Contents

PART I: DNA ADDUCTS

Executive Summary	3
1 Biologic Significance of DNA Adducts and Protein Adducts ...	6
2 DNA-Adduct Technology	38
3 Conclusions and Recommendations	57
Appendix A: Drinking Water Contaminant Candidates for Development of Baseline Data on Formation of DNA Adducts	61
Glossary	79
Biographical Sketches	89

PART II: MIXTURES

Executive Summary	95
1 Introduction	101
2 Pharmacokinetics and the Risk Assessment of Drinking Water Contaminants	108

3	Risk Assessment of Mixtures of Systemic Toxicants in Drinking Water	121
4	Assessment of Exposure to Organophosphorus Compounds, Carbamates, and Volatile Organic Chemicals	133
5	Acetylcholinesterase Inhibitors: Case Study of Mixtures of Contaminants with Similar Biologic Effects	146
6	Volatile Organic Compounds (VOCs): Risk Assessment of Mixtures of Potentially Carcinogenic Chemicals	162
7	Conclusions and Recommendations for Research	168
	Appendix A: An Approach for Risk Assessment of Volatile Organic Chemicals in Drinking Water That Uses Experimental Inhalation Data and a Physiologically Based Pharmacokinetic Model	171
	Appendix B: A Model Illustrating Synergism	175
	Appendix C: Models of Response: Dose Additivity and Response Additivity	177
	Biographical Sketches	182

PART III: CUMULATIVE INDEX

Index	187
-------------	-----
