Contents

Preface	iii
Introduction	ix
I. Analytical Methodologies	
1. Practical Organic Analytical Chemistry for Hazardous Waste Site Investigations <i>Suzanne Lesage and Richard E. Jackson</i>	3
2. Nonpriority Pollutant Analysis and Interpretation <i>Kathleen C. Swallow</i>	37
3. Establishing an Analytical Protocol for the Measurement of EPA's Appendix IX List of Compounds <i>Jerry L. Parr, Gary K. Ward, and Gary Walters</i>	53
4. Hierarchical Analytical Approach to Evaluating the Transport and Biogeochemical Fate of Organic Compounds in Sewage-Contaminated Groundwater, Cape Cod, Massachusetts <i>Larry B. Barber II</i>	73

5. Application of Soil-Gas Sampling Technology to Studies of Trichloroethylene Vapor Transport in the Unsaturated Zone	121
<i>Bernadette M. Hughes, R. David McClellan, and Robert W. Gillham</i>	
II. Monitoring Strategies	
6. Field Monitoring for Polynuclear Aromatic Hydrocarbon Contamination	149
<i>Terri L. Bulman</i>	
7. The Importance of Volatile Organic Compounds as a Disposal Site Monitoring Parameter	173
<i>Russell H. Plumb, Jr.</i>	
8. An Overview of Statistical Methods for Groundwater Detection Monitoring at Waste Disposal Facilities	199
<i>Robert D. Gibbons</i>	
9. Geochemistry of Groundwater Pollutants at German Waste Disposal Sites	245
<i>Helmüt Kerndorff, Ruprecht Schleyer, Gerald Milde, and Russell H. Plumb, Jr.</i>	
10. Detection and Evaluation of Groundwater Contamination Caused by Waste Sites	273
<i>Ruprecht Schleyer, Helmüt Kerndorff, and Gerald Milde</i>	
III. Site Investigations	
11. A Review of Studies of Contaminated Groundwater Conducted by the U.S. Geological Survey Organics Project, Menlo Park, California, 1961-1990	295
<i>Donald F. Goerlitz</i>	
12. Pollution of Groundwater by Organic Compounds Leached from Domestic Solid Wastes: A Case Study from Morley, Western Australia	357
<i>Chris Barber, David John Briegel, Terrence R. Power, and Janis Kaye Hosking</i>	
13. Developing Methods for the Analysis of Toxic Chemicals in Soil and Groundwater: The Case of Ville Mercier, Quebec, Canada	381
<i>Hooshang Pakdel, Geneviève Couture, Christian Roy, Anne Masson, Jacques Locat, P. Gélinas, and Suzanne Lesage</i>	

IV. Geochemical Investigations

14. The Determination and Fate of Unstable Constituents
of Contaminated Groundwater 425
Mary Jo Baedecker and Isabelle M. Cozzarelli
15. The Dissolution of Dense Immiscible Solvents into
Groundwater: Implications for Site Characterization
and Remediation 463
Richard L. Johnson
16. Geochemical Evaluation of Polychlorinated Biphenyls
(PCBs) in Groundwater 479
Stanley Feenstra
17. Estimating the Fate and Mobility of CFC-113 in
Groundwater: Results from the Gloucester
Landfill Project 511
Richard E. Jackson, Suzanne Lesage, and M. W. Priddle
