Proceedings of an international symposium held at Ljubljana, Yugoslavia, from 23 to 26 April 1990. The symposium was co-organized by the International Commission on Surface Water of the International Association of Hydrological Sciences (IAHS), and the Yugoslav Association for Hydrology, and sponsored by the World Meteorological Organization and UNESCO

**Published by the International Association of  
Hydrological Sciences 1990.**

**IAHS Publication No. 191.**

**ISBN 0-947571-47-7.**

The designations employed and the presentation of material throughout the publication do not imply the expression of any opinion whatsoever on the part of IAHS concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

The use of trade, firm, or corporate names in the publication is for the information and convenience of the reader. Such use does not constitute an official endorsement or approval by IAHS of any product or service to the exclusion of others that may be suitable.

*The French abstracts and titles were checked or translated by  
Dr J. A. Rodier, whose service is acknowledged with gratitude.*

*The camera-ready copy for the papers was prepared at IAHS  
Press, Wallingford, UK, by Penny Kisby, Sandra Smith and  
Jean Hornsby, on an Advent Desktop Publishing System.*

**Printed in Great Britain by Galliard (Printers) Ltd, Great Yarmouth.**

## Contents

|   |  |     |
|---|--|-----|
| Preface   |  | v   |
| Préface   | <i>M. A. Beran</i>   | vii |
| <br>  |  |     |
| <b>1 DATA ACQUISITION</b>   |  |     |
| <br>  |  |     |
| Remote-sensing techniques for determining the regionally variable characteristics of drainage basins                        | <i>H. Grumazescu, G. Stancalie &amp; C. Ungureanu</i>                                    | 3   |
| Data acquisition within a regional scale. The experience of the remote satellite transmission in West Africa                | <i>E. Servat &amp; J. M. Lapetite</i>  | 11  |
| A contribution to research of evapotranspiration using remotely sensed crop temperature                                     | <i>B. Matičič &amp; M. Fegeš</i>   | 21  |
| Temporal and spatial variability of soil moisture reserves in a forest-steppe landscape (based on KUREX 88 experiment)      | <i>A. G. Georgiadi, S. V. Yasinski, A. V. Meleshko, L. M. Kitaev &amp; V. I. Shadrin</i> | 25  |
| Groundwater recharge through the unsaturated zone of southeastern Botswana: a study of chlorides and environmental isotopes | <i>A. Geiske, E. Selaolo &amp; S. McMullan</i>   | 33  |
| The environmental tracer approach as a tool for hydrological evaluation and regionalization of catchment systems            | <i>A. Herrmann, B. Finke, M. Schöniger, P. Maloszewski &amp; W. Stichler</i>             | 45  |
| <br>  |  |     |
| <b>2 HYDROLOGICAL MODELLING</b>   |  |     |
| <br>  |  |     |
| Larger-scale hydrological modelling for regional transferring of hydrological information                                   | <i>A. Becker &amp; B. Pfuetzner</i>  | 61  |
| Water and heat exchange on different types of land surface on the northern slope of the central Caucasus                    | <i>A. B. Shmakin &amp; M. D. Ananicheva</i>  | 69  |
| A simple chloride balance routing method to regionalize groundwater recharge: a case study in semiarid Botswana             | <i>J. J. De Vries &amp; A. Gieske</i>  | 81  |

|  |     |
|--|-----|
| A distributed model describing the interaction between flood hydrographs and basin parameters <i>H. Bergmann, G. Richtig &amp; B. Sackl</i>                                | 91  |
| Etude des crues cévenoles: conditions d'apparition dans un petit bassin forestier sur le versant sud du Mont Lozère, France<br><i>C. Cosandey &amp; J. F. Didon-Lescot</i> | 103 |
| Physically-based snow-cover model <i>Bertel Vehvilläinen</i>   | 117 |
| Effect of regional climate conditions on the rainfall-runoff process in urban catchments: the case of snowy surfaces <i>Č. Maksimović &amp; S. T. Thorolfsson</i>          | 127 |
| Regionalization in karst regions <i>Ognjen Bonacci</i>   | 135 |
| Variations in hydroclimatic components and the concept of regionalization in West Africa <i>Oyediran Ojo</i>   | 147 |
| <br><b>3 REGIONAL TRANSFER MODELLING</b>   |     |
| Estimating flow characteristics at ungauged sites <i>H. C. Riggs</i>   | 159 |
| The canonical correlation approach to regional flood estimation<br><i>G. S. Cavadias</i>   | 171 |
| The use of L-moments for regionalizing flow records in the Rio Uruguai basin: a case study <i>Robin T. Clarke &amp; Luis Edgar Montenegro Terrazas</i>                     | 179 |
| Estimating hydrological parameters from basin characteristics for large semiarid catchments <i>W. Reimers</i>  | 187 |
| Regional analysis of hydrological variables in Greece<br><i>Maria Mimikou</i>  | 195 |
| A rainfall-runoff model for small ungauged watersheds in Poland<br><i>Janusz Ostrowski</i>   | 203 |
| Regionalization of parameters using basin geology, land use, and soil type for use in a storm rainfall-runoff relationship<br><i>Yosihisa Ando</i>                         | 211 |
| A model for forecasting runoff from mountainous rivers<br><i>I. D. Shentzis</i>  | 219 |

|   |     |
|---|-----|
| The Weibull distribution applied to regional low flow frequency analysis <i>P. J. Pilon</i>                   | 227 |
| Regionalized estimation of reservoir capacity-yield curves in Hungary <i>M. Domokos &amp; A. Gilyén-Hofer</i> | 239 |
| The regionalization of fluvial sediment yield in Emilia-Romagna (northern Italy) <i>M. Ferraresi</i>          | 253 |
