

inland waters in the european union

ERDF

2004

CONTENTS

	Pages
1. INTRODUCTION	9
2. PHYSICAL, CLIMATIC AND BIOTIC FRAMEWORK	11
2.1. Introduction	11
2.2. Physical framework	11
2.2.1. Geography and geology	11
2.2.2. Lithology and edafology	14
2.2.3. Land use	16
2.3. Climate	18
2.3.1. Introduction	18
2.3.2. Hours of sunshine and temperature	18
2.3.3. Precipitation	21
2.3.4. Evapotranspiration	22
2.3.5. Index of aridity and humidity	22
2.4. Water bodies	23
2.4.1. Introduction	23
2.4.2. Rivers	23
2.4.3. Lakes	31
2.4.4. Reservoirs	34
2.4.5. Groundwater	34
2.4.6. Wetlands	36
2.4.7. Transitional and coastal waters	36
2.5. Biotic framework	37
2.5.1. Vegetation and bio geographical zones	37
2.5.2. Aquatic habitats and species	39
2.5.3. Biological diversity	45
2.5.3.1. Biodiversity status in Europe	45
2.5.3.2. Biodiversity in freshwater ecosystems	49
2.5.4. Biological assessment of waters	49
2.6. Global change	50
2.6.1. Introduction. The concept of Global Change	50
2.6.2. Climate change	50
2.6.2.1. Water and climate change	55
2.6.3. Territorial changes	56
3. TERRITORIAL AND SOCIO-ECONOMIC FRAMEWORK	59
3.1. Introduction	59
3.2. Land use planning and development	59
3.2.1. Characteristics and trends in the territorial development of the EU	59
3.2.2. Influence of the European Union policies for the territory management	62
3.3. Human population	63
3.3.1. Permanent population	63
3.3.2. Seasonal population	71
3.4. Economic sectors	72
3.4.1. Introduction	72
3.4.2. Agriculture and irrigation	75
3.4.3. Industry and energy	79
3.4.4. Services and tourism	85

	Pages
4. LEGAL AND INSTITUTIONAL FRAMEWORK	89
4.1. The European context	89
4.1.1. Historical, political and institutional development of the EU	89
4.1.2. European institutions	91
4.2. The legislative framework	93
4.2.1. General considerations	93
4.2.2. The Union Treaty and the water environment	94
4.2.3. EU Directives on water and Water Framework Directive	95
4.2.4. Other water related Directives and international conventions	98
4.2.4.1. Habitats Directive (92/43/EEC)	98
4.2.4.2. Birds Directive (79/409/EEC)	99
4.2.4.3. Convention on Biological Diversity	100
4.2.5. International agreements and conventions on transboundary waters	100
4.3. Organisation, institutions and legislation in EU Member Countries	103
4.3.1. Political, administrative and territorial organisation	103
4.3.2. Institutions responsible for water management	103
4.3.3. National legislation and Water Framework Directive	103
5. WATER STATUS	107
5.1. Aquatic ecosystems, habitats and species	107
5.1.1. Introduction	107
5.1.2. Water ecosystems and major habitats	107
5.1.3. Aquatic species and the Water Framework Directive	107
5.1.3.1. Phytoplankton	109
5.1.3.2. Aquatic Macrophytes	109
5.1.3.3. Phytobenthos	110
5.1.3.4. Macroalgae	110
5.1.3.5. Angiosperms	111
5.1.3.6. Benthic invertebrate fauna	111
5.1.3.7. Fish fauna	113
5.2. Hydromorphology	114
5.3. Water availability	115
5.3.1. Introduction	115
5.3.2. Natural water resources	116
5.3.3. Available water resources	123
5.3.4. Available groundwater resources	123
5.3.5. Non conventional resources: Re-use and desalination	125
5.3.6. Droughts and floods	127
5.3.6.1. Droughts	127
5.3.6.2. Floods	130
5.3.7. Impact of climate change on water resources	135
5.4. Water use	137
5.4.1. The concepts of water demand, abstraction and water consumption	137
5.4.2. Total water demand	138
5.4.3. Urban water demand and drinking water	141
5.4.4. Agricultural, industrial and energy water demand	145
5.4.4.1. Agricultural water demand	145
5.4.4.2. Industrial water demand	146
5.4.4.3. Energy water demand	148
5.4.5. Recreational demand. Aptitude for bathing waters	152
5.4.6. Water consumption	155
5.4.7. Pressures on water quantity	158
5.4.8. Impact of human activity on water quality	161
5.5. Surface and groundwater pollution	161
5.5.1. The concept of pollution. The prevention principle in groundwater	161
5.5.2. Principal sources of pollution by sectors. Point source and diffuse pollution	162
5.5.3. Priority and hazardous substances	165

