Contents

PART ONE BASIC PRINCIPLES

1	Introduction	3
1.1	Pollution in the modern world	4
1.2	Definition of pollution	5
	References	13
	Further reading	13
2	Transport and behaviour of pollutants in the environment	16
2.1	A basic model of environmental pollution	16
2.2	Sources of pollutants	17
2.3	The pollutants	17
2.3.1	Classification of hazardous substances in the USA	17
2.3.2	European Community Dangerous Substances Directive	19
2.3.3	UK priority list of pollutants	21
2.3.4	Pesticides	21
2.3.5	Indoor pollution	23
2.4	Physical processes of pollutant transport and dispersion	24
2.4.1	Transport media	24
2.4.2	Transport of pollutants in air	24
2.4.3	Some important types of reactions which pollutants undergo in the atmosphere	31
2.5	Transport of pollutants in water	31
2.5.1	Biochemical processes in water (involving microorganisms)	33
2.6	The behaviour of pollutants in the soil	35
2.6.1	The composition and physico-chemical properties of soils	35
2.6.2	Cation and anion adsorption in soils	37
2.6.3	Adsorption and decomposition of organic pollutants	39
2.7	Concluding remarks	42
	References	42
3	Toxicity and risk assessment of environmental pollutants	44
3.1	Basic principles of toxicology	44
3.2	Effects of pollutants on animals and plants	47
3.2.1	Effects of pollutants on humans and other mammals	47
3.2.2	Teratogenesis, mutagenesis, carcinogenesis and immune system defects	48
3.2.3	Ecotoxicology	50
3.3	Assessment of toxicity risks	51
3.3.1	Pollutants in contaminated land	51
3.3.2	Pollutants in drinking water	56
3.3.3	Toxic or explosive gases and vapours	57
	References	58

4	Analysis and monitoring of pollutants – organic compounds	59
4.1	Chromatography	59
4.2	Thin layer chromatography (TLC)	60
4.2.1	Separation of pesticides	61
4.2.2	Separation of metal cations	61
4.3	Gas liquid chromatography (GLC)	62
4.3.1	Detection of eluted substances	65
4.3.2	Principal parameters	67
4.3.3	Optimum operating conditions	68
4.3.4	Capillary columns for GLC	70
4.3.5	Analysis of urban air pollution	71
4.3.6	Detection by mass spectrometry	71
4.4	High pressure liquid chromatography (HPLC)	77
4.4.1	The components	78
4.4.2	Detectors	80
4.4.3	Analysis of polluted air	81
4.4.4	Analysis of polluted water	85
4.4.5	Trace enrichment followed by GLC analysis	86
4.5	Pollution by metals – atomic absorption spectroscopy	86
4.5.1	Historical	86
4.5.2	Basic theory of atomic absorption and emission	88
4.5.3	The Lambert–Beer law	90
4.5.4	Instrumental details	91
4.5.5	Interferences	92
4.5.6	The determination of sodium in concrete by AAS	93
4.5.7	Sample preparation	94
4.5.8	Precision and accuracy of measurement	94
4.5.9	Graphite furnace AAS	95
4.6	A plasma source	95
4.6.1	ICP-mass spectrometry	97
4.7	Analytical quality assurance	97
4.8	Environmental monitoring	99
4.8.1	Introduction	99
4.8.2	Monitoring emissions	100
	References	104
	Further reading	105

PART TWO THE POLLUTANTS

5	Inorganic pollutants	109
5.1	Ozone	109
5.1.1	Historical	109
5.1.2	Formation	109
5.1.3	Physical properties and structure	109
5.1.4	The ozone layer	110
5.1.5	Factors which disturb the natural environment	111
5.1.6	Chemistry of stratospheric CFC	112
5.1.7	Control measures	113
5.1.8	Ozone in the troposphere	114
5.1.9	Diurnal variations of ozone levels	115
5.1.10	Toxicity and control	115
5.2	Oxides of carbon, nitrogen and sulphur	115
5.2.1	Carbon dioxide	116
5.2.2	Oxides of nitrogen	124
5.2.3	Oxides of sulphur	129
5.3	Heavy metals	140
5.3.1	General properties	140

