

PROCEEDINGS OF THE INTERNATIONAL SYMPOSIUM ON ENVIRONMENTAL
HYDRAULICS / HONG KONG / 16-18 DECEMBER 1991

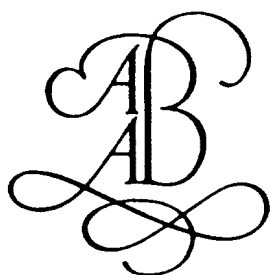

Environmental Hydraulics

Edited by

J.H.W.LEE & Y.K.CHEUNG

University of Hong Kong

VOLUME 1

A.A.BALKEMA / ROTTERDAM / BROOKFIELD / 1991

F 6812/1

Table of contents

The past and future of environmental hydraulics

Keynote lecture

- The past and future of environmental hydraulics as applied to waste treatment and disposal in marine waters 3
D.R.F. Harleman

Near field mixing and sea outfalls

- Invited lecture: Sediment aspects of drainage and outfall design 19
Peter Ackers
- Invited lecture: The behaviour of merging plumes from an outfall diffuser 31
I.R. Wood, M.R. Davidson & C.W. Cheng
- Invited lecture: Dispersion processes important in transporting bacteria from marine sewage outfalls to bathing waters 43
D. Munro
- Invited lecture: Environmental impacts of environmental regulations for outfalls 49
Robert C.Y. Koh

Jets and plumes I

- Starting jet between confined walls 53
V.H. Chu & W.D. Baines
- Prediction of inclined starting plumes 59
Juichiro Akiyama & Masaru Ura
- Plume definition in regions of strong bending 65
W.E. Frick, C.G. Fox & D.J. Baumgartner
- Heated jets with three-dimensional trajectories 71
Valiant Cheung & Joseph H.W. Lee

Buoyant jet rise in a calm, linearly stratified environment <i>Jing-Chang Chen</i>	77
Calculation of whole field for buoyant jet in static environment <i>Li Wei & Huai Wenxin</i>	85
Laboratory model studies of vertical round buoyant jets in shallow cross flows <i>P.A.Davies, L.A.Mofor & G.X.Hua</i>	91
Turbulent buoyant jets in flowing ambients <i>H.B.Chen, T.Larsen & O.Petersen</i>	97
An analytical model for predicting the height of plume rise and dilution from a line source discharge <i>Peter M.Tate & Jason H.Middleton</i>	103
Wave effects on the mean flow characteristics of turbulent round jets <i>J.M.Chyan, H.H.Hwung & Y.H.Chang</i>	109
Penetration of a submerged round jet into a counter-flowing current <i>K.M.Lam</i>	115
Qualitative and quantitative flow visualization on the near-field of multiple-jet <i>Zuo Dongqi, Yan Zhongmin & Tang Hongwu</i>	121
Radial buoyant jets and hydraulic behaviours of diffuser with automatic adjusting ports <i>Z.-R.Guo, W.-Q.Jiang & Y.-Y.Chen</i>	127
 <i>Thermals</i>	
Swarms of coarse particles falling through a fluid <i>J.Bühler & D.A.Papantoniou</i>	135
The influence of density on thermal motion <i>M.J.V.Neves & P.D.Almeida</i>	141
Diffusion process of turbidity in direct dumping of soil <i>M.Tamai, A.Murota & K.Muraoka</i>	147
Experiments on advected line thermals <i>Chuen-fai Wong & Joseph H.W.Lee</i>	153
 <i>Air bubble plumes</i>	
Rising velocity of air bubbles in high speed free surface flows <i>A.R.Zarrati & J.D.Hardwick</i>	161
Interacting bubble plumes: The effect on aerator design <i>D.M.Robertson, S.G.Schladow & J.C.Patterson</i>	167
A design methodology for bubble plume destratification systems <i>S.Geoffrey Schladow</i>	173