	Pages
5.5.4. Surface water pollution: organic matter, nutrients, heavy metals, organic compounds, microbiological and thermal pollution	166
5.5.4.1. Organic matter in rivers	166
5.5.4.2. Nutrients	166
5.5.4.3. Acidification of surface waters	169
5.5.4.4. Heavy metals	171
5.5.4.5. Organic compounds	173
5.5.4.6. Microbiologic pollution	173
5.5.4.7. Thermal pollution	174
5.5.5. Groundwater pollution through nitrates, pesticides, heavy metals, hydrocarbons and chlorides	174
5.5.5.1. Nitrate	174
5.5.5.2. Pesticides	175
5.5.5.3. Heavy metals	175
5.5.5.4. Hydrocarbons and chlorinated hydrocarbons	175
5.5.5.5. Chlorides	176
5.6. Public Health	176
5.7. Surface and groundwater status	179
5.7.1. Introduction	179
5.7.2. Classification of water bodies	179
5.7.3. Surface water status	180
5.7.3.1. Reference conditions	180
5.7.3.2. Ecological and potential status of surface waters	181
5.7.3.3. Chemical status of surface waters	202
5.7.4. Groundwater status	206
5.7.4.1. Quantitative status of groundwater. Aquifer overexploitation	206
5.7.4.2. Chemical status of groundwater	209
6. STRATEGIES AND MEASURES	215
6.1. Introduction	215
6.2. Objectives of water protection and sustainable use	215
6.2.1. Introduction	215
6.2.2. Water protection	215
6.2.3. Sustainable water use	216
6.3. Legislative instruments	218
6.3.1. Introduction	218
6.3.2. Water protection and management	218
6.3.3. Transboundary agreements	219
6.4. Administrative instruments	219
6.4.1. Water resources planning	219
6.4.2. Water rights and licenses	222
6.4.3. Monitoring and control of water status	222
6.4.3.1. Introduction	222
6.4.3.2. Water status monitoring and control in the Framework Directive	222
6.4.3.3. The EUROWATERNET information system and the national monitoring networks	223
6.4.4. Register of protected areas	224
6.5. Economic and fiscal instruments	225
6.5.1. Introduction	225
6.5.2. Economic analysis of water use	226
6.5.3. The cost recovery principle	228
6.5.4. Water prices in different sectors	229
6.5.4.1. Agriculture sector	229
6.5.4.2. Urban sector	233
6.5.4.3. Industrial sector	235
6.5.5. Social participation in the financing of access to water use	236
6.6. Promotion of an efficient and sustainable water use	237
6.6.1. Introduction	237
6.6.2. Water works and environment	237
6.6.2.1. Introduction	237
6.6.2.2. Structural and cohesion funds	238

	Pages
6.6.2.3. Regulation through reservoirs	239
6.6.2.4. Inter-basin water transfer systems	242
6.6.2.5. Non-conventional water resources: Desalination and reuse	243
6.6.3. The conjunctive use of surface and groundwater	246
6.6.4. Management of urban, agricultural and industrial demand	246
6.6.4.1. Water conservation and demand management	246
6.6.4.2. Management of urban supplies	247
6.6.4.3. Management of agricultural demand	250
6.6.4.4. Management of industrial demand	251
6.7. Strategies for combating water pollution	252
6.7.1. Introduction	252
6.7.2. Control of urban and industrial effluents	252
6.7.3. Prevention against agricultural pollution	253
6.7.4. Sewer systems and waste water treatment plants	253
6.7.5. Discharges into seas	256
6.8. Extreme events management	257
6.8.1. Introduction	257
6.8.2. Drought management	257
6.8.3. Flood management	260
6.9. Education, information and participation	263
6.9.1. Introduction	263
6.9.2. Education about water	263
6.9.3. Access to information about water	265
6.9.4. Participation of social agents in decisions concerning water	266
6.10. Research, development and demonstration projects	268
ANNEX I. LIST OF EU WETLANDS OF INTERNATIONAL IMPORTANCE (14 AUGUST 2002)	273
ANNEX II. BIOSPHERE RESERVES 2002	285
ANNEX III. POLITICAL-ADMINISTRATIVE AND TERRITORIAL ORGANISATION	287
ANNEX IV. INSTITUTIONS AND ORGANISATIONS RESPONSIBLE FOR WATER MANAGEMENT	295
ANNEX V. NATIONAL LEGISLATION	327
ANNEX VI. BIOLOGICAL WATER QUALITY METHODOLOGIES IN EUROPEAN UNION COUNTRIES	339
ANNEX VII. NATIONAL WATER RESOURCES PLANNING	341
ANNEX VIII. NATIONAL WATER RIGHTS AND LICENSES	345
ANNEX IX. NATIONAL MONITORING NETWORKS	349
ACRONYMS AND ABBREVIATIONS	353
REFERENCES	359
LIST OF FIGURES	369
LIST OF TABLES	377
LIST OF BOXES	381
