KYOTO, JULY 20-22, 1988

FOREWORD

The Sixth Congress of the Asian and Pacific Regional Division of IAHR was held at the Heian Kaikan, KBS Hall and Kyoto Shigaku Kaikan, Kyoto, Japan, in July 20-22, 1988. The central theme of the Congress was "Asian and Pacific Convention for Further Prosperity in Hydraulic Research toward the 21st Century". Fruitful discussions under the name of this theme were developed in the four categories : Water Resources and Hydrology, River Hydraulics, Environmental Hydraulics, and Coastal and Maritime Hydraulics.

Five volumes of the proceedings which contain 241 papers in each technical session and poster session were published at the Congress, and this final volume includes papers of the General and Special Lectures and records of the Congress.

A total of 419 persons from 18 countries took part in the Congress, and, of these, 102 participants were from outside Japan. The number of the papers presented was 187 including 9 presentations in the poster session.

The topics of the technical sessions covered the entire spectrum of water-based problems, and there was a considerable inter-country variation in the sub-theme of each session. This reflected what problems are very important and attracting interests in respective countries. Technical knowledges and experiences were exchanged among participants not only in the sessions, but also in the technical excursion, social events and the technical exhibition. This mutual understanding and promotion of friendship among participants will form a tight and strong base of our future meetings.

I would like to express my deep appreciation of the cooperation expressed by the participants and contributors to this congress as well as by the staffs in the Local Organizing Committee.

Hoping a great success in the next congress in Beijing, China.

Yoshiaki Iwasa
Chairman, the 6th Congress of the APD-IAHR
Professor of Civil Engineering
Kyoto University, Japan

CONTENTS

GENERAL LECTURE

- Recent Developments of Numerical Hydraulics 3
IWASA, Yoshiaki

SPECIAL LECTURES

- From Conceptual Models to Hydrological Fields
-Towards a Basin Hydrology for the Twenty-First Century- 23
PLATE, Erich J.
- Recent Chinese Progress in Hydraulics 45
LIN, Bingnan
- Mixing by Diffusion in Lakes 69
GRAF, Walter H.

OUTLINE OF THE KYOTO CONGRESS

- General Congress Program 105
- Attendants 105
- Opening and Closing Ceremonies 106
- Program of Technical and Poster Sessions 106
- IAHR-APD Award 107
- Technical Exhibition 107
- Technical Excursion 107
- Social Program 107
- Ladies Program 107
- Post Congress Tour 107