Jets and plumes II

- Invited lecture: Some features of intake-outlet planning and their thermo-hydraulic behaviors 181
Chen Huiquan, Yue Juntang & Chen Yanru
- An experimental study on buoyant surface jets 193
F.Gao, H.Yamaji & N.Shuto
- Numerical modelling of the near field of side discharge into tidal flow in an open channel (II) 199
Z.F.Yang, G.Q.Chen & J.H.Wu
- Solving temperature field in a turbulent buoyant recirculation flow due to discharged hot water by the direct iteration method of cubic spline 205
Lin Luo, Wenqian Zhao & Jia Li
- Application of K- ϵ model for near field flow in shallow lakes 211
Zhou Xue-Yi, Ding Yan & Yu Chang-Zhao
- Finite element computation of temperature difference jet with k- ϵ turbulent model 217
Tang Hansong & Zheng Bangming
- The study on the dilution of pure jet in a current 223
Xu Liang
- Application of digital image processing technique in environmental hydraulics 229
L.X.Wang & C.Z.Yu
- Turbulent jet into open channel flow 235
Zhu Guangcui

Ocean outfalls I

- Ocean outfall performance performance monitoring 243
Angus D.Gordon & Peter W.Fagan
- Cross-shelf variability of coastal currents at Sydney 249
W.L.Peirson, D.A.Brown & G.D.Tong
- Monitoring of deepwater effluent plumes using remote sensing techniques 255
Mark Howden & Rodger Tomlinson
- Verification of plume models applied to deepwater outfalls 261
B.Cathers & W.L.Peirson

Ocean outfalls II

- Laboratory studies of saline intrusion, salt wedge formation and sediment deposition in long-sea outfalls 269
R.Burrows, K.H.M.Ali & A.E.Wose
- Optimal design of ocean outfalls 275
D.L.Wilkinson

The hydraulics of major immersed tube and tunnel outfalls <i>P.Neville-Jones</i>	281
Discharge of tanker ballast water: A regulatory compliance analysis <i>J.M.Colonell, P.A.Mangarella & R.Schanz</i>	287
Dispersion studies of effluents from outfalls in New Jersey coastal waters <i>Richard I.Hires & George P.Korfatis</i>	295
Field survey and monitoring program on the three outfalls in the vicinity of Kaohsiung coastal area <i>Y.F.Chen, S.Y.Fu, H.H.Hwung & C.G.Wen</i>	301
Physical and mathematical model studies of pure jet in cross flows: River outfall for Changzhou <i>Wei Heping</i>	307
Application of computer programs for preliminary assessment of a submarine outfall for geothermal wastewaters <i>Miguel Chiong Bisnar</i>	313
 <i>Ocean outfalls III</i>	
Future site of Hong Kong's ocean outfall – A preliminary oceanographic assessment <i>E.K.M.Ho & K.W.Choi</i>	321
Hydraulic design aspects of the strategic sewage disposal scheme, Hong Kong <i>P.B.Clark, S.N.Gray & R.E.Baker</i>	327
The design of the Stage I outfall for the Hong Kong Strategic Sewage Disposal Scheme <i>R.A.Howard, J.A.Charlton & M.B.Webb</i>	335
Physical modelling of the very deep tunnelled Lema Channel outfall for the Hong Kong Strategic Sewage Disposal Scheme <i>J.A.Charlton</i>	341
 <i>Transport and mixing processes</i>	
<i>Keynote lecture</i>	
Turbulent transport of river sediments with hyperconcentration (Loess) <i>Zhang Shunong & Chen Jieren</i>	347
 <i>Basic studies on turbulent mixing</i>	
Invited lecture: Gas transfer processes at the air/water interface <i>Gerhard H.Jirka</i>	357

