Contents

Section I: Water Supply

From Filters to Forests: Water Treatment and Supply	3
<i>C. R. O'Melia</i>	
Pretreatment of Drinking Water to Control Organic Contaminants and Taste and Odor	15
<i>I.H. Suffet, R.J. Baker and T.L. Yohe</i>	
Water Quality Problems and Control Strategies for the Water Supply of Tianjin City	41
<i>X. Zhu</i>	
Humic Substances Removal by Alum Coagulation - Direct Filtration at Low pH	55
<i>J. Fettig, H. Ødegaard and B. Eikebrokk</i>	
Modeling the Effects of Adsorbed Hydrolyzed Al(III)-Ions on Deep Bed Filtration	67
<i>Z. Wang</i>	
Polyelectrolytes for the Treatment of Tap and Filter Back Washing Water	91
<i>J. M. Reuter and A. Landscheidt</i>	
New Coagulant Injection Process	103
<i>C. Ventresque and G. Bablon</i>	
Odour Control by Artificial Groundwater Recharge	113
<i>R. Sävenhed, B.V. Lundgren, H. Borén and A. Grimvall</i>	

Section II: Industrial Discharges

Pretreatment of Industrial Wastewater: Legal and Planning Aspects - A Case Study	125
<i>H.H. Hahn and K.-H. Hartmann</i>	
Clean Technology in the Netherlands: The Role of the Government	139
<i>A.B. van Luin and W. van Starckenburg</i>	
Synergistic Approach to Physical-Chemical Wastewater Pretreatment in the Food Industry	151
<i>G. von Hagel</i>	
Separation of Heavy Metals from Effluents by Flotation	159
<i>I. Zouboulis and K.A. Matis</i>	

Pretreatment of Wastewater from the Automobile Industry	167
<i>R. Klute</i>	
Industrial Wastewater Pretreatment of a Dental-Pharmaceutical Company ..	179
<i>F.W. Günthert and P.-M. Hajek</i>	
Membrane Separation Processes for Industrial Effluent Treatment	189
<i>P.S. Cartwright</i>	
Alternative Treatment of De-icing Fluids from Airports	201
<i>M. Boller</i>	
Separators and Emulsion Separation Systems for Petroleum, Oil, and Lubricants	217
<i>H. Nöh</i>	
Chemical Treatment of Flue Gas Washing Liquids	227
<i>A.N. Grohmann, L. Bauch and H.-P. Scheerer</i>	

Section III: Wastewater and Sludge

Hydrogen Sulphide Control in Municipal Sewers	239
<i>T. Hvitved-Jacobsen, B. Jütte, P.H. Nielsen and N.Aa. Jensen</i>	
Coagulation as the First Step in Wastewater Treatment	249
<i>H. Ødegaard</i>	
Pre-precipitation for Improvement of Nitrogen Removal in Biological Wastewater Treatment	261
<i>I. Karlsson</i>	
Chemically Supported Oil and Grease Removal in Municipal Wastewater Treatment Plants	273
<i>H. Roggatz and R. Klute</i>	
Chemical-biological Treatment Versus Chemical Treatment - A Case Study	281
<i>A. Ilmavirta</i>	
Reuse of Chemical Sludge for Conditioning of Biological Sludges	291
<i>Y. Watanabe and A. Toyoshima</i>	
Influence of Sludge from Chemical Biological Wastewater Treatment on Nitrification and Digestion	307
<i>C.F. Seyfried, H.-D. Kruse and F. Schmitt</i>	
Pretreatment of Sludge Liquors in Sewage Treatment Plants	319
<i>B. Paulsrud, B. Rusten and R. Storhaug</i>	

Heavy Metal Removal from Sewage Sludge: Practical Experiences with Acid Treatment	327
<i>M. Ried</i>	
Treatment of Filter Effluents from Dewatering of Sludges by a New High Performance Flocculation Reactor	335
<i>U. Wiesmann, K. Oldenstein and L. Fechter</i>	
Pretreatment for Wastewater Reclamation and Reuse	347
<i>T. Asano and R. Mujeriego</i>

Pretreatment in Chemical Water and Wastewater
Treatment

This volume contains the proceedings of the 3rd Gothenburg Symposium, 1988, focussing on Pretreatment. Pretreatment is understood as the scene total of all measures taken at the pollutant source to protect water supply, the sewerage system, the central treatment plant, and the aqueous environment. It is, where applicable, the most efficient measure in ecological and economic respects.
