# CONTENTS

<b>PREFACE</b>	<b>ix</b>
<b>CHAPTER 1. INTRODUCTION</b>	<b>1</b>
1.1 Groundwater and Natural Variability, 1	
1.2 Physical Description of Subsurface Flow, 4	
1.3 Stochastic Approach and Concepts, 10	
1.4 Background and Scope, 13	
<b>CHAPTER 2. STOCHASTIC DESCRIPTION</b>	<b>17</b>
2.1 Probability and Random Variables, 17	
2.2 Stochastic Processes and Time Series, 26	
2.3 Spatial Variability and Random Fields, 45	
2.4 Stochastic Differential Equations and Methods, 52	
<b>CHAPTER 3. TEMPORALLY VARIABLE SUBSURFACE FLOW</b>	<b>63</b>
3.1 Lumped-Parameter Water-Balance Models, 64	
3.2 Dynamic Response of Distributed-Parameter Aquifer Models, 70	
3.3 Dynamic Response of Groundwater-Quality Models, 76	
3.4 Other Applications and Approaches, 87	

<b>CHAPTER 4. SPATIAL VARIABILITY IN SUBSURFACE FLOW</b>	<b>95</b>
4.1 Hydraulic Conductivity Variations in Steady Saturated Flow, 96	
<i>Exact analysis of one-dimensional flow</i> , 96	
<i>Perturbation approximation in <math>\ln K</math></i> , 99	
<i>Effective hydraulic conductivity</i> , 109	
4.2 Boundary Effects, Nonstationarity, and Conditioning 115	
<i>One-dimensional flow</i> , 115	
<i>Multidimensional flow</i> , 120	
<i>Numerical techniques</i> , 127	
<i>Conditional solutions</i> , 129	
4.3 Unconfined Aquifers and Unsteady Saturated Flow, 135	
4.4 Interpretation of Saturated Flow Results, 141	
<i>Local head variance relationship</i> , 141	
<i>Effective hydraulic conductivity</i> , 149	
<i>Flow-network analysis</i> , 151	
<i>Flow variability</i> , 157	
4.5 Unsaturated Flow in Heterogeneous Soils, 159	
<i>Steady-flow results</i> , 166	
<i>Unsteady-flow results</i> , 175	
<i>Other probabilistic analyses</i> , 182	
4.6 Flow in Fractured Rocks, 184	
<i>Variable-aperture fractures</i> , 186	
<i>Flow in fracture networks</i> , 188	
4.7 Sensitivity Analysis, 194	
<b>CHAPTER 5. TRANSPORT PROCESSES IN HETEROGENEOUS MEDIA</b>	<b>199</b>
5.1 Mixing in Saturated Flow, 200	
<i>Stratified convective models</i> , 204	
<i>Longitudinally variable convection</i> , 208	
<i>Taylor dispersion in a stratified aquifer</i> , 211	
<i>Dual-medial models</i> , 214	
5.2 Multidimensional Macrodispersion, 216	
<i>General formulation</i> , 216	
<i>Large-displacement results</i> , 220	
<i>Statistically anisotropic media</i> , 223	
<i>Developing dispersion</i> , 235	
5.3 Concentration Variability, 240	
<i>Stratified convective transport</i> , 240	
<i>Stratified flow with transverse mixing</i> , 243	
<i>Three-dimensional analysis</i> , 245	
5.4 Other Effects in Dispersive Transport Processes, 252	
<i>Variable retardation effects</i> , 252	
<i>Variable local dispersion</i> , 259	
<i>Unsaturated flow</i> , 261	

<i>Nonhomogeneous fluids</i> , 263	
<i>Dispersion with no maximum scale of heterogeneity</i> , 265	
<i>Large-amplitude nonlinear effects</i> , 270	
5.5 Solute Transport in Fractured Rocks, 271	
<i>Variable-aperture fractures</i> , 272	
<i>Solute transport in fracture networks</i> , 279	
<b>CHAPTER 6. STOCHASTIC CHARACTERIZATION AND GEOSTATISTICS</b>	<b>283</b>
6.1 Observations of Spatial Structure, 284	
<i>Spatial averaging effects</i> , 285	
<i>Summary of field data</i> , 290	
6.2 Geostatistics and Kriging, 297	
<i>Kriging equations</i> , 297	
<i>Application of kriging</i> , 302	
<i>Cokriging</i> , 306	
<i>Conditional simulation</i> , 307	
6.3 Statistical Inference and Sampling-Network Design, 308	
<i>Nonparametric analyses</i> , 308	
<i>Uncertainty estimates</i> , 311	
<i>Simulation studies</i> , 314	
<i>Sampling network design</i> , 318	
<i>Parametric analyses</i> , 319	
<i>Large-scale trends</i> , 323	
<i>Self-similarity and fractal descriptions</i> , 325	
<i>Some field examples</i> , 332	
6.4 Geostatistical Approach to the Inverse Problem, 337	
<i>Deterministic inverse methods</i> , 337	
<i>Geostatistical inverse methods</i> , 341