Pollutant mixing in wake flows behind islands in shallow water <i>Daoyi Chen & Gerhard H.Jirka</i>	371
Three-dimensional structure of turbulence and the associated secondary currents in urban rivers <i>I.Nezu & H.Nakagawa</i>	379
Study of turbulent flow structure in a 45°-bend by 3-D 2-layer model <i>Wei-lin Xu</i>	385
Mixing across sheared stratified interfaces <i>H.J.S.Fernando & P.H.Stephenson</i>	391
Turbulent feature of stratified shear flows <i>Jin Haisheng & Zhang Shunong</i>	397
Transverse diffusion rates of fluid momentum and suspended sediment near side banks <i>Syunsuke Ikeda & Norihiro Izumi</i>	403
Mixing process in open channel with vegetated region <i>T.Tsujimoto</i>	409
Turbulent structure of shear flow with spanwise roughness heterogeneity <i>A.Tominaga & I.Nezu</i>	415
Turbulent structure and suspended sediment in vegetated bed channel <i>H.Nakagawa, T.Tsujimoto & Y.Shimizu</i>	421
A numerical simulation of oscillating-grid turbulence by using the k-ε turbulence model <i>N.Matsunaga, Y.Sugihara & T.Komatsu</i>	427
Effect of waves on stream reaeration <i>Zhu Weizhen, Li Yuliang & Yu Chang-Zhao</i>	433
Turbulent coherent structure and the motion of suspended particles <i>Liang Zaichao & Liu Shihe</i>	439
 <i>Effluent mixing and dispersion</i>	
Solute mixing from river outfalls during over-bank flood conditions <i>I.Guymer, C.M.Allen & N.J.W.Brockie</i>	447
Two-dimensional time-dependent pollutant dispersion modelling <i>G.K.Luk</i>	453
Numerical study of the dispersive capacity of the bay of Brest, France towards dissolved substances <i>J.C.Salomon & M.Breton</i>	459
 <i>Mixing in open channel with storage zones</i>	
Investigation of flow circulation in a channel side pool <i>Tawatchai Tingsanchali & Banchird Chirananont</i>	467

Dynamic flushing of shoreline pockets <i>B.A.Christensen</i>	473
Pollutant transport in open channels with storage zones <i>I.W.Seo & W.H.C.Maxwell</i>	479
 <i>Longitudinal dispersion</i>	
An experimental study of dispersion in oscillatory flow <i>Bian Zhenju, Li Yuliang & Yu Chang-Zhao</i>	487
Effect of aspect ratio on longitudinal dispersion coefficient <i>K.Asai, Y.Awaya & K.Fujisaki</i>	493
Longitudinal dispersion in sediment-laden open channel flow <i>Kazuhiro Fujisaki, Hideki Hayashi, Noriyuki Yoshitake & Yoichi Awaya</i>	499
Predicting longitudinal dispersion coefficient in open-channel flows <i>Yoshiaki Iwasa & Shirou Aya</i>	505
The study of longitudinal dispersion coefficient of density current <i>Zhou Xiaode, Wang Ying & Tang Yonji</i>	511
Computation of the salinity intrusion in the Huangpu River and discussion on the longitudinal dispersion coefficient <i>Zhao Ming-hua & Zhang shu-nong</i>	517
A new improvement on Fickian dispersion model <i>Zhou Ke-Zhao</i>	523
 <i>Stratified flow</i>	
Invited lecture: Studies on internal solitons on the pycnocline <i>Timothy W.Kao & Kamal Saffarinia</i>	531
Selective withdrawal: A revisit <i>Timothy W.Kao</i>	543
Stability of mud underflows <i>J.E.Berlamont</i>	547
Selective withdrawal from two-dimensional and two-layered systems <i>M.Arita</i>	553
Experiments on two-dimensional turbid clouds on weak slopes <i>Q.Liu, J.Bühler & Th.Dracos</i>	559
Characteristics of gravity currents traveling downslope <i>Juichiro Akiyama & Masaru Ura</i>	565
On plunging phenomena of turbidity current <i>Wei-Sheng Yu & Hong-Yuan Lee</i>	571

