Titre original :

Les petites centrales hydroélectriques. Projets, génie civil, présentation des matériels utilisés, turbines et systèmes d'automatisation. Fonctionnement des aménagements et transfert de technologie. Enseignement. Intérêt économique. Description de cas concrets en Asie. G 10653/2.

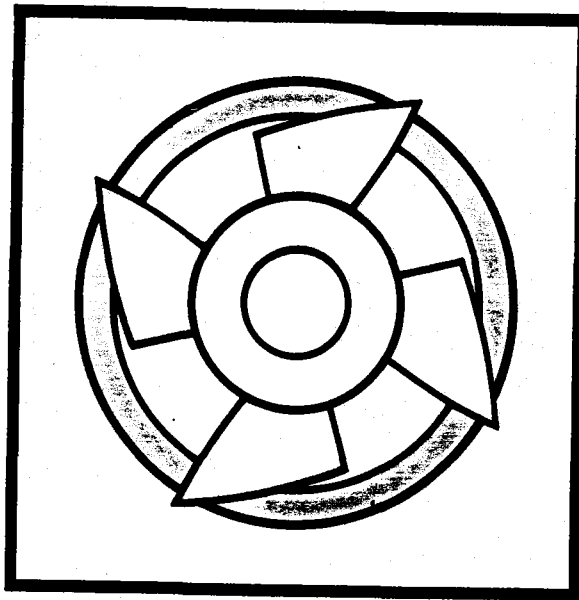

CP

Small Hydro 1990

**Fourth International Conference
on Small Hydro**

66/731311

CONFERENCE PAPERS

organized by

Water Power INTERNATIONAL
CONSTRUCTION

G10653/2

CONTENTS

SESSION I: SOCIO-ECONOMIC AND ENVIRONMENTAL ASPECTS OF SMALL HYDRO DEVELOPMENT

- Some views on the socio-economic impact of small-scale hydropower - K Goldsmith, Consultant, United Nations 1
- Key elements of successful small hydro implementation - U Meier, SKAT Swiss Center for Appropriate Technology, Switzerland 13
- Assessment of socio-economic impact of small hydropower in China - Zhu Xiaozhang, HRC, China 25

SESSION II: FEASIBILITY STUDIES AND SITE SELECTION

- PEACH - a new approach for on site preliminary studies of small hydropower projects - F Isambert, ISL Consulting Engineers, France 43
- The optimum development of a small hydro power system, such as the development of the mixed power system of Grenada - H Hildebrand, Institut für Wasserbau und Kulturtechnik (Karlsruhe) FR Germany and H-H Neher, Caribbean Development Bank, Barbados 50
- Site selection and feasibility studies - S Alam, Sogreah, France and F E Parkinson, Lasalle Hydraulic Laboratory, Canada 64
- Selection of the optimum site to start regional hydropower development in remote areas - H Kuntz, GTZ GmbH, Pakistan 77
- The development of a model for planning small hydro powerplants - H-B Matthias and C Rosseger, Technical University of Vienna, Austria 105

SESSION III: INTERNATIONAL CO-OPERATION IN PLANNING AND IMPLEMENTATION

- Approach to small hydro development and international co-operation - P H Engelmann, GTZ GmbH, FR Germany, H Lauterjung, Projekt-Planung-Lauterjung (PPL), FR Germany and L E Scholz, Philippine-German Special Energy Programme, Philippines 115
- Small hydro development in Northern Mozambique; spin off effects on the local community - S Kvaalen, Norconsult International AS, Norway 130
- The Salleri Chialsa Venture in Nepal (an example of development co-operation) - M Neuhaus, ITECO, Switzerland 135
- Small and micro hydro on South Pacific islands - E Hauck, IWB GmbH, FR Germany 161
- Environmental impact assessment of small hydro - Norwegian assistance to developing countries - S Husebye, Norwegian Water Resources and Energy Administration, Norway ... 183

SESSION VII: MACHINERY 2 (ELECTRICAL EQUIPMENT)

