# *Contents*

Series foreword	vii
Preface	xi
Acknowledgements	xiii
<b>1 Answers to some important questions</b>	<b>1</b>
1.1 What is ecotoxicology?	2
1.2 Pollution: what is it and what does it do?	8
1.3 What is the scope of ecotoxicology?	15
1.4 How are assessment and prediction accomplished?	22
1.5 Who performs ecotoxicity tests?	24
1.6 Summary and conclusions	27
<b>2 Decision making in ecotoxicology: science and society meet</b>	<b>28</b>
2.1 Scientific and public perceptions	29
2.2 Deciding what to protect	34
2.3 Deciding what is significant	42
2.4 Deciding what is acceptable	43
2.5 Obstacles to scientific understanding	44
2.6 Ecosystem health: a fit phrase?	48
2.7 Decisions in risk assessment	51
2.8 Decisions in risk management	62
2.9 Summary and conclusions	65
<b>3 Measuring ecotoxicological effects on populations, communities and ecosystems</b>	<b>66</b>
3.1 Field monitoring	67
3.2 Communities	71
3.3 Populations: studies of whole organisms	82
3.4 Populations: physiological and biochemical studies	88
3.5 Populations: genetic studies	98
3.6 Summary and conclusions	103

<b>4 Room for improvement</b>	<b>105</b>
4.1 Application of toxicity testing in ecotoxicology	105
4.2 Dose-effect	106
4.3 Problems with laboratory toxicity tests	109
4.4 Problems with standardization	116
4.5 Ring tests, variability and standardization	127
4.6 Importance of power	133
4.7 Where is the eco?	137
4.8 Tolerance as a quantitative phenotypic trait	139
4.9 Summary and conclusions	147
<b>5 Integrated ecotoxicology: linking fate and effect within a biological hierarchy</b>	<b>149</b>
5.1 A fundamental problem	149
5.2 The approach	150
5.3 Diagenesis of polycyclic aromatic hydrocarbons in marine sediments	154
5.4 The case of the missing benthos	158
5.5 Effects of bioturbational mixing	166
5.6 Linking fate and effect through the biological mixing parameter $\beta$	168
5.7 Coupling fate and effect to the population level of organization	174
5.8 Quantifying the effect of bioturbation on biodegradation	178
5.9 The science gap	180
5.10 Summary and conclusions	182
<b>6 Ecotoxicology: past, present and future</b>	<b>184</b>
6.1 Where have we been?	185
6.2 Where are we now?	195
6.3 Where are we going?	204
6.4 How do we get there from here?	213
6.5 Summary and conclusions	219
References	221
Index	242