A simplified turbulence stress/flux algebraic model and its application to stratified flows <i>Jin Haisheng & Zhang Shunong</i>	577
Computation of oil concentration distribution by the stress-flux algebraic model of oil-water two-phase turbulent buoyant flow <i>Wen-Qian Zhao, Yong-Ming Shen & Zhi-Wei Wu</i>	583
The influence of velocity profile on an entrapped saline intrusion <i>D.G.Curran & H.T.Johnston</i>	589
A simplified model for buoyancy-driven flow in dead-end channels <i>M.P.Chorian</i>	595
 <i>Sediment/water exchange</i>	
Wave-induced advective transport below a rippled sediment bed <i>K.T.Shum</i>	605
A new continuous-flow in-situ system for measurement of sediment oxygen demand <i>Kam-Shing Yung & Joseph H.W.Lee</i>	611
Mass transport from deposit to water layers <i>Masaru Ura, Juichiro Akiyama, Nobuhiro Matsunaga & Le Dinh Hong</i>	619
 <i>Sediment transport and related problems</i>	
In-situ measurements of the critical bed shear stress for erosion <i>Jerome Peng-Yea Maa, William Timothy Shannon, Changqing Li & Chang-Hee Lee</i>	627
Two-dimensional transport of resuspended, dredged sediments <i>Stuart Beck, Jeng Song Wang & Wing Lee</i>	633
Numerical modeling of unsteady sediment transport <i>L.R.P.Correia & B.G.Krishnappan</i>	639
Physical and numerical simulation of deposition patterns obtained after sand injection at flow surface <i>J.M.Tanguy, R.Frenette, G.Dhatt & M.Frenette</i>	645
Velocities in a ship's propeller wash <i>D.P.J.Stewart, G.A.Hamill & H.T.Johnston</i>	651
Characteristics of local scour and velocity distributions due to jet <i>N.M.K.Nik Hassan & R.Mat Suki</i>	657
Study on the bed variation in a meandering channel <i>Chang-ling Liu, C.L.Shieh & J.K.Hwang</i>	665
A study on a removal technique of the deposited bed material in Paldang reservoir, Korea <i>Won Hwan Lee</i>	671
The investigation on the improvement of Shibi reservoir sedimentation <i>Yu-Ping Cheng & Xu-Qing Yu</i>	677

An observational analysis for a turbulent flow in debris flow <i>Wang Yuyi</i>	683
Incipient motion criteria below circular jets <i>M.Shafai-Bajestan</i>	689
 <i>Hydrodynamic and water quality modelling</i>	
<i>Keynote lectures</i>	
Computational models as planning tools for the management of aquatic systems <i>T.J.Weare</i>	695
Shallow water equations: Recent developments of solution algorithm <i>O.C.Zienkiewicz & J.Wu</i>	703
 <i>Hydrodynamic and water quality modelling</i>	
Invited lecture: Progress in the development of numerical tools for environmental studies <i>J.M.Hervouet, G.Labadie & F.Lepeintre</i>	713
Modeling of coastal hydrodynamics and water quality for the new Athens sewage sea outfall <i>G.C.Christodoulou, A.D.Andreadakis, D.G.Christoulas & G.K.Noutsopoulos</i>	729
Simulation of multiple plumes using Lagrangian diffusivities: Comparison with satellite data, Niagara Area, Lake Ontario <i>D.C.L.Lam, I.Wong, R.P.Bukata, J.H.Jerome & D.A.Swayne</i>	735
Water quality modelling in coastal waters using an implicit QUICK difference scheme <i>R.A.Falconer & Y.P.Chen</i>	741
Numerical models of sewage dispersion and statistical bathing water standards <i>Ole Petersen & Torben Larsen</i>	747
Numerical modeling of 3-D tidal transport in Elliott Bay <i>J.-Y.Liou & W.-S.Chu</i>	753
Modelling pollution in stratified tidal flows <i>J.M.Maskell</i>	759
Long-term water quality transport simulations for Chesapeake Bay <i>M.S.Dortch</i>	765
Thirty-year simulation of Chesapeake Bay dissolved oxygen <i>C.Cerco & T.Cole</i>	771
Numerical environment models and their application to Jiaozhou Bay environment management <i>Wang Huatong, Feng Shizuo & Zhang Shuzhen</i>	777
Random walk simulations of the dispersal of dredged spoil <i>C.T.Mead & J.G.Rodger</i>	783

