Table of Contents

Preface	xiii
Foreword: Where were we in 1991? <i>Anders Södergren (Sweden)</i>	xv
Section I: Identification and Origin of Chemicals and Toxicity	
Invited Overviews	
Effects of internal process changes and external treatment on effluent chemistry. <i>Lars Strömberg, Roland Mörck, Filipe de Sousa and Olof Dahlman (Sweden)</i>	3
Sources of pulping and bleaching derived chemicals in effluents. <i>Larry E. LaFleur (U.S.A.)</i> ..	21
Contributed Research	
Toxicity of TCF and ECF pulp bleaching effluents assessed by biological toxicity tests. <i>J. Ahtiainen, T. Nakari and J. Silvonen (Finland)</i>	33
The effect of waste constituents on the toxicity of TCF and ECF pulp bleaching effluents. <i>M. Verta, J. Ahtiainen, T. Nakari, A. Langi and E. Talka (Finland)</i>	41
The use of chronic bioassays in characterizing effluent quality changes for two bleached kraft mills undergoing process changes to increased chlorine dioxide substitution and oxygen delignification. <i>Timothy J. Hall, Richard K. Haley, Dennis L. Borton and Theresa M. Bousquet (U.S.A.)</i>	53
Reproduction effects on <i>Monoporeia affinis</i> of HPLC-fractionated extracts of sediments from a pulp mill recipient. <i>Ann-Kristin Eriksson, Brita Sundelin, Dag Broman and Carina Näf (Sweden)</i>	69
Examination of bleached kraft mill effluent fractions for potential inducers of mixed function oxygenase activity in rainbow trout. <i>L. Mark Hewitt, John H. Carey, D. George Dixon and Kelly R. Munkittrick (Canada)</i>	79
Comparative assessment of the toxic effects from pulp mill effluents to marine and brackish water organisms. <i>Britta Eklund, M. Linde and M. Tarkpea (Sweden)</i>	95
An assessment of the significance of discharge of chlorinated phenolic compounds from bleached kraft pulp mills. <i>Robert P. Fisher, Douglas A. Barton and Paul S. Weigand (U.S.A.)</i>	107
A comparison of gas chromatographic and immunochemical methods for quantifying resin acids. <i>Kai Li, Tao Chen, Paul Bicho, Colette Breuil and John N. Saddler (Canada)</i>	119
A method for detection of chlorinated, etherified lignin structures in high molecular weight materials of industrial and natural origin. <i>Olof Dahlman, Anders Reimann, Pierre Ljungquist and Roland Mörck (Sweden)</i>	129
Surface tension changes related to the biotransformation of dehydroabiestic acid by <i>Mortierella isabellina</i> . <i>A.G. Werker, P.A. Bicho, J.N. Saddler and E.R. Hall (Canada)</i>	139

Correlations among contaminant profiles in mill process streams and effluents. <i>Thomas E. Kemeny and Sujit Banerjee (U.S.A.)</i>	151
Recent Research and Future Directions	
Origins of effluent chemicals and toxicity: recent research and future directions. <i>Mark R. Servos (Canada)</i>	159
Section II: Environmental Fate	
Invited Overviews	
Environmental fate and distribution of substances. <i>G.E. Carlberg and T.R. Stuthridge (Norway and New Zealand)</i>	169
Biodegradability of different size classes of bleached kraft pulp mill effluent organic halogens during wastewater treatment and in lake environments. <i>E.K. Sasaki, J.K. Jokela and M.S. Salkinoja-Salonen (Finland)</i>	179
Contributed Research	
Analysis of pulp mill black liquor for organosulfur compounds using GC/atomic emission detection (AED). <i>I. Ya. Rod'ko, B.F. Scott and J.H. Carey (Russia and Canada)</i>	159
Turnover of chloroorganic substances in a Bothnian sea recipient receiving bleached kraft pulp mill effluents. <i>Per Nilsson, Lars Brydsten, Magnus Enell and Mats Jansson (Sweden)</i>	203
Modeling the fate of 2,4,6-trichlorophenol in pulp and paper mill effluent in Lake Saimaa, Finland. <i>Donald Mackay, Jeanette M. Southwood, Jussi Kukkonen, Wan Ying Shiu, Debbie D. Tam, Dana Varhaničková, and Rebecca Lun (Canada and Finland)</i>	219
Load from the Swedish pulp and paper industry (nutrients, metals and AOX) quantities and shares of the total load on the Baltic Sea. <i>Magnus Enell (Sweden)</i>	229
Degradation of the high molecular weight fraction of bleached kraft mill effluent by biological and photochemical processes. <i>Kelly R. Millar, John H. Carey, B. Kent Burnison, Hung Lee and Jack T. Trevors (Canada)</i>	239
Concentrations of chlorinated organic compounds in various receiving environment compartments following implementation of technological changes at a pulp mill. <i>S.M. Swanson, K. Holley, G.R. Bourree, D.C. Pryke and J.W. Owens (Canada and U.S.A.)</i>	253
Mesocosm simulation on sediment formation induced by biologically treated bleached kraft pulp mill wastewater in freshwater recipients. <i>E.K. Sasaki, A. Vähätalo, K. Salonen and M.S. Salkinoja-Salonen (Finland)</i>	261
Recent Research and Future Directions	
Recent advances in environmental fate of chemicals from pulp mills. <i>John S. Gifford (New Zealand)</i>	271