5.3.2	Biochemical properties of heavy metals	141
5.3.3	Sources of heavy metals	142
5.3.4	Environmental media affected	149
5.3.5	Heavy metal behaviour in the environment	151
5.3.6	Toxic effects of heavy metals	155
5.3.7	Analytical methods	158
5.3.8	Examples of specific heavy metals	159
5.4	Other metals and inorganic pollutants	164
5.4.1	Aluminium	164
5.4.2	Beryllium	165
5.4.3	Fluorine	166
5.5	Radionuclides	167
5.5.1	History and nomenclature	167
5.5.2	Types of radioactive emission	168
5.5.3	Units of energy and measurement of toxicity	169
5.5.4	Radioactive potassium	170
5.5.5	Production of radionuclides by artificial means	171
5.5.6	Nuclear fission	171
5.5.7	Power generation in nuclear reactors	173
5.5.8	Nuclear reactor types	174
5.5.9	The future of nuclear power	178
5.5.10	Observations on major accidents	180
5.5.11	Radioactive release within buildings	184
5.5.12	Social aspects of nuclear power generation	186
5.5.13	Power from thermal fusion	186
5.5.14	Cold fusion	188
5.6	Mineral fibres and particles	188
5.6.1	General aspects	188
5.6.2	Analysis	189
5.6.3	Examples of mineral pollutants	189
	References	191
	Further reading	194
6	Organic pollutants	196
6.1	Smoke	196
6.2	Methane and other hydrocarbons – coal and oil as sources	199
6.2.1	The formation of coal	199
6.2.2	Petroleum	200
6.2.3	Methane	202
6.2.4	Higher alkanes	203
6.2.5	Polycyclic aromatic hydrocarbons (PAH)	206
6.3	Organic solvents	210
6.3.1	Adhesives	211
6.3.2	Coatings and inks	212
6.3.3	Aerosol sprays	213
6.3.4	Metal cleaning	214
6.3.5	Dry cleaning of clothes	214
6.3.6	Solvent toxicology	215
6.3.7	Organochlorine compounds	216
6.3.8	Detergents	217
6.3.9	Indoor pollution	220
6.4	Organohalides: pesticides, PCBs and dioxins	221
6.4.1	Historical	221
6.4.2	Organochlorine production	222
6.4.3	DDT (dichlorodiphenyl trichloroethane)	222
6.4.4	Lindane, hexachlorocyclohexane	223
6.4.5	Some other chlorinated pesticides	225
6.4.6	Organochlorine herbicides	226
6.4.7	Toxic effects of insecticides	227

6.4.8	Control of pesticides	229
6.4.9	Vinyl chloride and polyvinyl chloride	231
6.4.10	Polychlorobiphenyls	232
6.4.11	Toxic substances in herbicides	235
6.4.12	Metabolism of chloraromatic compounds	242
6.4.13	Disposal of organochlorine compounds	242
6.4.14	Cremation or burial	243
6.4.15	Use of decay organisms	244
6.5	Natural, organophosphorus and carbamate pesticides	244
6.5.1	Naturally occurring pesticides	248
6.5.2	Organophosphorus pesticides	253
6.5.3	Carbamate pesticides	255
6.6	Odours	255
6.6.1	Important properties of odours	256
6.6.2	Methods of odour control	256
6.6.3	Methods of odour treatment	257
	References	259
	Further reading	

PART THREE WASTES AND OTHER MULTI-POLLUTANT SITUATIONS

7	Wastes and their disposal	263
7.1	Introduction	263
7.2	Amounts of waste produced	264
7.2.1	Industrial wastes	264
7.2.2	Municipal wastes	264
7.3	Methods of disposal of municipal wastes	264
7.3.1	Landfilling	265
7.3.2	Incineration	266
7.3.3	Composting	266
7.3.4	Recycling	267
7.4	Sewage treatment	270
7.5	Hazardous wastes	270
7.5.1	The nature and amount of hazardous waste produced	271
7.5.2	Hazardous waste management	273
7.5.3	New technologies for waste disposal	
7.6	Long-term pollution problems of abandoned landfills containing hazardous wastes	274
7.6.1	Love Canal, New York, USA	274
7.6.2	Lekkerkirk, near Rotterdam, The Netherlands	275
7.7	Tanker accidents and oil spillages at sea	277
7.8	Other multi-pollutant situations	278
7.9	Chemical time bombs	278
	References	
	Appendix Table of units and conversions	280
	Index	281