Numerical study of oil pollution on sea region <i>Geng Zhaoquan, Zhou An'guo & Ni Yongqiang</i>	789
On the modelling of shear dispersion in a coastal region <i>G.D.Tong, U.Svensson & C.King</i>	795
A study on the dynamics of near-shore recirculation <i>G.D.Tong, C.King & B.Cathers</i>	803
 <i>Hydraulic and water quality model studies</i>	
Invited lecture: The influence of hydraulic phenomena on the coastal environment <i>N.V.M.Odd</i>	813
Hybrid approach and computer controlled model of sea outfall in tidal current field with three open boundaries <i>Zuo Dongqi & Yu Guoqing</i>	821
Control and instrumentation on a physical model of Hong Kong harbour <i>I.E.Shepherd</i>	827
Application of hydraulic model test in water pollution protection and management <i>Lin Fangrong, Huang Aizhu & Wu Yadi</i>	835
A mathematical model for enteric bacteria in coastal areas <i>M.Pommepuy & J.C.Salomon</i>	841
Simulations of tidal current and pollutant diffusion in a bay <i>T.Komatsu, S.Yano, Y.Matsunaga & K.Ohgushi</i>	847
Automatic estimation of eddy viscosity for 3-dimensional coastal simulation models <i>J.E.Richardson & V.G.Panchang</i>	853
Water quality implications of Hong Kong's port and airport proposals <i>A.F.Watker & S.V.Jones</i>	859
Hydrodynamic and dispersion modelling of Swansea Bay, UK <i>E.J.Bent, L.Postma, A.Roelfzema & R.J.H.Stive</i>	865
Modelling as an environmental management tool for mariculture in Hong Kong <i>M.J.Broom, D.Johnson & J.M.Maskell</i>	871
Study of flow field and concentration field of Changzhou outfall engineering <i>Wei Heping & Rong Mei</i>	877
Numerical modelling of flow and wind induced circulation of hot water discharged into a reservoir <i>L.K.Ghosh, S.C.Patel & M.Arora</i>	883

PROCEEDINGS OF THE INTERNATIONAL SYMPOSIUM ON ENVIRONMENTAL
HYDRAULICS / HONG KONG / 16-18 DECEMBER 1991

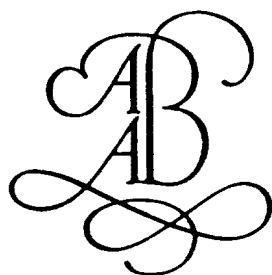

Environmental Hydraulics

Edited by

J.H.W.LEE & Y.K.CHEUNG

University of Hong Kong

VOLUME 2

F6812/2

Table of contents

Hydrodynamic and water quality modelling

Estuarine and coastal hydrodynamics – 3-D models and observations

Invited lecture: Regimes of wind-wave interaction at different fetches <i>Jin Wu</i>	891
An accurate low dissipation model of the Gulf of Mexico circulation <i>David E. Dietrich & Patrick J. Roache</i>	901
Verification of a three-dimensional hydrodynamic, salinity, and temperature model of Chesapeake Bay <i>B.H. Johnson, K.W. Kim, R.E. Heath & H.L. Butler</i>	911
Estuary plume and coastal front: A model study <i>L.-Y. Oey & K.-W. You</i>	917
The use of high resolution satellite images for coastal environmental studies <i>A.T. Webb</i>	923
Simulation of three dimensional unsteady flows in well-mixed tidal estuaries <i>G.Q. Han & D.G. Wang</i>	929
A three-dimensional semi-implicit finite-difference model for flows in stratified seas <i>H.Y. Chen & Y.S. Li</i>	937
On observed waters modified by thermohaline effects in a wide-open estuarine bay <i>S. Nakamura</i>	943
 <i>South China Sea circulation</i>	
General features of the circulation in the northern South China Sea <i>Q.Z. Huang, W.Z. Wang, Y.S. Li, C.W. Li & M. Mao</i>	951
Simulated results of the current in the South China Sea in summer <i>Li Rongfeng</i>	957