Section III: Bioaccumulation of Substances from Pulp and Paper Mills to Fish and Wildlife

Invited Overviews

Bioaccumulation of bleached kraft pulp mill related organic chemicals by fish.
Derek C.G. Muir and Mark R. Servos (Canada) 283

Persistent pulp mill pollutants in wildlife. *John E. Elliott, Phil E. Whitehead, P.A. Martin, G.D. Bellward and Ross J. Norstrom (Canada)* 297

Contributed Research

Dioxins and furans in crab hepatopancreas: use of principal components analysis to classify congener patterns and determine linkages to contamination sources.
Mark B. Yunker and Walter J. Cretney (Canada) 315

Studies on eulachon tainting problem: analyses of tainting and toxic aromatic pollutants.
P. Mikkelsen, J. Paasivirta, I.H. Rogers and M. Ikonomou (Finland and Canada) 327

Monitoring trends in chlorophenolics in Finnish pulp mill recipient watercourses by bioaccumulation in incubated mussels. *Sirpa Herve, Pertti Heinonen and Jaakko Paasivirta (Finland)* 335

Bioaccumulation of pulp chlorobleaching-originated aromatic chlorohydrocarbons in recipient watercourses. *Tiina Rantio, Jaana Koistinen and Jaakko Paasivirta (Finland)* 341

Section IV: Field and Laboratory Studies of Biochemical Responses Associated with Pulp and Paper Mill Effluents

Invited Overviews

Mixed function oxygenase induction by pulp mill effluents: advances since 1991.
Peter V. Hodson (Canada) 349

Biochemical responses in organisms exposed to effluents from pulp production: are they related to bleaching? *Karl-Johan Lehtinen (Finland)* 359

Contributed Research

Evaluation of biomarkers of exposure to 2-chlorosyringaldehyde and simulated ECF bleached eucalypt pulp effluent. *C.M. Brumley, V.S. Haritos, J.T. Ahokas and D.A. Holdway (Australia)* 369

Rainbow trout (*Oncorhynchus mykiss*) mixed function oxygenase responses caused by unbleached and bleached pulp mill effluents: a laboratory-based study. *Todd G. Williams, John H. Carey, B. Kent Burnison, D. George Dixon and Hing-Biu Lee (Canada)* 379

Lethal and sublethal effects of chlorinated resin acids and chloroguaiacols in rainbow trout. *C.J. Kennedy, R.M. Sweeting, J.A. Johansen, A.P. Farrell and B.A. McKeown (Canada)* . . . 391

Effluents from Canadian pulp and paper mills: a recent investigation of their potential to induce mixed function oxygenase activity in fish. *P.H. Martel, T.G. Kovacs and R.H. Voss (Canada)* 401

The use of stable isotopic analyses to identify pulp mill effluent signatures in riverine food webs. <i>Leonard I. Wassenaar and Joseph M. Culp (Canada)</i>	413
Detection of steroid hormone disruptions associated with pulp mill effluent using artificial exposures of goldfish. <i>M.E. McMaster, K.R. Munkittrick, G.J. Van Der Kraak, P.A. Flett and M.R. Servos (Canada)</i>	425

Recent Research and Future Directions

Field and laboratory studies of biochemical responses associated with pulp mill effluents: status in 1991, 1994 and beyond. <i>P.J. Kloepper-Sams (Belgium)</i>	439
---	-----

Section V: Field and Laboratory Studies of Whole Organism Responses Associated with Pulp and Paper Mill Effluents

