

PROCEEDINGS OF THE IAHR/AIRH SYMPOSIUM ON TRANSPORT AND REACTIVE
PROCESSES IN AQUIFERS / ZÜRICH / SWITZERLAND / 11-15 APRIL 1994

Transport and Reactive Processes in Aquifers

Edited by

TH. DRACOS & F. STAUFFER

Institut für Hydromechanik und Wasserwirtschaft (IHW), Eidg. Technische Hochschule Zürich

A. A. BALKEMA / ROTTERDAM / BROOKFIELD / 1994

G 12731

Table of contents

Preface	XIII
Organization	XIV
Opening address <i>Th. Dracos</i>	XV
 <i>Invited lectures</i>	
Use of models in decision making <i>J. Bear</i>	3
Overview: Processes limiting the occurrence of organic contaminants in moving groundwater <i>P.M. Gschwend, B.A. Holmén, A.A. MacKay, J.N. Ryan, D.A. Backhus & Y.-P. Chin</i>	11
Visualization of flow and transport at the pore level <i>J.L. Wilson</i>	19
Behavior of microbes in aquifers <i>T.N.P. Bosma & A.J.B. Zehnder</i>	37
 <i>Laboratory and field experiments</i>	
Simulation of arsenic transport in column experiments: Estimation of sorption kinetics of As(III) and As(V) species in simple aquifer systems <i>M. Isenbeck-Schröter, K. Hamer, F. Reitz, J. Schubert & H.D. Schulz</i>	45
Biodegradation of an organomercurial by a bacterial resistant strain and transport of a micropollutant through an homogeneous porous medium <i>E. Marcandella, C. Bicheron & M.A. Buès</i>	53
Kinetics and mechanisms of abiotic transformations: Surface-catalysed hydrolysis of pesticides in steady-state systems <i>M. Gfeller & G. Furrer</i>	59
Sensing reactive mineral surfaces in natural sediments by nitroaromatic model compounds <i>S.B. Haderlein & R.P. Schwarzenbach</i>	67
The role of aquifer sediment in controlling redox conditions in polluted groundwater <i>G. Heron & T.H. Christensen</i>	73

Influence of EDTA on the mobility of trace metals in aquifers: Illustration with column experiments on slightly contaminated solids from an alluvial aquifer <i>A. C. M. Bourg, C. Crouzet & C. Bertin</i>	79
Development and application of a fibreoptic fluorimeter for in-situ tracer concentration measurements <i>G. Schmid & B. Barczewski</i>	83
Comparison of measuring methods for strontium adsorption parameters <i>T. Igarashi & Y. Mahara</i>	89
The Waterloo Drive-Point Profiler – Detailed profiling of VOC plumes in groundwater aquifers <i>M. M. Broholm, R. A. Ingleton & J. A. Cherry</i>	95
Speciation of reduced forms of sulfur in aquifer sediments and implications for the attenuation of heavy metals in landfill leachate pollution plumes <i>C. Crouzet, R. S. Altmann & A. C. M. Bourg</i>	101
Transport of Cd and Cu in a zone of calcite dissolution: Column experiments and modeling <i>K. Hamer, R. von Lührte & M. Isenbeck-Schröter</i>	105
Transport of chromium (VI) in saturated layer of sediment: Column experiments and modelling <i>E. Tevissen, M. O. Nicolas-Simonnot, M. Sardin, D. Schweich & R. Margrita</i>	111
Multicomponent transport of major cations in columns <i>M. Černík, K. Barmettler, M. Borkovec & H. Sticher</i>	119
The effects of cosolutes and cosolvents on the adsorption of BTEX compounds from groundwater <i>M. H. Barrett, L. Gikas & D. N. Lerner</i>	125
Modelling the fate of organic compounds in <i>in situ</i> microcosm experiments <i>P. L. Bjerg, A. Brun, P. H. Nielsen & T. H. Christensen</i>	131
Transport and behaviour of soluble hydrocarbon constituents in sandy soils <i>A. Leuthold, O. Razakarisoa & G. Schäfer</i>	137
Nonequilibrium transport of PAHs: A comparison of column and batch experiments <i>Ch. Schüth & P. Grathwohl</i>	143
Transient transport of colloids in a weakly clayey sand <i>B. Harmand & M. Sardin</i>	149
 <i>Field investigations and parameter estimation</i>	
A comparison of investigation methods for the prediction of flow and transport in highly heterogeneous formations <i>T. Ptak & G. Teutsch</i>	157
Integrating different types of information for estimating aquifer transmissivities with the sequential indicator cosimulation method <i>H. Kupfersberger</i>	165