Computational hydraulics

Jet-forced reservoir flow modelling using boundary-fitted coordinate systems <i>R.W.Barber</i>	965
A new semi-implicit or explicit algorithm for shallow water equations <i>J.Wu & O.C.Zienkiewicz</i>	971
Modelling depth integrated recirculating flow in highly resisted region <i>C.W.Li & T.S.Lam</i>	977
Tidal flows in harbors with absorbing boundary conditions <i>Jiankang Wu</i>	981
Numerical modelling of storm surges in estuary areas <i>Lin Dong & Zhu Dingzin</i>	987
A depth correction equation for depth-averaged flow computations in natural rivers <i>S.B.Weerakoon, N.Tamai & Y.Kawahara</i>	993
Numerical simulation of separated flows over wavy walls <i>K.Fujima, T.Shoho, K.Hayashi & T.Shigemura</i>	999
Eddy simulation which is two dimensional in nature <i>S.Balakrishna, L.K.Ghosh & J.S.R.Murthy</i>	1005
Large amplitude long waves in channels <i>Wen-Li Chiang & David Divoky</i>	1011
Evaluation of wave hydrodynamic forces on offshore piles using finite element approach <i>T.V.Gopalakrishnan & H.Raman</i>	1017
Wave height distributions across the surf zone <i>Z.D.Zhao & H.Q.Lee</i>	1023
Tidal transport calculations with the Characteristic Galerkin method <i>K.W.Chau, J.H.W.Lee & O.C.Zienkiewicz</i>	1029
 <i>Water quality modelling</i>	
Invited lecture: Ecological models in hydraulic environment <i>Mikio Hino</i>	1037
Simulation models of eutrophication prediction for Lake Dianchi <i>Chen Yuling</i>	1051
Simulation of vertical structure of dissolved oxygen in a coastal bay <i>Joseph H.W.Lee, Y.K.Cheung & H.S.Lee</i>	1057
Unsteady water quality model with multiparameter for the river network <i>Chu Junda, Xu Huici, Ye Zude, Yao Zhenye & Shen Bing kang</i>	1063
Research on 1-D water temperature model of reservoir and temperature prediction for Heihe Reservoir <i>Li Huaien & Shen Jin</i>	1069

Nitrogen and phosphorus loads and water quality model of Miyun reservoir with carp cage culture <i>Yu Ming & Fan Ziyun</i>	1075
Telemetry system for study of dissolved oxygen dynamics in a marine fish culture zone <i>Hok-shing Lee, Joseph H.W.Lee, Y.K.Cheung & P.P.S.Wong</i>	1081
A series of river network water quality models for the water networks of Suzhou, China <i>Gao Weizhen</i>	1087
 <i>Non-point source pollution</i>	
Hydrodynamic model of urban runoff pollution <i>Wen Zhuoru & Liu Xiaojing</i>	1095
Mathematical models for assessing nonpoint source pollution impacts and control <i>John Ioannis & X.Tsiros</i>	1101
A conceptional nonpoint pollution dynamic model and its application in the Pearl River Delta <i>Chen Huaisheng</i>	1107
Urban drainage relief and pollution control plan <i>Alan Fok & Philip Cheung</i>	1113
 <i>Stochastic water quality models</i>	
Water quality forecasting using an adaptive ARMA modelling approach <i>A.W.Jayawardena & Feizhou Lai</i>	1121
A stochastic nitrogen-phosphorus model for river water quality evaluation <i>P.A.Zielinski</i>	1129
The mathematical modelling of water quality under uncertainty in a tideway <i>Huang Ping & Chen Xianchen</i>	1135
Study on total stochastic allowable loads of tidal river networks <i>Li Kiming</i>	1141
Non-Gaussian ARMA modelling and forecasting of water quality data in Hong Kong <i>A.W.Jayawardena & Feizhou Lai</i>	1147
Research predicting concentration of the pollution zone in tidal river <i>Chen Ming-zhao</i>	1155
 <i>Water quality – Miscellaneous</i>	
Prediction of water discharge and water quality of ash-stored reservoir for a coal-fired power station <i>Gu Qianpu & Shi Bin</i>	1163
The prediction and management of water quality in the reach of the Qinghe River <i>Zhang Sixin & Liu Yankai</i>	1169

