

This report contains the collective views of an international group of experts and does not necessarily represent the decisions or the stated policy of the United Nations Environment Programme, the International Labour Organisation, or the World Health Organization.

## Environmental Health Criteria 136

# 1,1,1-TRICHLOROETHANE

First draft prepared by Dr S. Dobson,  
(Institute of Terrestrial Ecology, United Kingdom)  
and Dr A.A. Jensen (Danish Technological  
Institute)

World Health Organization  
Geneva, 1992

---

## CONTENTS

### ENVIRONMENTAL HEALTH CRITERIA FOR 1,1,1-TRICHLOROETHANE

1.	SUMMARY	13
2.	IDENTITY, PHYSICAL AND CHEMICAL PROPERTIES, AND ANALYTICAL METHODS	15
2.1	Identity	15
2.2	Physical and chemical properties	16
2.2.1	Physical characteristics	16
2.2.2	Chemical reactivity	16
2.2.3	Commercial products	16
2.3	Conversion factors	18
2.4	Analytical methods	18
3.	SOURCES OF HUMAN AND ENVIRONMENTAL EXPOSURE	20
3.1	Production processes	20
3.2	Production levels	20
3.3	Uses	22
4.	ENVIRONMENTAL TRANSPORT, DISTRIBUTION, AND TRANSFORMATION	23
4.1	Distribution and transport between media	23
4.1.1	Atmospheric transport	24
4.1.2	Transport in water	25
4.1.3	Transport in soil	25
4.2	Degradation and transformation	26
4.2.1	Abiotic degradation	26
4.2.1.1	In the atmosphere	26
4.2.1.2	In water	27
4.2.2	Biodegradation	27
4.2.2.1	Anaerobic	27
4.2.2.2	Aerobic	29
4.3	Bioaccumulation	30
5.	ENVIRONMENTAL LEVELS AND HUMAN EXPOSURE	31
5.1	Environmental levels	31
5.1.1	Air	31

5.1.2	Water	35
5.1.3	Sediment and soil	35
5.1.4	Biota	38
5.2	General population exposure	39
5.2.1	Food	39
5.2.2	Drinking-water	40
5.2.3	Air	42
5.2.4	Consumer products and cosmetics	43
5.3	Occupational exposure	43
6.	KINETICS AND METABOLISM IN LABORATORY ANIMALS AND HUMANS	45
6.1	Absorption	45
6.1.1	Animal studies	45
6.1.1.1	Inhalation	45
6.1.1.2	Oral absorption	46
6.1.1.3	Skin absorption	46
6.1.2	Human studies	46
6.1.2.1	Inhalation	46
6.1.2.2	Skin contact	47
6.2	Distribution and retention	47
6.2.1	Animal studies	47
6.2.2	Human studies	48
6.3	Metabolic transformation	49
6.3.1	Animal studies	49
6.3.2	Human studies	51
6.3.3	Metabolic interactions	51
6.4	Elimination	51
6.4.1	Animal studies	51
6.4.2	Human studies	52
6.5	Biological monitoring	52
6.6	Bioaccumulation	54
7.	EFFECTS ON LABORATORY MAMMALS AND <i>IN VITRO</i> TEST SYSTEMS	55
7.1	Acute toxicity	56
7.1.1	Irritation	59
7.1.2	Short-term exposure	59
7.1.2.1	Inhalation	59
7.1.2.2	Oral administration	61
7.2	Long-term exposure	62
7.3	Reproductive toxicity, embryotoxicity, and teratogenicity	63

---

7.4	Mutagenicity	64
7.5	Carcinogenicity	68
7.5.1	Oral administration	68
7.5.2	Inhalation	69
7.6	Immunotoxicity and sensitization	69
7.7	Interactions	70
7.8	Mechanisms of action	70
8.	EFFECTS ON HUMANS	72
8.1	Controlled human studies	72
8.1.1	Single exposure period	75
8.1.2	Repeated exposure	76
8.2	Accidental exposure	77
8.2.1	Confined spaces at workplaces	77
8.2.2	Solvent abuse	78
8.2.3	Medical use	79
8.2.4	Ingestion	79
8.2.5	Drinking-water contamination	80
8.3	Effects on the skin and eyes	80
8.4	Long-term occupational exposure	80
8.5	Interactions	81
9.	EFFECTS ON OTHER ORGANISMS IN THE LABORATORY AND FIELD	83
9.1	Microorganisms	83
9.2	Aquatic organisms	83
9.3	Terrestrial organisms	86
10.	EVALUATION OF HUMAN HEALTH RISKS AND EFFECTS ON THE ENVIRONMENT	88
10.1	Evaluation of human health risks	88
10.2	Evaluation of effects on the environment	89
11.	RECOMMENDATIONS FOR PROTECTION OF HUMAN HEALTH AND THE ENVIRONMENT	90
12.	FURTHER RESEARCH	91
13.	PREVIOUS EVALUATIONS BY INTERNATIONAL BODIES	92
	REFERENCES	93

RESUME 113

RESUMEN 116

# Sommaire

Introduction.....	7
<b>I : OCCIDENT : L'AVÈNEMENT DU TOUT-À-L'ÉGOUT</b>	
1. : La bataille historique, autour du problème central des excréments hu- mains.....	13
2. : Autres usages domestiques ou publics de l'eau (toilette du corps, lavage du linge, usages publics, « eaux grasses »).....	38
3. : De quelques déchets connexes (cadavres humains et animaux, sang des abattoirs, lactosérum, excré- ments animaux).....	52
<b>II : DES PROTHÈSES EN AVAL AUX REMÈDES A LA SOURCE</b>	
4. : La prothèse-épuraton .....	73
5. : Les hypothétiques valorisations de bout de chaîne (valorisation des boues d'épuration, utilisation du pouvoir d'engrais des eaux rési- duaires) .....	88

6. : Contre-courant (technologies propres, toilettes sans eau..., contre-culture et propositions à contre-courant) .....	107
--	-----

III : *ALTERNATIVES TIERS MONDISTES* (notamment en Asie du Sud-Est)

7. : Décennie internationale : pour un autre développement.....	147
8. : Contrepoint à l'Occident : le « modèle chinois » (biogaz, pisciculture, algoculture, agriculture urbaine) .....	173
9. : Analyse d'une situation indonésienne : Surabaya.....	194
