CONTENTS

	Page
Foreword	i
Acknowledgements	v
Introduction	vii
Organization, Composition, and Availability of Annotations and Indexes	xiv
Abbreviations Used in This Text	xv
1. Review and Selected Bibliography on Mineral Deposits of Economic Importance in Carbonate Rocks	1
Esad Prohic and Fakhry A. Assaad .	
Introduction	1
The Classification of Carbonate-hosted Mineral Deposits	1
The Role of Carbonate Rocks in Accumulating Ore-forming Minerals	2
The Review of Particular Carbonate-hosted Mineral Deposits	3
Group I - Ore Minerals of Calcite Isomorphic Chain	3
Iron Ores in Carbonate Rocks	3
Manganese Ores in Carbonate Rocks	5
Phosphate Deposits in Carbonate Rocks	6
Group II - Carbonate-hosted Mineral Deposits	7
Aluminum Ores in Carbonate Rocks - Bauxites	7
Metal Sulfides Ores in Carbonate Rocks (Pb, Zn, Cu, Ag, Co, Sb, Hg, and W)	11
Problems on Origin of Carbonate-hosted (Pb, Zn, Cu, Ag, Co) Deposits	11
Barite and Fluorite Deposits in Carbonate Rocks	14
Group III - Calcrete-Type Mineral Deposit - General Classifications and Modes of Formation	15
Uranium - Vanadium Ore-Bearing Calcretes	15
References	16
2. Review and Selected Bibliography on Movement of Contaminants in Karstified Carbonate Rocks	25
Bashir A. Memon and Esad Prohic	
Introduction	25
General Approach to the Movement of Contaminants in Ground Waters and Various Models	26
Basic Equations for the Transport of Contaminants Through Permeable Rocks	27
Advection-Dispersion Equation	29
Movements of Contaminants and Ground-water Flow Through Fractured Media	31
Movement of Contaminants in Ground Water - Chemical Processes	33

CONTENTS (continued)

	Page
Transport of Contaminants Through Carbonate Aquifers	38
References	40
3. Review and Selected Bibliography on Quantitative Definition of Karst Hydrogeological Systems	51
Neven A. Kresic	
Introduction	51
Karst Hydrogeological System - Definition	51
Different Approaches	53
Water Tracing	56
Recession Hydrograph Analysis and Hydrograph Component Separation	59
Water Balance	62
Probability Distribution	63
Regression Analysis	64
Kernels (Convolution)	65
Stochastic Models of Time Series	69
Hydrogeological Methods	70
Pumping Test	70
Water Permeability Test (WPT)	72
Numeric Models	74
References	77
Bibliography of Karst Terranes	89
Indices	377

FIGURES

	Page
Fig. 1 Percents of the most common groundwater flow velocities in Dinaric karst	58
Fig. 2 A: Pairs of tracer breakthrough at Big Spring (BS) and Tangle Spring (TS);	58
B: The "hydraulic semiconductor", a structure providing a possible explanation of the anomalies in figure 16A.	58
Fig. 3 Schematic decomposition of unit hydrograph response of a karst aquifer or a system of underground channels and rock fissures	60
Fig. 4 Components of hydrograph of a karst spring	60
Fig. 5 Graphic representation of patterns of decreases studied	61

FIGURES (continued)

	Page
Fig. 6 Input-output view of groundwater hydrology	66
Fig. 7 Schematic diagram of linear systems analysis of karst conduit-type spring flow	67
Fig. 8 Fontaine de Vaucluse karstic spring	68
Fig. 9 Impulse response function ordinates from autocorrelation and cross correlation functions. Goodenough Springs near Comstock, Texas	71
Fig. 10 Basic element for the simulation of 2D flow in fissured media	71
Fig. 11 One example of the square law of resistance (flow) in karstic environment	73
Fig. 12 Typical results of field water test	73
Fig. 13 Finite-element grid showing boundary conditions and locations of specified-discharge points	75
Fig. 14 Calculated head distribution for a fractured block model	75
Fig. 15 Simulated breakthrough of a regional tracer	76