Invited Overviews

<i>In situ</i> assessments of the impact of pulp mill effluent on life-history variables in fish. <i>Olof Sandström (Sweden)</i>	449
Laboratory responses of whole organisms exposed to pulp and paper mill effluents: 1991-1994. <i>Tibor G. Kovacs and Stanley R. Megraw (Canada)</i>	459

Contributed Research

Survival, growth, production and biomarker responses of fish exposed to high-substitution bleached kraft mill effluent in experimental streams. <i>Dennis L. Borton, William R. Streblow, W. Kenneth Bradley, Terry Bousquet, Peter A. Van Veld, Richard E. Wolke and Alexander H. Walsh (U.S.A.)</i>	473
Effect monitoring in pulp mill areas: response of the meiofauna community to altered process technique. <i>Brita Sundelin and Ann-Kristin Eriksson (Sweden)</i>	483
The western mosquitofish as an environmental sentinel: parasites and histological lesions. <i>Robin M. Overstreet, William E. Hawkins and Thomas L. Deardorff (U.S.A.)</i>	495
Abnormalities in winter flounder (<i>Pleuronectes americanus</i>) living near a paper mill in the Humber Arm, Newfoundland. <i>R.A. Khan, D.E. Barker, K. Ryan, B. Murphy and R.G. Hooper (Canada)</i>	511
Effects of pulp mill effluent on benthic freshwater invertebrates: food availability and stimulation of increased growth and development. <i>Richard B. Lowell, Joseph M. Culp, Frederick J. Wrona and Max L. Bothwell (Canada)</i>	525
Comparative evaluation of macrobenthic assemblages from the Sulphur River Arkansas in relation to pulp mill effluent. <i>Chet F. Rakocinski, Michael R. Milligan, Richard W. Heard and Thomas L. Deardorff (U.S.A.)</i>	533
Design and application of a novel stream microcosm system for assessing effluent impacts to large rivers. <i>Joseph M. Culp and Cheryl L. Podemski (Canada)</i>	549
Whole organism and population response of sentinel fish species in a large river receiving pulp mill effluents. <i>Stella M. Swanson, Richard Schryer and Barry Firth (Canada and U.S.A.)</i>	557

Nutrient and contaminant effects of bleached kraft mill effluent on benthic algae and insects of the Athabasca River. <i>Cheryl L. Podemski and Joseph M. Culp (Canada)</i>	571
---	-----

Recent Research and Future Directions

Field and laboratory responses of whole organisms associated with pulp mills. <i>Stella Swanson (Canada)</i>	581
--	-----

Section VI: Integrated Monitoring

Invited Overviews

The role of biological measurements in monitoring pulp and paper mills in Australasia and S.E. Asia. <i>Bruce M. Allender, John S. Gifford and Paul N. McFarlane (Australia and New Zealand)</i>	591
--	-----

A review of recent studies in North America using integrated monitoring approaches to assessing bleached kraft mill effluent effects on receiving waters. <i>Timothy J. Hall (U.S.A.)</i> ..	599
--	-----

Ecotoxicological effects of process changes implemented in a pulp and paper mill: a Nordic case study. <i>Aimo Oikari and Bjarne Holmbom (Finland)</i>	613
--	-----

Contributed Research

Monitoring environmental effects and regulating pulp and paper discharges: Bay of Plenty, New Zealand. <i>Paul Dell, Fergus Power, Robert Donald, John McIntosh, Stephen Park and Liping Pang (New Zealand)</i>	627
---	-----

Ecotoxicological impacts of pulp mill effluents in Finland. <i>Maarit H. Priha (Finland)</i>	637
--	-----

Recent Research and Future Directions

Recent perspectives in integrated monitoring. <i>Peter M. Chapman (Canada)</i>	651
--	-----

Section VII: Future Directions

Invited Overviews

Regulation of pulp mill aquatic discharges: current status and needs from an international perspective. <i>J.W. Owens (U.S.A.)</i>	661
--	-----

Swedish environmental regulations for bleached kraft pulp mills. <i>Staffan Lagergren (Sweden)</i>	673
--	-----

Contributed Research

Environmental aspects of ECF vs. TCF pulp bleaching. <i>Jens Folke, Lars Renberg and Neil McCubbin (Denmark, Sweden, and Canada)</i>	681
--	-----

Recent Research and Future Directions

Future directions for environmental harmonization of pulp mills. <i>Jens Folke (Denmark)</i>	693
--	-----
