

WATER FLOW IN SOILS

Tsuyoshi Miyazaki
The University of Tokyo
Tokyo, Japan

with contributions by
Shuichi Hasegawa
National Institute of
Agro-Environmental Sciences
Tsukuba, Ibaraki, Japan

Tatsuaki Kasubuchi
Yamagata University
Tsuruoka, Yamagata, Japan

6973

Marcel Dekker, Inc.

Contents

<i>Preface</i>	<i>iii</i>
1. Soil and Water	1
I. Unit System	1
II. Structure of Soils	2
III. Retentivity of Water in Soils	6
References	12
2. Physical Laws of Water Flow in Soils	15
I. Darcy's Law	15
II. Gas-Phase Configuration in Unsaturated Soils	23
III. Infiltration	29
IV. Steady Water Flow in Soils	46
V. Transient Water Flow in Soils	51
Appendix: Method of Characteristics	62
References	63

3. Refraction of Water Flow in Soils	65
I. Refraction of Flux	65
II. Theory of Refraction of Flux	66
III. Jump Condition	69
IV. Visualization of Refractive Water Flow in Layered Soils	70
V. Verification of Refraction Theory	76
VI. Refraction and Anisotropy Coefficient	79
Appendix: The Jump Condition and Finite Element Method	87
References	92
4. Preferential Flow	93
I. Classification of Preferential Flow	93
II. General Features of Preferential Flow	95
III. Bypassing Flow	96
IV. Fingering Flow	101
V. Funneled Flow	103
References	120
5. Water Flow in Slopes	123
I. Water Balance on Slopes	123
II. Moisture Conditions in Slopes	124
III. Infiltration into Slopes	130
IV. Causes of Surface Runoff	144
V. Subsurface Flow of Water in Slopes	150
References	166
6. Water Flow Under the Effects of Temperature Gradients	169
I. Temperature Profile and Soil Water Flow in Fields	169
II. Water Vapor Flow Under a Temperature Gradient	174
III. Liquid Water Flow Under a Temperature Gradient	187
IV. Liquid Water Flow Due to Water Content Gradient, Solute Concentration Gradient, and Temperature Gradient	191
Appendix: Practical Estimation of Vapor Flux	193
References	196
7. Effects of Microbiological Factors on Water Flow in Soils	197
I. Typical Change in Permeability	197
II. Microbiological Effects on Permeability	198
III. Effects of Microbiological Factors on Water Flow in Natural Soils	203

<i>Contents</i>	<i>vii</i>
IV. Microbial Growth and Substrate Transport Model	210
References	219
8. Water Regimes in Fields with Vegetation	221
<i>Shuichi Hasegawa and Tatsuaki Kasubuchi</i>	
I. Water Balance in Fields with Vegetation	221
II. Evapotranspiration	223
III. Soil Water Uptake by Plant Roots	226
IV. Effects of Vegetation on Soil Water Regime	244
References	250
9. Heterogeneity of Soils in Fields	255
I. Heterogeneity	255
II. Representative Elementary Volume	257
III. Similar-Media Concept and Scaling	264
IV. Spatial Variability and Geostatistics	273
V. Macropores	280
References	282
<i>Index</i>	285

Library of Congress Cataloging-in-Publication Data

Miyazaki, Tsuyoshi

**Water flow in soils / Tsuyoshi Miyazaki, with contributions by
Shuichi Hasegawa, Tatsuaki Kasubuchi.**

p. cm. -- (Books in soils, plants, and the environment)

Includes bibliographical references and index.

ISBN 0-8247-8982-2

1. Soil percolation. 2. Soil physics. I. Hasegawa, Shuichi.
II. Kasubuchi, Tatsuaki. III. Title. IV. Series.

S594.M57 1993

631.4'32--dc20
