

Scientific and Technical Report No.15

Instrumentation, Control and Automation in Wastewater Systems

Scientific and Technical Report No. 15

*Gustaf Olsson, Marinus K. Nielsen, Zhiguo Yuan,
Anders Lynggaard-Jensen and Jean-Philippe Steyer*

Contents

<i>Preface</i>	<i>ix</i>
<i>The Authors</i>	<i>xi</i>
<i>Acknowledgements</i>	<i>xiii</i>
<i>Abbreviations and Acronyms</i>	<i>xiv</i>
1 Introduction	1
1.1 Motivation	1
1.2 ICA today	2
1.3 Driving forces for ICA	3
1.4 Constraints for ICA	4
1.5 Disturbances	6
1.6 Setting the priorities	6
1.7 Overview of this Scientific and Technical Report	7
1.8 Chapter references	8
2 A Short History of ICA	8
2.1 Conferences on ICA in wastewater treatment systems	9
2.2 New challenges	16
2.3 Chapter references	16
3 Current Status of ICA in some Countries	18
3.1 Penetration of ICA into wastewater treatment	18
3.2 Assessing performance due to ICA	25
3.3 The cost of ICA implementation	32
3.4 Cost/benefit of using ICA	33
3.5 Trends in ICA	36
3.6 Chapter references	37

4	Unit Process Control in Wastewater Treatment – A General Methodology	38
4.1	Features of wastewater treatment process control	38
4.2	Control design – a general procedure	41
4.3	Levels of automation in wastewater industry	47
4.4	Chapter references	49
5	Control Strategies for the Unit Processes – Aeration and Dissolved Oxygen Control	50
5.1	Introduction	50
5.2	Controlling dissolved oxygen at a constant pre-selected set-point	51
5.3	Cause-effect analysis for DO set-point selection	53
5.4	DO set-point determination in a completely-mixed aerobic reactor	55
5.5	DO set-point determination in a plug-flow-like reactor	58
5.6	Aerobic phase-length control for intermittent systems	68
5.7	Summary	75
5.8	Chapter references	75
6	Control Strategies for the Unit Processes – Control of Sludge, Mixed Liquor and Wastewater Flows	77
6.1	Introduction	77
6.2	nitrate recirculation flow control	77
6.3	External carbon dosage control	82
6.4	SRT or sludge wastage control	91
6.5	Sludge recycling flow control	94
6.6	Step feed control	99
6.7	Wastewater equalisation tank control	105
6.8	Aeration settling tank operation	107
6.9	Chapter references	109
7	Control of Anaerobic Digestion Processes	110
7.1	Introduction	110
7.2	Control objectives	115
7.3	Example of control approaches	117
7.4	Experimental setup for comparison of control laws	118
7.5	Control of the biogas flow rate	123
7.6	Control of COD, VFA and more	146
7.7	Conclusion	156
7.8	Chapter references	156
8	Processes – Chemical Precipitation	158
8.1	Introduction	158
8.2	Chemical precipitation	159
8.3	Post precipitation	161
8.4	Pre-precipitation	167
8.5	Conclusions	169
8.6	Chapter references	170

9	Online Sensors/Analysers at Wastewater Treatment Plants	171
9.1	Introduction	171
9.2	Nutrient sensors/analysers	173
9.3	Characteristics of online sensors	177
9.4	Summary	181
9.5	Chapter references	182
10	Signal Analysis and Fault Detection	183
10.1	Information in wastewater treatment plants	183
10.2	Data screening	184
10.3	Detection	197
10.4	Summary	200
10.5	Chapter references	201
11	Plant-wide Control	202
11.1	The plant-wide perspective	202
11.2	Objectives of integrated control	205
11.3	Prediction of plant influent flow rate	207
11.4	Control by bypassing	211
11.5	Extension of plant capacity by control	
11.6	Extension of sewer system capacity by control	217
11.7	Computer control systems	219
11.8	Summary	224
11.9	Chapter references	225
	Conclusions	226
	Bibliography	228
	References	231
	Index	239
