

SCALE ISSUES IN HYDROLOGICAL MODELLING

Edited by

J. D. KALMA

*Department of Civil Engineering and Surveying,
University of Newcastle, Callaghan, NSW, Australia*

and

M. SIVAPALAN

Centre for Water Research, University of Western Australia, Perth, WA, Australia

JOHN WILEY & SONS

Chichester · New York · Brisbane · Toronto · Singapore

The papers in this volume were originally published in *Hydrological Processes — An International Journal*, volume 9, issues 3–4 (237–482) and issues 5–6 (483–728), 1995.

British Library Cataloguing in Publication Data

A catalogue record for this book is available from the British Library

ISBN 0-471-95847-6

Typeset in 10/12pt Times.

Printed and bound in Great Britain by BPC Wheatons Ltd, Exeter.

CONTENTS

Dedication	viii
Contributors	ix
Alphabetical List of Reviewers	xii
Preface	xiii
1 Scale Problems in Hydrology: Contributions of the Robertson Workshop <i>M. Sivapalan and J. D. Kalma</i>	1
2 Scale Issues in Hydrological Modelling: A Review <i>G. Blöschl and M. Sivapalan</i>	9
3 Investigating the Representative Elementary Area Concept: An Approach Based on Field Data <i>R. A. Woods, M. Sivapalan and M. Duncan</i>	49
4 On the Representative Elementary Area (REA) Concept and its Utility for Distributed Rainfall– runoff Modelling <i>G. Blöschl, R. B. Grayson and M. Sivapalan</i>	71
5 Scaling Behaviour of Hydrological Fluxes and Variables: Empirical Studies Using a Hydrological Model and Remote Sensing Data <i>E. F. Wood</i>	89
6 Physical Interpretations of Regional Variations in the Scaling Exponents of Flood Quantiles <i>V. K. Gupta and D. R. Dawdy</i>	105
7 Effects of Vertical Resolution and Map Scale of Digital Elevation Models on Geomorphological Parameters Used in Hydrology <i>Y. Gyasi-Agyei, G. Willgoose and F. P. De Troch</i>	121
8 A Process-based Model for Colluvial Soil Depth and Shallow Landsliding Using Digital Elevation Data <i>W. E. Dietrich, R. Reiss, M.-L. Hsu and D. R. Montgomery</i>	141
9 Scale: Landscape Attributes and Geographical Information Systems <i>L. E. Band and I. D. Moore</i>	159
10 Delineating Hydrological Response Units by Geographical Information System Analyses for Regional Hydrological Modelling Using PRMS/MMS in the Drainage Basin of the River Bröl, Germany <i>W. Flügel</i>	181

11	Process Controls and Similarity in the US Continental-scale Hydrological Cycle from EOF Analysis of Regional Climate Model Simulations <i>J. S. Famiglietti, B. H. Braswell and F. Giorgi</i>	195
12	Predicting Catchment-scale Soil Moisture Status with Limited Field Measurements <i>J. D. Kalma, B. C. Bates and R. A. Woods</i>	203
13	Estimation of Subgrid Scale Kinematic Wave Parameters for Hillslopes <i>G. Willgoose and G. Kuczera</i>	227
14	Application of the Meta-channel Concept: Construction of the Meta-channel Hydraulic Geometry for a Natural Catchment <i>J. D. Snell and M. Sivapalan</i>	241
15	Linking Parameters Across Scales: Subgrid Parameterizations and Scale Dependent Hydrological Models <i>K. Beven</i>	263
16	Scaling Theory to Extrapolate Individual Tree Water Use to Stand Water Use <i>T. Hatton and H. Wu</i>	283
17	Towards a Catchment-scale Model of Subsurface Runoff Generation Based on Synthesis of Small-scale Process-based Modelling and Field Studies <i>J. Kubota and M. Sivapalan</i>	297
18	Catchment-scale Runoff Generation Model by Aggregation and Similarity Analyses <i>J. S. Robinson and M. Sivapalan</i>	311
19	Stream Network Morphology and Storm Response in Humid Catchments <i>P. A. Troch, F. P. De Troch, M. Mancini and E. F. Wood</i>	331
20	Scale Issues in Boundary-layer Meteorology: Surface Energy Balances in Heterogeneous Terrain <i>M. R. Raupach and J. J. Finnigan</i>	345
21	Estimation of Terrestrial Water and Energy Balances over Heterogeneous Catchments <i>R. P. Silberstein and M. Sivapalan</i>	369
22	Estimation of Land Surface Parameters Using Satellite Data <i>H. Xinmei, T. J. Lyons, R. C. G. Smith and J. M. Hacker</i>	387
23	Meteorological Impact of Replacing Native Perennial Vegetation with Annual Agricultural Species <i>H. Xinmei, T. J. Lyons and R. C. G. Smith</i>	401
24	Global Atmospheric Water Balance and Runoff from Large River Basins <i>T. Oki, K. Musiake, H. Matsuyama and K. Masuda</i>	411
25	Scaling of Land-atmosphere Interactions: An Atmospheric Modelling Perspective <i>R. Avissar</i>	435

26	Evaluation of the Effects of General Circulation Models' Subgrid Variability and Patchiness of Rainfall and Soil Moisture on Land Surface Water Balance Fluxes <i>M. Sivapalan and R. A. Woods</i>	453
27	Simulating Heterogeneous Vegetation in Climate Models. Identifying When Secondary Vegetation Becomes Important <i>A. J. Pitman</i>	475
	Index	485
