CONTENTS

Abstract	1
Introduction	1
System of numbering wells and springs	3
Data base	3
Regional setting	6
Physiography	6
Climate	6
Drainage	9
Hydrologic cycle	14
Geology	15
Stratigraphy	15
Coal deposits	22
Structure	23
Ground water	24
Availability	26
Alluvium	28
Igneous rocks	31
Huerfano Formation	31
Cuchara-Poison Canyon aquifer	31
Raton-Vermejo-Trinidad aquifer	34
Cretaceous marine shale and limestone	41
Dakota-Purgatoire aquifer	41
Pre-Cretaceous rocks	45
Quality	49
Alluvium	50
Cuchara-Poison Canyon aquifer	52
Raton-Vermejo-Trinidad aquifer	54
Pierre Shale	60
Relation of ground water to surface water	61
Gain-loss studies	61
Purgatoire River	61
Purgatoire River tributaries	64
Mass-balance studies	65
Purgatoire River	65
Purgatoire River tributaries	67
Summary and conclusions	67
Selected references	79

FIGURES

1. Map showing location of study area 2
2. Diagram showing system of numbering wells and springs 4
3. Map showing location of inventoried wells, springs, and mine shafts in the central Raton Basin 5
4. Map showing location of sampled ground-water sites in the central Raton Basin 7
- 5-7. Photographs showing:
 5. Eastern escarpment of Park Plateau near Trinidad, Colo. 8
 6. The Stonewall (Dakota Sandstone hogback) and Culebra Range near Tercio, Colo. 8
 7. West Spanish Peak near Cuchara, Colo. 9
8. Map showing normal annual precipitation, 1931-60, in the central Raton Basin 10
9. Photograph showing Purgatoire River flowing past outcrop of the Raton Formation near Segundo, Colo. 11
10. Photograph of Sarcillo Canyon near Segundo, Colo., showing channel cut into the Raton Formation and terrace alluvium 11
11. Graph showing discharge in the Purgatoire River at Trinidad, Colo., water year 1970 12
12. Graph showing discharge in the Apishapa River at Aguilar, Colo., water year 1981 13
13. Sketch showing the hydrologic cycle in the central Raton Basin 14
14. Map and cross section showing geology of the central Raton Basin 18
- 15-22. Photographs showing:
 15. Dakota Sandstone in Graneros Gorge near Colorado City, Colo. 19
 16. Trinidad Sandstone overlying Pierre Shale in Berwind Canyon near Ludlow, Colo. 19
 17. Vermejo Formation in Purgatoire River valley at Trinidad Dam near Jansen, Colo. 20
 18. Raton Formation in Purgatoire River valley near Madrid, Colo. 20
 19. Poison Canyon Formation in Wet Canyon near Weston, Colo. 21
 20. Bear Canyon Spring flowing over igneous dike in Bear Canyon near Ludlow, Colo. 22
 21. The Allen Mine near Weston, Colo. 23
 22. The Maxwell Mine near Weston, Colo. 24
23. Map and stratigraphic column showing coal resources of the Raton Basin in the Purgatoire and Apishapa River drainages 25
24. Map showing geologic structure of the Raton Basin 26
25. Sketch showing schematic representation of ground-water flow in the central Raton Basin 28
26. Map showing distribution of alluvium in the central Raton Basin 29
27. Diagram showing relation of specific capacity to transmissivity in wells completed in alluvium of the Apishapa River near Walsenburg, Colo. 31

