

Pathogenic Mycobacteria in Water

*A Guide to Public Health Consequences,
Monitoring and Management*

Edited by

S. Pedley, J. Bartram, G. Rees, A. Dufour, J.A. Cotruvo

<i>Executive Summary</i>	<i>xv</i>
<i>List of acronyms and abbreviations</i>	<i>xxi</i>
1 Introduction	1
<i>G. Nichols, T. Ford, J. Bartram, A. Dufour and F. Portaels</i>	
1.1 Environmental Mycobacteria	1
1.2 Nomenclature and typing	2
1.3 Understanding the disease	5
1.3.1 The epidemiology of environmental mycobacteria	5
1.3.2 Risk factors	7
1.4 Pathogenic mycobacteria in water	7
1.4.1 Water supply	7
1.4.2 Recently reported cases of waterborne mycobacterial disease	8
1.5 Global Burden of Disease	8
1.5.1 Crohn disease and Johne disease	11
1.6 Control measures	12
1.7 Genomic and evolutionary perspectives	12
1.8 Key research issues	14

2	Natural ecology and survival in water of mycobacteria of potential public health significance	15
	<i>J.O. Falkinham, G. Nichols, J. Bartram, A. Dufour and F. Portaels</i>	
2.1	The ecology of environmental mycobacteria	16
2.1.1	Protozoa, helminths and insects	16
2.1.2	Infections in birds and animals	16
2.1.3	Infections in fish	17
2.2	Physiologic characteristics of <i>M. avium</i> relevant to its ecology and distribution	18
2.2.1	Physiologic characteristics of <i>M. avium</i> that are determinants of its ecology	18
2.2.2	<i>M. avium</i> physiologic ecology	20
2.3	Heterogeneity of Environmental Isolates of <i>M. avium</i>	21
2.3.1	Impact of heterogeneity on identifying sources of human infection	21
2.3.2	<i>M. avium</i> fingerprinting methods	21
2.4	Changes in the Occurrence in Mycobacterial Species	22
2.4.1	Shift of <i>M. scrofulaceum</i> to <i>M. avium</i> in cervical lymphadenitis in children	22
2.4.2	Selection of mycobacteria by disinfectants	23
2.5	Key research issues	
3	Environmental sources of <i>Mycobacterium avium</i> linked to routes of exposure	26
	<i>J.O. Falkinham</i>	
3.1	Environmental sample types yielding <i>M. avium</i>	27
3.1.1	<i>M. avium</i> in water	27
3.1.2	<i>M. avium</i> in soils	30
3.1.3	<i>M. avium</i> in aerosols, ejected droplets and dust	31
3.1.4	<i>M. avium</i> in phagocytic protozoa and amoebae	32
3.1.5	Other sources of <i>M. avium</i>	33
3.2	Impact of unidentified mycobacterial isolates	33
3.3	Environments with high numbers of <i>M. avium</i>	34
3.4	Routes of exposure	35
3.4.1	Ingestion	35
3.4.2	Inhalation	35
3.4.3	Trauma	36
3.4.4	Biofilms	36
3.5	Overlap of human and <i>M. avium</i> environments	37
3.6	Key research issues	37

4	Biology of waterborne pathogenic mycobacteria	39
	<i>G. Cangelosi, J. Clark-Curtiss, M. Behr, T. Bull and T. Stinear</i>	
4.1	Introduction	39
4.1.1	Taxonomy and terminology	39
4.1.2	Evolution and diversity of MAC	41
4.2	Mycobacterial genomes	43
4.2.1	The MAA genome	43
4.2.2	The MAP genome	46
4.2.3	Genomes of other environmental mycobacteria	47
4.3	Bacterial physiology	48
4.3.1	The cell envelope and its role in virulence and antimicrobial resistance	48
4.3.2	Morphotypic switches	48
4.3.3	Metabolism and catabolism	50
4.4	Biology of MAC in host environments	51
4.4.1	Entry and survival in host cells	51
4.4.2	MAA genes involved in intracellular life	51
4.4.3	MAP genes involved in intracellular life	53
4.5	Key research issues	53
4.5.1	Diversity	53
4.5.2	Molecular markers of virulence	54
4.5.3	Taxonomy	54
4.5.4	Evolutionary context	54
4.5.5	Genomic analysis	54
	Acknowledgements	54
5	Analytical methods for the detection of waterborne and environmental pathogenic mycobacteria	55
	<i>T. Stinear, T. Ford and V. Vincent</i>	
5.1	Introduction	55
5.2	The analysis process	58
5.2.1	Sampling	60
5.2.2	Sample storage	61
5.2.3	Sample preparation	61
5.2.4	Detection	63
5.3	Key research issues	73