Study of water quality model of heavy metal for river system <i>Zhou Xiaode & Tang Yongji</i>	1177
Storm period water quality changes in a small stream near Shek Kong, Hong Kong <i>M.R.Peart & A.W.Jayawardena</i>	1183
Changes of environmental conditions in the run-of-the river reservoir <i>M.P.Perisic & V.Mitrovic-Tutundzic</i>	1189
Initial sedimentation of waste particles in the ocean <i>F.J.Wang</i>	1197
 <i>Flow and transport modelling in rivers</i>	
Salinity intrusion in rivers in Bangladesh <i>A.E.Lasarte, P.B.K.Rasmussen & A.Hassan</i>	1205
Two-dimensional variable water-depth mathematical model for tidal flows and numerical computation for discharges of waste heat and contaminants in south estuary of Yang Zie River <i>Yu Li-ren</i>	1211
Numerical simulation of cooling water of Shantou thermal power plant <i>Li Weimin</i>	1217
Model study on flow and temperature field around urban rivers <i>S.Takewaka & S.Ikeda</i>	1225
Numerical simulation for pollutant transport in tidal river networks <i>Luigi D'Alpaos & Zhan Xiaoyong</i>	1233
Solution of simultaneous equations of one dimensional and two dimensional flows for the computation of unsteady flow in multi-outlet river system <i>Gu Zairen & Yao zhijian</i>	1239
Numerical errors in finite difference models for transport and dispersion in rivers <i>Kristian Vestergaard</i>	1245
Numerical errors of river water quality models <i>K.S.L.Lo & H.H.Chen</i>	1251
A numerical method for solving the diffusion problem in a river or open channel system <i>Nguyen Cong Dieu & Tran Gia Lich</i>	1257
 <i>Groundwater flow</i>	
Closed form modelling of groundwater mound development under line sources <i>J.Edenhofer, J.Haucke & G.H.Schmitz</i>	1265
In situ groundwater remediation of strippable contaminants by vacuum vaporizer wells (UVB): Well operation and hydraulic system <i>B.Herrling & J.Stamm</i>	1273

Study on unconfined state of previously confined aquifer <i>Masaru Morita</i>	1279
Dispersion of intruded salt water in sandy aquifer <i>Satoru Sugio</i>	1285
Finite element prediction of salt water – Fresh water interface <i>T.Kuppusamy</i>	1293
Modeling soil venting in a three fluid phase porous medium for hydrocarbon remediation <i>Jagath J.Kaluarachchi, Rainer Schulin & A.W.Jayawardena</i>	1297
New principles of mathematically modelling surface irrigation <i>Gerd H.Schmitz & Johann Edenhofer</i>	1303
Discussion on problems of numerical reverse of fissure water <i>Zhou Zhifang</i>	1311
A simple root extraction model <i>Izihan Ibrahim</i>	1317
Simple analysis for development of dry zone and evaporation in sand <i>T.Fukuhara, K.Sato & S.Bories</i>	1323
Generalization of the method of images for singularly perturbed nonlinear unsteady ground water problems in multilayer domains with moving boundaries <i>G.A.Nesenenko</i>	1329
 <i>Modelling of groundwater pollution</i>	
Modelling contaminant migration in surface and sub-surface waters <i>C.E.Reeve & A.S.Nottage</i>	1337
Modeling the salinization of groundwater in Allahabad, Pakistan <i>M.Yavuz Corapcioglu, Muhammad Ilyas & Vern Heisler</i>	1343
Mathematical integrated model for predicting groundwater contamination <i>Liu Zhaochang, Zhang Lansheng, Liu Xiang & Zhu Kun</i>	1349
Movement of pesticides in soil <i>Hanhong Mo, Kewu Yang, Fengchun An, Lianzhong Zhang, Xiaobai Xu, Dawen Yang, Shixiu Yang & Zhidong Lei</i>	1355
Prediction of groundwater pollution caused by Grand Canal in Yangzhou City <i>Xiao-xing Qian & Chao-ying Jiao</i>	1361
Soil and aquifer contamination from disposal of flyash slurry <i>Umesh C.Chaube</i>	1367