28. Graphs showing recorded water levels in observation wells completed in alluvium at York Canyon Mine, N. Mex., 1979-81 33
29. Graph showing recorded water levels in alluvium of Apache Creek near Walsenburg, Colo., 1951-83 34
30. Map showing depth to water in the Cuchara-Poison Canyon and Raton-Vermejo-Trinidad aquifers in the central Raton Basin 35
31. Map showing hydrologic features of the Cuchara-Poison Canyon aquifer in the central Raton Basin 38
32. Diagram showing relation of specific capacity to transmissivity in bedrock aquifers in the Denver Basin 39
33. Map showing potentiometric surface in the Cuchara-Poison Canyon aquifer, May 1978, in the central Raton Basin 40
34. Graph showing recorded water levels in the Cuchara-Poison Canyon aquifer near La Veta, Colo., 1954-83 41
- 35-37. Maps showing:
 35. Depth to top of the Raton-Vermejo-Trinidad aquifer in the central Raton Basin 42
 36. Thickness of the Trinidad Sandstone and Vermejo and Raton Formations in the central Raton Basin 43
 37. Thickness of sandstone and coal in the Trinidad Sandstone and Vermejo and Raton Formations in the central Raton Basin 44
38. Photograph showing Berwind Spring issuing from the Raton Formation in Berwind Canyon near Ludlow, Colo. 46
39. Photograph showing Tokar Spring issuing from the Raton Formation in Sarcillo Canyon near Segundo, Colo. 46
40. Diagram showing effects of an underground coal mine on the water table 47
41. Map showing yields from the Cuchara-Poison Canyon and Raton-Vermejo-Trinidad aquifers in the central Raton Basin 48
42. Cross section showing features of water-bearing layers in the Raton-Vermejo-Trinidad aquifer in the central Raton Basin 50
43. Map showing potentiometric surface in the Raton-Vermejo-Trinidad aquifer, April-July 1981, in the central Raton Basin 51
44. Sketch showing comparison of real and apparent directions of regional ground-water movement 52
45. Map showing changes in ground-water levels, 1978-81, Purgatoire River drainage, Colorado 53
46. Graphs showing recorded water levels in observation wells completed in the Raton Formation at the York Canyon Mine, N. Mex., 1979-81 56
47. Graph showing recorded water levels in the Raton-Vermejo-Trinidad aquifer near Walsenburg, Colo., 1949-84 58
48. Map showing approximate depth to top of the Dakota Sandstone in the central Raton Basin 59
- 49-51. Graphs showing:
 49. Average concentrations of major dissolved constituents in ground water in the central Raton Basin 60
 50. Differences in ground-water chemistry as a function of depth in paired samples from the central Raton Basin 62

51. Relation of specific conductance to concentration of dissolved solids in ground water in the central Raton Basin 68
- 52-54. Maps showing:
 52. Water chemistry in the Cuchara-Poison Canyon aquifer at depths of 60 to 450 feet in the central Raton Basin 69
 53. Concentration of dissolved sulfate in water of the Cuchara-Poison Canyon aquifer at depths of 60 to 450 feet in the central Raton Basin 70
 54. Water chemistry in the Raton-Vermejo-Trinidad aquifer at depths of 60 to 350 feet in the central Raton Basin 71
55. Graph showing influence of depth on concentration of dissolved constituents in the Raton-Vermejo-Trinidad aquifer in the central Raton Basin 72
56. Graph showing effect of depth on concentration of dissolved sulfate in paired samples of water from the Raton-Vermejo-Trinidad aquifer and overlying alluvium in the central Raton Basin 73
57. Map showing concentration of dissolved sulfate in water of the Raton-Vermejo-Trinidad aquifer at depths of 60 to 350 feet in the central Raton Basin 74
58. Graph showing precipitation at Trinidad, Colo., and discharge in the Purgatoire River at Madrid, Colo., during October and November 1982 75
59. Diagram showing inflows and outflows to the Purgatoire River between Stonewall and Madrid, Colo., on November 17 and 18, 1982 76
60. Map showing gaining and losing reaches of the Purgatoire River between Stonewall and Madrid, Colo., on November 17 and 18, 1982 77
61. Photograph showing Allen Mine tailings in the flood plain of the Purgatoire River near Weston, Colo. 78
62. Photograph showing seepage from a shaft of the abandoned Frederick Mine at Valdez, Colo. 78

TABLES

1. Stratigraphy of the central Raton Basin 16
2. Hydrologic description of formations in the central Raton Basin 27
3. Summary results of hydraulic tests in alluvium of the central Raton Basin 32
4. Estimated volume of recoverable ground water from aquifers in the central Raton Basin 36
5. Thickness and composition of the Raton and Vermejo Formations in the central Raton Basin 45
6. Summary results of hydraulic tests in the Raton-Vermejo-Trinidad aquifer in the central Raton Basin 49
7. Chemical analyses of ground water in the central Raton Basin, 1977-83 52
8. Water-quality standards 54
9. Concentration of trace elements in ground water in the central Raton Basin 55