6	<i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i> problem and its relation to the causation of Crohn disease	74
	<i>J. Hermon-Taylor and F.A.K. El-Zaatari</i>	
6.1	<i>Mycobacterium avium</i> subspecies <i>paratuberculosis</i>	74
6.2	MAP infection and Johne disease in domestic livestock	75
6.3	Different strains of MAP	78
6.4	MAP in wildlife and in the environment	79
6.5	Transmission of MAP from animals to humans	80
	6.5.1 In food	80
	6.5.2 In water supplies and aerosols	82
6.6	Crohn disease	83
	6.6.1 Definition	83
	6.6.2 Epidemiology, environmental factors, and inherited susceptibility to CD	85
	6.6.3 The isolated case of Iceland	87
6.7	MAP causing Crohn disease	88
	6.7.1 MAP in the inflamed gut of people with Crohn disease	89
	6.7.2 Serological recognition of MAP proteins in Crohn disease	91
	6.7.3 Response of Crohn disease to treatment with anti-MAP drugs	92
	6.7.4 Pathogenic mechanisms of MAP in Crohn disease	93
6.8	Key research issues	94
	Acknowledgements	94
7	Disseminated infection, cervical adenitis and other MAC infections	95
	<i>C.F. von Reyn, A. Pozniak, W. Haas and G. Nichols</i>	
7.1	Disseminated MAC infection	95
	7.1.1 Clinical aspects.	95
	7.1.2 Microbiology	96
	7.1.3 Epidemiology and risk factors	96
	7.1.4 Burden of disease	98
	7.1.5 Prevention and treatment	98
7.2	Cervical adenitis	99
	7.2.1 Clinical aspects	99
	7.2.2 Epidemiology and risk factors	100
	7.2.3 Morbidity/mortality	101
	7.2.4 Burden of disease	101
	7.2.5 Prevention and treatment	101
7.3	Tenosynovitis	102
7.4	Osteomyelitis and septic arthritis	102
7.5	Meningitis	103
7.6	Pancreatic infection	103

7.7	Sarcoidosis	103
7.8	Key research issues	103
8	Skin, Bone and Soft Tissue Infections	104
	<i>M.A. De Grootte and P. Johnson</i>	
8.1	Clinical aspects	105
8.1.1	<i>M. marinum</i>	105
8.1.2	Rapidly Growing Mycobacteria	107
8.1.3	<i>Mycobacterium avium</i> complex	108
8.1.4	<i>M. haemophilum</i>	109
8.1.5	<i>M. ulcerans</i>	110
8.1.6	<i>M. terrae</i>	110
8.2	Overall burden of disease	110
8.3	Distribution	111
8.4	Descriptive epidemiology	112
8.5	Risk factors	113
8.6	Causality and associated microbes	113
8.7	Key research issues	114
9	Pulmonary infection in non-HIV infected individuals	115
	<i>M.A. De Grootte</i>	
9.1	Clinical aspects	116
9.1.1	Primary and secondary pathogenic pulmonary environmental mycobacterial infection	118
9.1.2	Selected treatment issues	123
9.1.3	Selected microbiological issues	125
9.2	Overall burden of disease	126
9.3	Distribution	126
9.4	Descriptive epidemiology	127
9.5	Causality and associated microbes	128
9.6	Risk factors	128
9.7	Prevalence of asymptomatic disease	129
9.8	Key research issues	130
10	Disease Resulting From Contaminated Equipment and Invasive Procedures	131
	<i>M.A. De Grootte</i>	
10.1	Clinical aspects	132
10.1.1	General comments	132
10.1.2	Specific infections	135
10.1.3	Selected microbial factors	138

10.2	Overall burden of disease	140
10.3	Distribution	141
10.4	Descriptive epidemiology	141
10.5	Risk factors	141
10.6	Causality and associated microbes	141
10.7	Key research issues	142
11	Control, Treatment and Disinfection of <i>Mycobacterium avium</i> Complex in Drinking Water	143
	<i>M.W. LeChevallier</i>	
11.1	Introduction	143
11.2	Removal of mycobacteria by water treatment processes	145
	11.2.1 Physical removal by coagulation and filtration	145
	11.2.2 Disinfection	149
11.3	Regrowth of mycobacteria in drinking water	160
	11.3.1 Biodegradable organic matter	160
	11.3.2 Impact of water contact materials	162
11.4	Other environmental and control factors	164
	11.4.1 Temperature	164
	11.4.2 Control of free living amoebae	165
11.5	Role of distribution system recontamination	166
11.6	Key research issues	167
	Acknowledgements	168
12	Approaches to risk management in priority setting	169
	<i>T. Ford, J. Hermon-Taylor, G. Nichols, G. Cangelosi and J. Bartram</i>	
12.1	Introduction	169
12.2	Public health response	170
12.3	Management options	173
	12.3.1 Drinking/bathing water	173
	12.3.2 Recreational water	174
	12.3.3 Industrial exposure	174
	12.3.4 Institutional exposure	175
	12.3.5 The high risk groups	176
12.4	The HACCP approach to management	176
12.5	Key research issues	178
