H. H. Hahn R. Klute (Eds.)
Chemical Water and Wastewater Treatment

These proceedings of the 4th Gothenburg Symposium focus on technology transfer. Chemical treatment theory is applied to practical treatment of drinking water and industrial or domestic wastewater. The contributions are devoted to questions of floc formation and floc separation as well as problems and practical solutions associated with chemicals and dosing control. Special attention is given to the combination of chemical and biological processes for nutrient removal from wastewater.

ISBN 3-540-53181-5 · ISBN 0-387-53181-5

Contents

Quo Vadis Chemical Treatment?	1
<i>H.H. Hahn</i>	

Floc Formation

Optimization of Flocculation in Connection with Various Solid-Liquid Separation Processes	17
<i>N. Tambo</i>	
Destabilization and Aggregation in Turbulent Pipe Flow	33
<i>R. Klute</i>	
Colloid Destabilization in the Treatment of Surface Waters Containing Colloid-Stabilizing Pollutants	55
<i>I. Liczkó</i>	
Effects of Floc-Virus Association on Chlorine Disinfection Efficiency	75
<i>S. Ohgaki and P. Mongkonsiri</i>	
Flocculation in Static Mixer	85
<i>I. Helgesson</i>	

Floc Separation

Pebble Matrix Filtration - A New Way of Floc Separation	93
<i>K.J. Ives</i>	
Floc Strength in Bridging Flocculation	105
<i>K. Mühle and K. Domasch</i>	
Floc Formation and Breakup in Continuous Flow Flocculation and in Contact Filtration	117
<i>M. Rebhun</i>	
Industrial Application of Weighted Flocculation: Development of the Actiflo Clarification Process	127
<i>F. de Dianous, E. Pujol and J.C. Druoton</i>	
Extended Coagulation for Reagent and Space Savings with Wastewater Lamella Settling	139
<i>G. Desbos, C. Laplace and F. Rogalla</i>	

Liquid-Solid Separation by Electroflotation: An Attractive Alternative to Dissolved Air-Flotation	151
<i>J. Mayer, L. Zhang and H.H. Hahn</i>	
Unit Operations for the Removal of Solids and their Combinations in Water Treatment	169
<i>H.J. Kiuru</i>	

Chemicals and Dosing Control

Coagulation with Prepolymerized Metal Salts	189
<i>H. Ødegaard, J. Fettig and H. Ratnaweera</i>	
Simultaneous Phosphate Precipitation and Particle Destabilization Using Aluminium Coagulants of Different Basicity	221
<i>J. Fettig, H.C. Ratnaweera and H. Ødegaard</i>	
The Effect of Five Coagulants on the Concentration and Distribution of Small Particles in Sewage Water	243
<i>L. Gillberg, L. Eger and S.E. Jepsen</i>	
Process Control of a Chemical Water Treatment Plant by a Continuous Flocculation Test	257
<i>J. Zhang, U. Wiesmann, A. Grohmann</i>	
Increasing the Surface Load at a Direct-Precipitation Plant, VEAS, Norway	271
<i>P. Sagberg, R. Sæther and A. Baggerud Berge</i>	

Drinking Water

Control of Reservoir Water Quality	285
<i>H. Bernhardt</i>	
Optimization of Sequential Unit Operations for Removal of Organics from Drinking Water	305
<i>E.A. Ibrahim, W.C. Becker, M.B. Capangpangan and I.H. Suffet</i>	
Methods of Improving Granular Filters for Water Purification	333
<i>R.I. Ayukaev</i>	
Aluminum Coagulation of Natural Organic Matter	341
<i>J.K. Edzwald and J.E. Van Benschoten</i>	
Treatment of Coloured Surface Water by Coagulation/Direct Filtration: Effect of Water Quality, Type of Coagulant and Filter Aids	361
<i>B. Eikebrokk and J. Fettig</i>	
A Simple Test for Determination of Optimal Doses in the Treatment of Humic Waters	377
<i>P. Dolejš</i>	

Two-Stage Iron(III) Coagulation As a Method of Improving the Effectiveness of the Water Purification Process 391
G. Wahlroos

Residual Aluminium Concentration in Drinking Water After Treatment with Aluminium or Iron Salts 399
R. Nilsson

Wastewater Treatment

Pre-Precipitation and the High-Rate Process for Domestic Wastewater Pretreatment in Finland - A Case Study 413
A. Imavirta

Measures for Nutrient Removal from Sewage Wastewaters in Estonia 429
U. Asmus and N. Zaletova

Full Scale Experience with Biological and Chemical Phosphorus Removal 443
E. Bundgaard and J. Pedersen

Upgrading a Primary Treatment Plant for Nutrient Removal 461
R. Storhaug and B. Rusten

Ammonia and Phosphate Elimination by Biologically Intensified Flocculation Filtration Process 471
A. Kraft and C.F. Seyfried

Virus Risk Analysis in Wastewater Reclamation and Reuse 483
T. Asano and R.H. Sakaji

Sludge as Carbon Source for Denitrification

Chemical-Biological Nutrient Removal - The HYPRO Concept 499
M. Henze and Poul Harremoës

Biological Hydrolysis of Sludge from Primary Precipitation 511
P.E. Jørgensen

Carbon Source for Denitrification from Pre-Precipitated Sludge 521
I. Karlsson

The Use of Industrial By-Products as a Carbon Source for Denitrification 531
B. Hansson and L. Gunnarsson

Improving the Denitrification Potential in Biological Wastewater Treatment by Dosing Carbon from Sludge Hydrolysis 543
E. Hoffmann and R. Klute

Association Française
pour l'Etude des Eaux

Traitement chimique des eaux (eaux naturelles et eaux usées).
Globalement intéressant. Quelques sujets apportent des informa-
tions nouvelles. F 6211.
