibration stages	58
II. 2. Calibrating the Model in steady state	60
II. 3. Calibrating the Model in transient state	62
<b>III. PERFORMING THE EXPLORATORY SIMULATIONS</b>	<b>67</b>
III. 1. Definition of exploratory simulations	67
III. 2. Results of the exploratory simulations	69
III. 3. Analysis of the simulation results	72
<b>IV. THE NWSAS MICRO-MODEL</b>	<b>76</b>
IV. 1. The reason for a miniaturised model	76
IV. 2. Influence functions and influence coefficients	77
IV. 3. Matrix of influence coefficients	78
IV. 4. NWSAS exploitation: objectives and constraints	80
<b>V. PREDICTIVE SIMULATIONS</b>	<b>82</b>
V. 1. Definition of NWSAS exploitation scenarios	82
V. 2. Results of predictive simulations	82
V. 3. Conclusion on the predictive simulations	91

93	<b>RISK CONTROL AND JOINT MANAGEMENT OF THE AQUIFER SYSTEM</b>
94	<b>I. STAKES AND RISKS OF NWSAS EXPLOITATION</b>
95	• The Chotts
97	• Other sources of salt contamination
98	<b>II. KNOWLEDGE OF THE SYSTEM AND REPRESENTATIVENESS OF THE MODEL</b>
98	II.1. Knowledge of structural parameters of the aquifer system
102	II.2. Knowledge of parameters of water demand
104	<b>III. INTERFERENCE FIELD AND CONSULTATION FACILITIES</b>
106	<b>IV. PRODUCTION OF MONITORING-EVALUATION INDICATORS: THE NWSAS OBSERVATION SYSTEMS</b>
106	IV.1. The NWSAS quality system
107	IV.2. The NWSAS piezometric network
114	<b>V. A PERMANENT CONSULTATION MECHANISM FOR JOINT NWSAS MANAGEMENT</b>
114	V.1. Possible fields of consultation
114	V.2. From the NWSAS study to plans for the consultation mechanism
116	V.3. National workshops and a regional workshop
117	V.4. Characteristics of the Consultation Mechanism
118	<b>CONCLUSIONS</b>
122	<b>BIBLIOGRAPHY</b>