The influence of correlation length of highly conductive zones in alluvial media on the transport behaviour <i>M.-T.Schafmeister & G.de Marsily</i>	171
Integration of geophysical and sedimentological information in the stochastic description of inhomogeneities in fluvial gravel deposits <i>P.Huggenberger, M.Rauber & F.Stauffer</i>	177
Field experiments of radionuclide migration at the Grimsel Test Site (Swiss Alps) <i>E.Hoehn, T.Fierz, U.Frick & J.Eikenberg</i>	183
From field measurements to effective hydraulic properties of a fractured aquitard A case study <i>S.Löw, D.Guyonnet, J.-M.Lavanchy, O.Voborny & P.Vinard</i>	191
3d inverse modeling in fractured aquifers <i>U.Kuhlmann & J.Trösch</i>	197
Contaminant transport at a waste incinerator residue deposit: Inverse modelling <i>T.O.Sonnenborg, P.Engesgaard & D.Rosbjerg</i>	205
Estimating parameters in aquifer with frequency spectrum method of dynamic observation series <i>Damei Li & Xiangsan Wang</i>	213
Newer techniques in aquifer parameter estimation from pump test data <i>S.K.Goyal & N.K.Khullar</i>	217
Geoelectrics for estimating aquifer transport properties <i>W.E.Kelly, O.Mazac & S.Mares</i>	221
Multiple pumping tests in heterogeneous porous aquifers: A method for the determination of spatial variability of effective hydraulic parameters <i>H.Schad & G.Teutsch</i>	227
Spectral analysis of tracer tests: A comparison with time domain methods <i>P.Marschall & G.Schäfer</i>	235
An integrated description of the organic pollution plume from a landfill (Grindsted, Denmark) <i>K.Rügge, P.L.Bjerg, S.Würtz, A.Foverskov, B.Skov & T.H.Christensen</i>	243
Use of biotracers to study groundwater contamination by septic tank leaching bed systems <i>D.M.Joy, B.Shadford, C.Etches, H.Lee, H.R.Whiteley & S.Zelin</i>	249
Transport of nutrients to small surface water through drainage <i>G.A.P.H.van den Eertwegh</i>	255
Definition of protected areas for drinking water wells: A field study <i>A.Lopez, M.Vurro, P.P.Limoni & M.Maggiore</i>	263
Reactivity of natural sediments in relation to groundwater quality in several hydrogeochemical environments <i>H.P.Broers & J.Griffioen</i>	269

Transport of reactive contaminants in porous media: Review of field experiments <i>M. L. Brusseau</i>	277
Comparison of Borden natural gradient tracer tests <i>M. O. Rivett, S. Feenstra & J. A. Cherry</i>	283
Field study of capture zones in a shallow sand aquifer <i>W. R. Linderfelt & J. L. Wilson</i>	289
 <i>Modelling transport in heterogeneous media</i>	
Modelling the radionuclide migration experiments at the Grimsel Test Site <i>W. Heer, J. Hadermann & A. Jakob</i>	297
Modelling multiphase flow in discrete fracture systems with a finite element method <i>R. Helmig</i>	303
Flow characterisation in crystalline rocks from combined continuum and stochastic fracture-flow models <i>O. Voborny, S. Vomvoris & G. W. Lanyon</i>	311
On coarse grids simulation of solute transport in heterogeneous formations <i>P. Indelman</i>	317
Residence time and mass flux moments of solute subject to rate-limiting mass transfer resistances in heterogeneous aquifers <i>J. O. Selroos</i>	323
A new method for stochastic modeling of flow and transport in heterogeneous formations <i>A. Bellin, Y. Rubin & A. Rinaldo</i>	329
Risk assessment of well contamination using a regional stochastic modelling approach <i>H.-J. Franke, G. Teutsch & H. Kobus</i>	337
Kinematic mixing in heterogeneous aquifers <i>Y. Ma & M. W. Kemblowski</i>	343
Microscopic description of colloid transport in fractured or porous media <i>J. van der Lee, E. Ledoux & G. de Marsily</i>	349
Enhanced groundwater contaminant transport by mobile bacteria <i>M. Y. Corapcioglu, S. H. Kim & S. Jiang</i>	357
Numerical simulation of tracer tests to quantify, at a macroscopic scale, transport processes in a multiporous aquifer <i>P. Biver</i>	363
Impact of tannery effluent on ground water quality and prediction of pollution using 2-D solute transport and dispersion model <i>T. V. Gopalakrishnan & G. Baskar</i>	371
Leachate migration in multilayer aquifers <i>M. M. Sherif & V. P. Singh</i>	377

