Copenhagen, Denmark*

Proceedings of the International Symposium held at Chengdu, China, 5-9 July 1992. The symposium was organized by the International Commission on Continental Erosion of the International Association of Hydrological Sciences and the Institute of Mountain Disasters and Environment, Academia Sinica. Co-sponsors were the International Union of Forestry Research Organizations, UNESCO, and the Chinese National Foundation of Natural Sciences.

Contents

1 Erosion and Sediment Transport

Threshold of sediment deposition in medium stream power flow <i>M. P. Bordas & J. H. Silvestrini</i>	3
Erosion resistance of cohesive sediments in turbulent flow <i>Cao Shuyou & Fang Duo</i>	15
Soil erosion studies using rainfall simulation on forest harvested areas in British Columbia <i>Paul R. Commandeur</i>	21
Erosion and sediment yield in mountain regions of the world <i>A. P. Dedkov & V. I. Moszherin</i>	29
Ten-years of sediment discharge measurement in the Jasenica research drainage basin, Yugoslavia <i>Miroљub Djorovic</i>	37
Criteria for determining the current activity of torrents in their depositional areas <i>D. Emmanouloudis</i>	41
A conceptual geomorphological model for the development of a Mediterranean river basin under neotectonic stress (Buonamico basin, Calabria, Italy) <i>P. Ergenzinger</i>	51
The use of fallout radionuclides in investigations of erosion and sediment delivery in the Polish Flysh Carpathians <i>W. Froehlich & D. E. Walling</i>	61
A new look at soil erosion processes on hillslopes in highland Ecuador <i>Carol P. Harden</i>	77
Use of caesium-137 to investigate sediment sources and sediment delivery in a small glacierized mountain drainage basin in eastern Greenland <i>B. Hasholt & D. E. Walling</i>	87
Hydrodynamic averaging of overland flow and soil erosion over rilled hillslopes <i>M. L. Kavvas & R. S. Govindaraju</i>	101
Some remarks on the determination of the sediment delivery ratio <i>E. Klaghofer, W. Summer & J. P. Villeneuve</i>	113
Erosion evaluation and prediction in mountain regions of Taiwan <i>K. F. A. Lo, S. H. Chiang & B. W. Tsai</i>	119
Using caesium-137 to assess sediment movement on slopes in a semiarid upland environment in Spain <i>A. Navas & D. E. Walling</i>	129
Improved model for bed-level changes in mountain rivers <i>T. Okabe</i>	139
Late Holocene sediment yields in small alpine and subalpine drainage basins, British Columbia <i>Phil Owens & Olav Slaymaker</i>	147

Investigation of soil erosion on terraced fields near Yanting, Sichuan Province, China, using caesium-137 <i>T. A. Quine, D. E. Walling, X. Zhang & Y. Wang</i>	155
Modelling sediment transport in arid upland basins in India <i>K. D. Sharma, R. P. Dhir & J. S. R. Murthy</i>	169
Determining the source of suspended particulate material <i>W. Symader & N. Strunk</i>	177
Effect of logging on subsurface pipeflow and erosion: coastal northern California, USA <i>R. R. Ziemer</i>	187
2 Debris Flows and Related Phenomena	
A preliminary study of the relationship between heavy rainfall and serious debris flows <i>Cai Ze-Yi</i>	201
Rheological modelling and peculiar properties of some debris flows <i>P. Coussot, A. I. Leonov & J.-M. Piau</i>	207
Debris flow behaviour – an integrated overview <i>T. R. Davies, C. J. Phillips, A. J. Pearce & X. B. Zhang</i>	217
Flow slide movements in clayey terrains of the Italian northern Apennines <i>U. Gori & G. Tonelli</i>	227
A catastrophic flood/multiple debris flow in a confined mountain stream: an example from the Schmiedlaine, southern Germany <i>C. de Jong</i>	237
A study of the relationship between deposit density and debris flow type <i>Kang Zhicheng & Wang Yuzhang</i>	247
The σ_3 -effect in the formation of rockslides <i>Li Pei & Li Tianchi</i>	253
A decade of earthflow research and inter-related studies in the North Island of New Zealand <i>M. Marden, C. J. Phillips, R. J. Jackson, X. B. Zhang & J. Ekanayake</i>	263
A mathematical model of shear debris flow <i>E. M. Mironova & V. V. Yablonskiy</i>	273
Mudflood activity in the foothills of central Asia <i>D. H. Salikhova & L. F. Liahovskaya</i>	283
Shallow landslide analysis in terrain with managed vegetation <i>R. C. Sidle & P. K. K. Terry</i>	289
Reconstructing debris flow frequency in the southern Alps back to AD 1500 using dendrogeomorphological analysis <i>H. Strunk</i>	299
An index system for delineating landslide regions <i>Wang Chenghua & Tan Wanpei</i>	307

Conversion mechanism of gravelly soil to viscous debris flow <i>Wang Ying & Zhou Bifan</i>	315
Meteorological conditions associated with severe regional debris flows in China <i>Wang Zuo-Shu</i>	325
Studies of ice-snow melt debris flows in the western Tian Shan Mountains, China <i>Wei Wenshou & Gao Cunhai</i>	329
Predicting debris-flow runout and deposition on fans: the importance of the flow hydrograph <i>Kelin X. Whipple</i>	337
Major landslides and associated rehabilitation measures in urban areas of the republic of Korea <i>Bo-Myeong Woo</i>	347
Characteristics of erosion and deposition from debris flows <i>Wu Jishan</i>	355
Debris flows in the Ukraine: some results of field and experimental studies <i>V. V. Yablonskiy, A. S. Tishchenko, A. V. Deziron & E. G. Boeva</i>	361
A discussion on the velocity of debris flow <i>Zhu Pengcheng</i>	369

3 Environmental Degradation and Protection

Reducing soil erosion associated with forestry operations through integrated research: an example from coastal British Columbia, Canada <i>S. C. Chatwin & R. B. Smith</i>	377
Development of bioengineering strategies in rural mountain areas <i>J. E. Clark & J. H. Howell</i>	387
The effectiveness of soil conservation structures in steep cultivated mountain regions of the Philippines <i>Antonio M. Daño & Florita E. Siapno</i>	399
A study of soil loss and measures for its control in the mining areas of the middle Yellow River basin <i>Fang Xuemin & Shi Mingli</i>	407
A tentative appraisal of the environmental impact of railway construction in mountain areas <i>Jiang Lasa & Niu Jingfang</i>	413
Environmental degradation in the Hercynian and Alpine-Carpathian mountain regions of Czechoslovakia <i>K. Kirchner & J. Kolejka</i>	419
The effectiveness of check dams in controlling upstream channel stability in northeastern Taiwan <i>Chiun-Ming Liu</i>	423
The effects of forest in controlling gully erosion <i>Li Zhuo</i>	429
A preliminary study of soil erosion and land degeneration <i>Niu Chonghuan & Wang Lixian</i>	439
Landslides, degradation and erosion in Hong Kong <i>M. R. Peart</i>	447

Benggang erosion in sub-tropical granite weathering crust geo-ecosystems: an example from Guangdong Province <i>Xu Jiongxin & Zeng Guohua</i>	455
An evaluation of the initial stages of natural succession on abandoned land in mountain areas <i>Yang Chenghua & An Heping</i>	465
Degradation and protection of grassland on the Qinghai-Tibet plateau <i>Yang Dingguo</i>	471
A study of land degradation and restoration in mountain environments in Liaoning Province <i>Zhao Huanchen, Li Baopin, Li Guilian & Zhao Wenjing</i>	477
