

Microbial Waterborne Pathogens

Edited by

T.E. Cloete, J. Rose, L.H. Nel and T. Ford

Publishing

Contents

<i>Preface</i>	ix
<i>Contributors</i>	xi
1 Microbial agents associated with waterborne diseases	1
<i>H. Leclerc, L. Schwartzbrod and E. Dei-Cas</i>	
1.1 Introduction	1
1.2 Waterborne diseases and aetiologic agents	2
1.3 Bacterial enteropathogens	5
1.3.1 <i>Salmonella-Shigella</i>	5
1.3.2 <i>Campylobacter</i>	5
1.3.3 <i>E. coli</i> O157:H7	6
1.3.4 <i>Yersinia enterocolitica</i>	7
1.3.5 <i>Vibrio cholerae</i>	8
1.4 Opportunistic pathogens that grow in water supplies	9
1.4.1 <i>Legionella</i>	10
1.4.2 <i>Pseudomonas aeruginosa</i>	13
1.4.3 <i>Aeromonas</i>	14
1.4.4 Non-tuberculosis mycobacteria (NTMS)	16
1.5 <i>Helicobacter pylori</i>	19
1.6 Pathogenic protozoa	20
1.6.1 <i>Giardia, Cryptosporidium</i>	20
1.6.2 <i>Cyclospora, Isospora, Microsporidia</i>	23
1.7 Viral pathogens	24
1.7.1 Hepatitis	25
1.7.2 Viral gastroenteritis	26

1.7.3	Other candidate viruses	28
1.7.4	Factors affecting viral infections	28
1.8	Gastroenteritis of undetermined aetiology	29
1.9	Endemic gastroenteritis	29
1.10	Pathogenicity and at increased risk populations	31
1.11	Conclusion	33
2	Emerging infectious waterborne diseases: bacterial agents <i>L.H. Nel and W. Markotter</i>	55
2.1	Introduction	55
2.2	Specific emerging waterborne infectious diseases caused by bacterial infection	60
2.2.1	Campylobacteriosis	60
2.2.2	Cholera	61
2.2.3	Gastritis and ulcer diseases	62
2.2.4	Haemorrhagic colitis and related complications	63
2.2.5	Legionellosis	65
2.2.6	Shigellosis	67
2.2.7	Pulmonary diseases	67
2.2.8	Dermatitis/folliculitis	68
3	Emerging infectious waterborne diseases: viral agents <i>L.H. Nel and J. Weyer</i>	78
3.1	Introduction	78
3.2	Specific emerging waterborne infectious diseases caused by viral infection	79
3.2.1	Aseptic meningitis and various acute Enterovirus syndromes	79
3.2.2	Astrovirus enteritis	82
3.2.3	Calicivirus enteritis	83
3.2.4	Hepatitis	84
4	Emerging infectious waterborne diseases: protozoan agents <i>L.H. Nel, W. Markotter and J. Weyer</i>	89
4.1	Introduction	89
4.2	Specific emerging waterborne infectious diseases caused by protozoan agents	92
4.2.1	Cryptosporidiosis	92
4.2.2	Cyclosporiasis	92
4.2.3	Microsporidia	93
4.2.4	Giardiasis	94
4.2.5	Toxoplasmosis	94
4.2.6	Amoebic encephalitis and keratitis	95
4.2.7	Isosporiasis	96
4.3	Conclusions	96

5	<i>Legionella</i>	100
	<i>W.F. McCoy</i>	
5.1	The biology	100
5.1.1	Cell biology of <i>Legionella</i>	100
5.1.2	Parasitology of <i>Legionella</i>	104
5.2	Legionellosis	109
5.2.1	Etiology and epidemiology	109
5.2.2	Pathogenicity	112
5.2.3	Clinical diagnosis and therapeutics	114
5.3	Reducing the risk of legionellosis	117
5.3.1	Global Code of Practice	118
5.3.2	Risk Assessment	121
5.3.3	Pathogen analysis	124
5.3.4	Cleaning and disinfection	128
5.3.5	Monitoring and control	128
5.4	Conclusions	131
6	The effect of climate change on waterborne disease	143
	<i>T. Scott, E. Lipp and J. Rose</i>	
6.1	Introduction	143
6.2	Climatic impacts on waterborne disease	145
6.2.1	Climate sensitive waterborne diseases	145
6.2.2	Impact of extreme events on waterborne disease	146
6.3	Cholera	148
6.3.1	Cholera: a case for ecological and climate studies	148
6.3.2	Modelling of cholera dynamics as a function of climate variability	149
6.4	El Niño	149
6.5	Knowledge gaps and directions for future research	150
7	Emerging microbiological detection techniques	155
	<i>J. Theron and T.E. Cloete</i>	
7.1	Introduction	155
7.2	Traditional versus emerging detection techniques	156
7.3	Molecular methodologies for detection of pathogenic micro-organisms	157
7.3.1	Immunological methods	157
7.3.2	Nucleic acid-based methods	160
7.3.3	Biosensors and microarray detection	165
7.4	Detection of enteric microbial pathogens in water	166
7.4.1	Enteric bacteria	166
7.4.2	Enteric parasitic protozoa	169
7.4.3	Enteric viruses	171
7.5	Molecular methodologies for microbial source tracking (MST)	173
7.6	Summary and conclusions	175

8	Future needs and priorities	187
	<i>T. Ford</i>	
	8.1 Introduction	187
	8.2 Risk assessment	189
	8.3 The pathogens	191
	8.4 The phenomenon of “new disease”	196
	8.5 Biofilms	197
	8.6 Chemicals	198
	8.7 Gene arrays	200
	8.8 Future needs and priorities – conclusion	200
9	Converting hindsight into foresight – understanding the causes of waterborne outbreaks	205
	<i>Steve E. Hrudehy and Elizabeth J. Hrudehy</i>	
	9.1 Introduction	205
	9.2 Evidence from case studies	206
	9.3 Recurring themes	211
	9.3.1 Pathogens pose the greatest risk to drinking water safety	211
	9.3.2 Robust multiple barriers are essential	212
	9.3.3 Trouble is preceded by change	212
	9.3.4 Operators must be capable and responsive	213
	9.3.5 Drinking water professionals must be accountable	214
	9.3.6 Risk management – making sensible decisions under uncertainty	214
	9.4 Summary	215
	Index	219