Field and numerical study of water flow in fissured aquifers <i>A. Szymanski & M. Schöniger</i>	383
 <i>Modelling transport and reactive processes</i>	
Towards a transport model involving geochemical mechanisms from adsorption to precipitation <i>J. Lützenkirchen & P. Behra</i>	391
An integrated modelling system for nitrogen transport <i>R. J. Lunn & R. Mackay</i>	397
Effect of nonlinear sorption on contamination/remediation of heterogeneous aquifers <i>V. Cvetkovic & G. Dagan</i>	405
Instantaneous injection of a nonlinearly adsorbing solute in a heterogeneous aquifer <i>W. J. P. Bosma, S. E. A. T. M. van der Zee, A. Bellin & A. Rinaldo</i>	411
Modelling the adsorption of metals on natural surface oxides <i>C. Tiffreau, J. Lützenkirchen & Ph. Behra</i>	419
Field-scale transport of weathering products from mining waste <i>G. Destouni & N. Eriksson</i>	425
On equilibrium and the number of degrees of freedom in modeling transport in porous media <i>J. Bear & J. J. Nitao</i>	431
Three-dimensional Monte Carlo analysis of spatial spreading during reactive solute transport by groundwater <i>D. F. Haley, E. A. Sudicky & R. L. Naff</i>	437
Simulation of multicomponent reactive transport in groundwater <i>E. O. Frind, D. W. Blowes, J. W. Molson & C. J. Ptacek</i>	445
A kinetic biofilm concept for groundwater transport modelling <i>A. Zysset, F. Stauffer & T. Dracos</i>	451
A coupled microbiology-geochemistry transport model for saturated groundwater flow <i>A. Brun, P. Engesgaard & E. O. Frind</i>	457
Simulation of a xylene spill in a sandy aquifer with a 3D transport and biogeochemistry model <i>W. Schäfer, R. Therrien & A. Voss</i>	463
Desorption of organic pollutants (PAHs) from contaminated aquifer material <i>P. Grathwohl, W. Pyka & P. Merkel</i>	469
Dissolution and mass transfer processes for residual organics in the saturated groundwater zone <i>N. Guiguer & E. O. Frind</i>	475
Numerical simulation of the evolution and remediation of NAPL contamination in heterogeneous porous media <i>A. J. A. Unger, E. A. Sudicky & P. A. Forsyth</i>	481

Dimensionality effects in simulation of reactive transport in two and three dimensions <i>P. Engesgaard, H.C. Ammentorp & J.C. Refsgaard</i>	487
An equilibrium-nonequilibrium groundwater quality model <i>P. Marzal, A. Seco & J. Ferrer</i>	493
Contaminant transport at a waste incinerator residue deposit: 2D hydrogeochemical modelling <i>R. Traberg & P. Engesgaard</i>	499
The weathering of pyrite in lignite areas – Oxygen supply as a limiting factor of sulphate generation <i>A. Prein & R. Mull</i>	505
 <i>Multiphase flow</i>	
Behavior of two-phase flow in heterogeneous porous media <i>A. E. Abdin, C. M. Chang, J. J. Kaluarachchi & M. W. Kemblowski</i>	513
Experimental investigation of the migration of the miscible and immiscible components following a light oil spill <i>M. B. Butts & K. H. Jensen</i>	519
Quality assurance of the isolation of a contaminated location: Large scale pilot test <i>G. J. Mulder, D. Pereboom & J. B. Sellmeijer</i>	525
Effective large-scale parameters for two-phase flow in heterogeneous porous media <i>B. H. Kueper & B. Girgrah</i>	531
Multiphase fluid distributions in a shallow water-table aquifer contaminated by crude oil <i>W. N. Herkelrath, H. I. Essaid & L. A. Dillard</i>	537
Diffusive disappearance of immiscible-phase organic liquids in fractured porous media: Finite matrix blocks and implications for remediation <i>B. L. Parker & D. B. McWhorter</i>	543
Column experiments concerning rate limited vapour extraction of volatile organic compounds from wet sands <i>K. Wehrle & J. Brauns</i>	549
 <i>Aquifer remediation</i>	
Solvent flushing dynamics in contaminated soils <i>D. C. M. Augustijn, D. Dai, P. S. C. Rao & A. L. Wood</i>	557
Enhanced dissolution of heterogeneously distributed solvents residuals by methanol flushing A field experiment <i>K. Broholm & J. A. Cherry</i>	563
Numerical simulation of rate-limited vapour extraction of volatile organic compounds in wet sands <i>J. Croisé, J. E. Armstrong & V. Kaleris</i>	569

Mass transfer from liquid to vapor phase in porous media during soil venting procedures <i>A. Lange & R. Mull</i>	577
Spatial variability in redox conditions and groundwater bioremediation <i>D. L. Marrin</i>	583
Author index	589