- Cost reduction through engineering - J Bergseng and J Brandsar, E B Energi AS, Norway .. 413**
- Stand-alone induction generators for use in small isolated hydro plants - J Brazil, Dublin Institute of Technology, Republic of Ireland 421**
- Development of a stand alone induction generator for low cost micro hydro systems - F Howe and W R Thomson, Thomson and Howe Energy Systems Inc, Canada; T Tung, Energy, Mines and Resources, Canada 441**
- Integrated digital control panel for hydroelectric power stations - H Tano, Electric Power Development Co. Ltd; Y Sannomiya, Mitsubishi Electric Corporation, Japan 461**
- Governor design and selection problems and the interaction with the civil works - M Volk, Wasserkraft Volk, FR Germany 477**

SESSION VIII: CIVIL WORKS

- Extending an existing weir with a small hydroelectric powerplant - P Ruland and G Rouvé, RWTH Aachen, FR Germany; J Pellin, Société Electrique de l'Our, Luxembourg 499**
- Cost savings achieved in the construction of the Asco project - M Tingaud, Energies France, and G Fauroux, Consulting Engineer, France 512**

SESSION IX: SMALL HYDRO IN ASIA

- Small hydro problems and prospects - C V Varma, Central Board of Irrigation & Power, India . 523**
- Small and mini hydro power development in Sarawak - an overview - Soon Choon Huie and B Suling, SESCO, Malaysia 532**
- Planning for small hydro in island grids in the Philippines - P C Dino and P L Lopez, National Power Corporation, Philippines 557**
- Impact of geomorphology and fluvial behaviour on the performance of a small hydro station in Laos - M V Brahme, S S Vasudev and G G Lakule, Tata Consulting Engineers, India 579**
- Integration of small hydro with a major irrigation project - J A Laught, Snowy Mountains Eng. Corp. Ltd, Australia 596**
- Site selection and feasibility studies for mini hydro projects in Eastern Indonesia - E M Gosschalk and M Bristol, Sir William Halcrow and Partners Ltd; C P Strongman and M D Dwek, Merz and McLellan, UK 615**
- Small hydro - the most viable energy alternative for remote areas on North East India - D Kedia, Industrial Consultants (Assam), India 633**

SESSION I (cont.)

- Microhydro projects in the Himalayan range and their impact on the environment - R C Chauhan, Power Planning System HPSEB, and S C Sharma, REC Hamirpur (HP), India . 654**

SESSION IV: DESIGN AND CONSTRUCTION

Design criteria for the design of small hydro stations in underdeveloped areas - M Estrada Angel, Escuela Colombiana de Ingenieria - Bogota, Colombia	197
The application of portable computers for the design, construction and operation of remote hydroelectric plants - J P Cross, STS Hydropower Ltd, USA	212
Designing small hydro schemes for remote areas - B Leyland, Leyland Consultants Ltd, New Zealand	229
Using appropriate technology solutions for remote area small hydro - M Ballinger, Connell Wagner, Australia	240
An optimal design package for micro-hydro systems - A Kahn and G Walters, University of Exeter, UK	256
Mini hydro plants built by EDELCA in the Gran Sabana - J T Barei d'Empaire, Edelca, Venezuela	268

SESSION V: TECHNOLOGY TRANSFER AND TRAINING

The role of training in the development of small hydro projects - D E Evans and P F Davies, Balfour Beatty Projects & Engineering Ltd, UK	283
The reality of implementing technology transfer - J Duder, J A Carmichael and M D Palmer, Tonkin & Taylor Ltd, New Zealand	296
Training at the Yadot hydroelectric power project - H Libaek, Norplan A/S, Norway	309
Implementing technology transfer and training - R C R Lepiten, Gemini Philippines Rural Foundation Inc, Philippines and L E Scholz, GTZ GmbH, Philippines	331
Ten years of experience of transfer of technology in Thailand - J Etienne, Hydro Transfer, and M Schadeegg, Ateliers Bouvier, France	354

SESSION VI: MACHINERY 1 (TURBINES)

Performance prediction of standardised impulse turbines for micro hydro - A R Wallace and H W Whittington, University of Edinburgh, UK	365
Prototype optimization of new hydraulic turbines for mini hydro applications - G Chiatti and R Ruscitti, University of Rome, Italy	383
Valving associated with oscillating water column low head hydro/pneumatic devices - M H Gould and G Hamill, Queen's University Belfast; D S Speyer, Consultant, UK	398
